Introduction

- 1 The figures shown in this publication relate to the **Special Trade** of the Federal Republic of Germany.

Therefore, the introductory remarks to Series 1 of the Subject-Matter Series: "Aussenhandel" (Foreign Trade) are also applicable *mutatis mutandis* to this publication.

- 2 Figures are shown according to the **Standard International Trade Classification** (SITC revised) of the United Nations in the wording of the CST (Classification for Statistics and Tariffs) of the Statistical Office of the European Communities.

Details concerning the allocation of commodities can be seen from a confrontation of the numbers of the CST and the Commodity Classification for Foreign Trade Statistics which can be obtained as a special print direct from the Federal Statistical Office in Wiesbaden. This confrontation is further published as Annex 1 in the annual issue of Series 1 of Subject-Matter Series 7.

For many items the **commodity descriptions** have been abbreviated. Their complete wording can be seen from the original version of the CST which has been published in several languages by the Statistical Office of the European Communities in Luxembourg.

- 3 The present publication deviates in some points from the original version of the SITC.

The following products which are not particularly ascertained by German foreign trade statistics are classified under other CST-items:

Topped crudes (331.02) under 332.91,

Blanks for tubes and pipes (672.9) under 678.2.

Angles, shapes and sections (excluding rails), 80 mm or more, and sheet piling of iron or steel of high carbon steel (673.42) under 673.22.

Angles, shapes and sections (excluding rails), 80 mm or more, and sheet piling of iron or steel of alloy steel (673.43) under 673.23.

Gold ores (971.1) under 285.01.

Electric energy (351) has not been shown up to 1975 inclusive. For 1976, the figures have been added subsequently.

Foreign trade of electric energy comprises the financial settlements (incl. some special cases) and is shown throughout in 1 000 Kwh.

Iron for re-utilization (Nutzisen) is covered by group 282 "Waste and scrap of iron or steel".

Postal packages (911) are classified according to their contents.

Gold (X00) is covered by group 971 in Part 9.

Coins in circulation (981 = X10) are legal tender and as such not included in foreign trade statistics.

- 4 In **Table F** only those countries for which the reported value of imports or exports was at least \$ 30 000 are presented under the individual groups.

Table G which is given only in the fourth quarter volume presents under the various countries merely those groups of the SITC, for which the reported value for imports or exports was at least \$ 30 000 in the year concerned.

The values published in terms of \$ 1 000 have been subsequently calculated for imports and exports from the DM values. The following conversion rates have been used for this purpose:

Deviations from the relevant conversion ratio may be due to rounding of the partial figures of which the figures shown here are composed.

5 The data on countries relate to the countries of production and the countries of consumption. The designations of the countries are abbreviated. A list of the countries with information on the territory covered by them is given in the appendix of this publication.

6 Particulars on the method applied for calculating the volume and the indices are provided by the article "Aussenhandelsvolumen

und Aussenhandelsindizes auf Basis 1970" in "Wirtschaft und Statistik", Year 1974, No. 12, December 1974, issued by the Federal Statistical Office.

7 The figures for 1977 are provisional.

8 Changes in the figures published at an earlier date are due to subsequent corrections.
