Erläuterungen zur Nomenklatur

Eine einheitliche Nomenklatur für die einzelnen in diesem Bericht behandelten Erzeugnisse liegt leider für die Länder der Gemeinschaft nicht vor. Eine Übereinstimmung der hauptsächlichsten Begriffe der Eisen- und Stahlindustrie wird bis zu einem gewissen Grade durch die Erhebungen der ECE und der OEEC erreicht. Trotzdem ist es schwierig, eine Reihe von Erzeugnissen für alle Berichtsländer in eine klare Vergleichsmöglichkeit zu bringen.

Um jedoch einen Überblick über die Abgrenzung der einzelnen Positionen zu geben, sind im folgenden die in der Bundesrepublik Deutschland gebräuchlichen Begriffe kurz erläutert.
