General explanations

1.1 Legal foundations

The legal foundations of foreign trade statistics are:

- The Law on Statistics for Federal Purposes (Federal Statistics Law BStatG) as amended on 22 January 1987 (Bundesgesetzblatt I, p. 462, 565, amended by Article 2 of the Law of 17 December 1990 (Bundesgesetzblatt I, p. 2837),
- the Law on Statistics on Frontier Crossing Trade in Goods (Foreign Trade Statistics Law AHStatGes) of 1 May 1957 (Bundesgesetzblatt I, p. 413), amended by Article 9 of the 1st Law on the Adjustment of Statistics of 14 March 1980 (Bundesgesetzblatt I,
- the Ordinance for the Implementation of the Law on Statistics on Frontier Crossing Trade in Goods (For-eign Trade Statistics Implementing Ordinance -ABStatDV) as amended on 8 February 1989 (Bundesge-setzblatt I, p. 203), amended by the 8th Ordinance amending the Ordinance on the Implementation of the Law on Statistics on Frontier Crossing Trade in Goods of 14 June 1991 (Bundesgesetzblatt I, p.
- further the legal provisions of the EC as mentioned in Section I Paragraph D of the leaflet on the Single Document of 23 October 1987, published in the Pederal Advertiser on 12 November 1987, No. 213 a).

1.2 Subject-matter

Subject matter of the foreign trade statistics of the Federal Republic of Germany is the frontier crossing trade in goods of the statistical territory with foreign countries.

Foreign countries for the purposes of foreign trade statistics are the territories outside the statistical territory and outside the new Lander und Berlin-East.

Poreign trade statistics do not include the trade in goods between the statistical territory and the new Länder and Berlin-East. It is shown in separate statistics published as Series 6 in Subject-Matter Series 6 (Commerce, Botel and Restaurant Industry, Tourism).

Statistical territory

The statistical territory of foreign trade statistics comprises the Federal Republic of Germany (excl. the customs exclave of Büsingen) incl. Berlin (West) and the Austrian communities of Jungholz and Mittelberg (as customs enclaves).

Declaration

The results of foreign trade statistics are generally based on the data provided by importers and exporters. The declaration for purposes of foreign trade statistics is as a rule effected using the forms "Binfuhranmeldung" (Import declaration) and "Ausfuhrerklärung zugleich Ausfuhranmeldung" (Notification of exports and export declaration).

Trade system

Trade system

The frontier crossing goods traffic is shown in foreign trade statistics as general trade (see Section 3), as special trade and as transit (only transhipment and transit entering and leaving by sea; see Series 6). Special trade essentially comprises those commodities which entered the statistical territory for use, consumption, working or manufacturing, or which, respectively, originated from production, working or manufacturing in the statistical territory and have been exported.

The data of the present publication relate to special trade which comprises 2.1

2.1.1 in imports

- the direct importation of goods into free circulation, for inward processing under customs control ("Eigenveredelung" processing of goods by Germans for German account and "Lohnveredelung" processing of goods by Germans for foreign account), after outward processing under customs control, and also repair trade,
- the importation of foreign goods leaving customs warehouses into the above mentioned types of imports; as warehouses in the meaning of foreign trade statistics are considered free port stores and customs storage warehouses (incl. open customs storage warehouses), as well as some special cases.

2.1.2 in exports

the exportation of goods from free circulation, after customs-approved inward processing ("Eigenveredelung" processing of goods by Germans for German account - and "Lohnveredelung" - processing of goods by Germans for foreign account), for customs-approved outward processing, and also repair trade.

Ships' and aircraft stores

Ships' and aircraft stores
As ships' and aircraft stores are shown in special
trade the delivery of foreign goods leaving customs
warehouses for the needs of outward-bound German seagoing vessels and aircraft (as imports), as well as
the delivery of goods from free circulation and inward
processing for the needs of outward-bound foreign ships
and aircraft (as exports). Included among ships' and
aircraft stores as imports is also the delivery of
foreign goods leaving customs warehouses for the supply of German sea-going ships and aircraft in foreign
ports/airports. The relevant data are included in the
types of importation and/or exportation mentioned in
Section 2.1.1 and 2.1.2, respectively.

Exemptions and simplifications

Exemptions and simplifications

The results of foreign trade statistics do not comprise goods and transport operations which according to Art. 31 of the Ordinance for the Implementation of the Law on Statistics on Frontier Crossing in Goods (AHStatDV) are exempted from declaration, such as since October 1989 shipments of industrial goods of a value of up to DM 1 000 inclusive (previously DM 500) and of food and agricultural goods of a value of up to DM 200 inclusive (previously DM 100), provided the weight of the shipment does not exceed 1,000 kg; presents of a value of DM 1 000 inclusive per shipment; silver and gold for international payments; diplomatic and consular goods; up to 1975 electric power.

Not included either are goods imported or exported by

Not included either are goods imported or exported by the foreign armed forces stationed in the Federal Republic of Germany.

Reference month

Reference month

As far as the presentation of foreign trade as special trade is concerned, direct imports and exports are generally shown in the month they crossed the border, while importations of goods entering customs warehouses, on the other hand, are shown only at the time of their importation from customs warehouses. Due to unavoidable delays in the submission of the declaration, and also because of the necessity to clear up doubtful items, it is possible to some, though a rather small extent that imports and exports are shown in a later reporting period. On the other hand, the export figures may also comprise shipments which, with the combined shipping procedure, with the simplified combined shipping procedure by railway or with the TIR procedure, have not yet left the statistical territory.

2.5 Commodity classifications

The grouping of commodities is shown according to the Standard International Trade Classification, Revision 3 (abbreviated title: SITC-Rev. 3; Statistical Papers, Series M, No. 34/Rev. 3).

According to a decision of the Council of the European According to a decision of the Council of the European Communities taken on 9 December 1975 (75/767 EEC), thi revised version of the SITC will be used in the member countries as of January 1978. It replaces the first revised 1961 version of the Standard International Trade Classification (SITC, Revised).

As against the first revised version, the SITC-Rev. 3 contains numerous changes and, in part, considerable extensions and has also been reconciled with the Nomenclature of the Customs Cooperation Council - CCCN - (formerly "Brussels Tariff Nomenclature") in such a manner that the smallest components (5 - digit SITC - positions) are corresponding to the tariff numbers of this nomenclature, or parts of such tariff numbers.

Details concerning the allocation of commodities can be seen from a correlation of the positions of the SITC-Rev. 3 with the Commodity Classification for Poreign Trade Statistics which can be obtained as a special print direct from the Pederal Statistical Office, Postfach 52 28, D-6200 Wiesbaden 1. This correlation is further published as Annex 1 in the annual issue of Series 1 of Subject - Matter Series 7.

In the present report, the figures shown are for all reporting periods presented according to the new version of the SITC-Rev. II.

For many items the <u>commodity descriptions</u> have been ab-breviated. The complete wording can be seen from the original version of the SITC, Rev. II, of the United

Deviating therefrom, postal packages (911) are classified in German foreign trade statistics according to their contents. Gold coins are covered by group 972; other coins (961) used as legal tender are not contained in the figures of foreign trade statistics.

Foreign Trade of electric energy comprises the financial settlements (incl. some special cases) and is shown throughout in Mwh.

See also the article "Neue Warennomenklaturen für die Außenhandelsstatistik ab 1988" (New nomenclatures of goods for foreign trade statistics in "Wirtschaft und Statistik") No. 5/1987, p. 396 ff. -

2.6

In Table 6 only those countries for which the reported value of imports or exports was at least \$ 30,000 are presented under the individual groups.

Table 7 presents under the various countries merely those groups of the SITC, for which the reported value for imports or exports was at least \$ 30,000 in the year concerned.

where the country of origin is not known, it will be replaced by the country of consignment. The country of consignment ist the country from which the goods were shipped into the statistical territory without being subjected to consecutive stays or legal operations in the countries of transit other than those in connection with their shipment.

with regard to exports, that country is shown as the country of destination in which the goods shal be used or consumed, worked or manufactured. Where the country of destination is not known, it will be the last known country into which the goods are to be shipped that will be considered as the country of destination.

The "Alphabetic Index of Countries for Foreign Trade Statistics" as of January 1990 includes altogether 199 countries or areas, respectively. A detailed list of all countries is included in this publication.

of all countries is included in this publication. With regard to imports, that country of origin as the country of production where goods were produced (country of origin), where the goods either were entirely extracted or manufactured, or where they underwent their last essential and economically justified working or stage of manufacture. There apply the conceptual definitions of Articles 4 to 7, Par. 1, of the Ordinance (EEC) No. 802/68 of the Council of 27 June 1968 (OJEurCom., No. L 148, p. 1). As far as exports are concerned, that country is shown as the country of consumption (country of destination), in which the goods are to be used or consumed, worked or transformed. formed.

The quantity data (deciton - dt = 100 kg) refer to the net weight of the goods, or the net weight incl. retail packaging, respectively.

The values are presented in DM 1,000 and in \$ 1,000. As a general principle, they relate to the value free at border which, independently of the currency shown on the invoice, must always be declared and recorded in DM. This is the value free at border of the statistical territory, and, as far as imports are concerned, the duties on entry are excluded. In the case of exportation or importation after processing, always the full value of the goods including processing and distribution costs is shown.

The values published in \$ 1,000 have been subsequently computed for imports and exports from the DM values. For this purpose, the following conversion rates were applied:

As from year, month	DM for 1 US-\$	' As from year, month	DM for 1 US-\$

Deviations from the specific conversion ratio may be due to rounding of the partial figures of which the figures shown here are composed.

2.10 Volume, indices, terms of trade

The volume, indices, terms of trade
The volume is determined by multiplying the quantity of
the reference month (per commodity number and group of
countries) with the unit value of the base year (per
commodity number and group of countries). The required
base unit values are calculated by dividing the actual
values of the base year (per commodity number and group
of countries) by the relevant quantities. The valume
indicates what the imports/exports would have been in
the reference period if the unit values of the base
year had remained constant.

year naw remained constant.

The curre value index shows the development of the nominal values as related to the base period. The volume index (according to Laspeyres) represents the development of foreign trade, adusted for changes of the unit value. The unit value index (according to Paasche) informs about the movement of import and export unit values on the basis of the frontier crossing values. The terms of trade indivate how the purchasing power of an export unit, as measured in import units, has changed against the base year.

Index formulae:

 $v_{o,n} = \frac{p_o \cdot q_n}{p_o \cdot q_o} \cdot 100$ - Current value index:

 $Q_{0,n} = \frac{p_0 \cdot q_n}{p_0 \cdot q_0}$. 100 - Volume index: (according to Laspeyres)

 $P_{o,n} = \frac{p_n \cdot q_n}{p_o \cdot p_n} \cdot 100$ - Unit value index: (according to Paasche)

ToT = Po,n

p_{0,n} 100 - Terms of trade: (real exchange relationship)

p = unit value per commodity number and group of countries, q = quantity per commodity number and group of countries, o = base period, n = reference period (x) = index of export unit values, P(m) (m) = indes of import unit values.

See in this connection the article: "Neuberechnung des Außenhandelsvolumens und der Außenhandelsindizes of Basis 1980" in: "Wirtschaft und Statistik", No. 2/1984, p. 155 ff.

2.11 Publications and information service

Rather detailed figures of foreign trade statistics are being published in Series 2 to 8 and S of Subject-Matter Series 7, entitled "Außendhandel" (Foreign trade).

Moreover, figures of still greater detail may be obtained against reimbursement of sosts in the form of table extracts from the Federal Statistical Office, P.O.B. 5528, D-6200 Wiesbaden 1. Qut of the great number of possible tabulations, the following should be mentioned:

Imports and exports by commodity numbers, countries of origin and of destination, types of imports and of exports,

Imports by code numbers, countries of origin and typs of imports,

Imports/exports by sections, divisions, groups, sub-groups or items of the SITC and countries of origin/destination,

Imports/exports by trading countries and by countries of origin/destination as well as by commodity subgroups of food industry and the industrial economy,

Imports entering customs warehouses, imports leaving customs warehouses and exports leaving customs warehouses by commodity numbers and

Imports according to branches of transport, border sections, countries of origin and of destination as well as commodity subgroups of food industry and the industrial economy

A detailed description of the methodology of foreign trade statistics is contained in the publication "Au-Benhandel und Statistik" (Foreign Trade and Statistics) of the series "Zahl und Leben" (Figures and Life), No. 7, also published by Messrs. W. Kohlhammer.

See also the article "Methodische, systematische und anmeldetechnische Änderungen in der Außenhandelsstatistik ab 1988" (Changes of methodology, classification and declaration techniques in foreign trade statistics as from 1988) in "Wirtschaft und Statistik", No. 10/1986, p. 773 ff.

Subject-Matter Series 7: Aussenhandel (Foreign Trade)

Series 1: Zusammenfassende Übersichten für den Außenhandel (Summary surveys of foreign trade)

This monthly publication, which appears approximately 6 weeks after the reference month, contains the most important import and export figures of special trade by commodity groups, by countries and groups of countries (EC countries, developing countries, state trading countries), as well as surveys of foreign trade volume and indices

In addition, monthly import and export trends are presented according to commodity groups of the food industry and the industrial economy in the delimitation of general trade

A survey of the foreign trade of OECD member countries appears in the form of an annex

The annual report with an enlarged programme of tabulations, inter alia, also contains data on customs storage trade and processing

Series 2: Außenhandel nach Waren und Ländern (Spezialhandel) — (Foreign trade by commodities and countries special trade)

In the monthly report, import and export figures (quantity and value) are published according to nearly all nine-digit code numbers of the Commodity Classification for Foreign Trade Statistics in a breakdown by major countries of origin/destination. The December report at the same time also serves as the annual report

In a supplementary volume published annually (Series 2.1), data are provided on customs storage trade, transfer of goods from processing to free circulation, nominal customs revenue, and exports of goods of foreign origin

Series 3: Außenhandel nach Ländern und Warengruppen (Spezialhandel) — (Foreign trade by countries and commodity groups — special trade)

This series presents at semi-annual intervals the import and export figures by countries of origin/destination in a breakdown by commodity groups and subgroups of the food industry and industrial economy

The report for the second half-year at the same time also serves as the annual report

Series 4: Außenhandel mit ausgewählten Waren (Foreign trade with selected commodities)

4.1: Ein- und Ausfuhr von Mineralöl (Generalhandel) — (Imports and exports of mineral oil — general trade)

This monthly report which becomes available approximately 8 weeks after the reference month contains the import and export figures for mineral oil by code numbers in a breakdown by countries of origin/destination

The December report at the same time contains the annual figures

Series 5: Außenhandel mit ausgewählten Ländern (Foreign trade with selected countries)

5.1: Außenhandel mit den Entwicklungsländern (Spezialhandel) — (Foreign trade with the developing countries — special trade)

This report provides an annual presentation of foreign trade of the Federal Republic of Germany with the developing countries as countries of origin/destination and countries of sale/purchase, respectively, with a subdivision according to major product/commodity groups of the food industry and the industrial economy for each country.

5.2: Handel mit den Staatshandelsländern (Trade with the state trading countries)

This biennial publication contains data on foreign trade of the Federal Republic of Germany with the state trading countries in a breakdown by countries of origin/ destination and countries of sale/purchase, respectively, as well as by major commodity groups and sub-groups of the food industry and the industrial economy

Series 6: Durchfuhr im Seeverkehr und Seeumschlag (Transit trade in sea-borne transport and transhipment)

This annual publication covers the commodities which, both in-coming and outgoing, were shipped in transit through the report area and via the major seaports of the Federal Republic of Germany, as well as transhipment. The tabulations are shown in a subdivision by seaports, commodity groups of the food industry and the industrial economy, as well as by countries of consignment/destination

Series 7: Außenhandel nach Ländern und Gütergruppen der Produktionsstatistiken (Spezialhandel) — (Foreign trade by countries and groups of goods of production statistics — special trade)

In this annual publication, imports and exports are shown by countries of origin/destination according to the definition and grouping of the groups/categories of goods of the Commodity Classification for Production Statistics. This provides for a commodity breakdown of foreign trade statistics according to the interrelations of production techniques.

Series 8: Außenhandel nach dem Internationalen Warenverzeichnis für den Außenhandel (SITC-Rev. 3) und Ländern (Spezialhandel) — (Foreign trade according to the Standard International Trade Classification (SITC-Rev. 3) and by countries—special trade)—until 1987 SITC-Rev. II—

In this annual report (since 1978), import and export figures are shown according to the five-digit items of the Standard International Trade Classification (SITC-Rev. 3) in a breakdown by major countries of origin/destination

The annex contains a confrontation of the items of the Standard International Trade Classification (SITC-Rev. 3) with the code numbers of the Commodity Classification for Foreign Trade Statistics

Series S: Sonderbeiträge (Special contributions)

S 3: Neuberechnung des Außenhandelsvolumens und der Außenhandelsindizes auf Basis 1980 – (New computation of the volume of foreign trade and of foreign trade indices, base 1980)

This report presents for the reporting period 1952 to 1983 the results of the new computation of the foreign trade volume and the foreign trade indices subsequent to the conversion to base year 1980.

S 5: Außenhandel nach dem Internationalen Warenverzeichnis für den Außenhandel (SITC-Rev. II) von 1978 bis 1987 (Foreign trade according to the Standard International Trade Classification (SITC-Rev. II) from 1978 to 1987)

This report contains the foreign trade figures (special trade) which are presented according to the five-digit items of the Standard International Trade Classification as "long-term series", comparable over a period of 10 reference years

S 6: Systematiken in der Außenhandelsstatistik (Classifications in foreign trade statistics)

This publication illustrates the hierarchical structure of the Commodity Classification for Foreign Trade Statistics. This classification provides the basis for the declaration of goods and the processing and publication of data on the frontier-crossing trade in goods between the Federal Republik of Germany and foreign countries. At the same time, the special contribution describes the conversions made for purposes of publication between the commodity classification and various other classifications of goods for which foreign trade figures are presented in the individual series of Subject-Matter Series 7. In addition, the publication contains the complete correlation tables between the different nomenclatures and the Commodity Classification for Foreign Trade Statistics, Position 1990.

Foreign language publications

Foreign Trade according to the Standard International Trade Classification (SITC-Rev. 3) — Special Trade — until 1987 SITC-Rev. II —

This annual publication in the English language contains foreign trade figures according to the Standard International Trade Classification (SITC-Rev. 3) with data by countries of origin/destination.
