## Methodical Introduction

1. The figures shown in the present publication relate to special trade of the Federal Republic of Germany (up to 5 July 1959 excluding the Saar) including Berlin (West).  
Accordingly, the introduction to Part 1 of "Der Außenhandel der Bundesrepublik Deutschland" (Foreign Trade of the Federal Republic of Germany) is applicable mutatis mutandis to the present publication.
  
2. Beginning with January 1961, the commodities have been grouped in accord with the Classification for Statistics and Tariffs (CST) of the Statistical Office of the European Communities. Except for a few expansions, the CST is consistent with the Revised Standard International Trade Classification (SITC revised), which in January 1961 took the place of the former SITC in accord with a relevant recommendation of the Statistical Commission of the United Nations.  
When comparing the figures compiled according to the former SITC with those compiled according to the new CST, due account must be taken of the conversions and amendments which were made in the revision.  
In tables A and B, the results for the year 1960 are shown according to SITC-Sections as well as according to CST-Sections.  
Particulars on the practices followed in the classification of the commodities can be seen from a comparison between the code numbers of the CST and those of the "Warenverzeichnis fuer die Außenhandelsstatistik" (Commodity Classification for Foreign Trade Statistics). This comparison can be obtained in the form of a special paper from the Federal Statistical Office in Wiesbaden; but it will also be published as Appendix 1 in the annual volume of Part 1 of this publication series.  
Under many of the items included, the commodities have been specified in an abridged form. The unabridged specifications can be seen from the original version of the CST, which has been issued - in several languages - by the Statistical Office of the European Communities in Brussels.
  
3. The data shown in the present publication deviate in some points from the original version of the CST.  
The products below, which are not particularly accounted for in German foreign trade statistics, have been specified under different items of the CST:  
  - a) zoo animals, dogs and cats and other animals (941.0) under 002.9;

- b) figs, fresh (051.9-1) under 052.0-2;
- c) gauze, grey (652.1-1) or terry fabrics, grey (652.1-2) under 652.2-1 or 652.2-2 respectively;
- d) unrefined gold (gold ores) (971.1 = X00.1) under 285.0-1;
- e) semis (including blanks) for seamless tubes (672.9) under 678.2

Electric energy (351.0) is not shown in German foreign trade statistics.

In German foreign trade statistics, iron for re-utilization is covered by group 282 "scrap and waste of iron or steel".

Postal packages (911.0) are classified according to their contents.

Gold (X00) is covered by group 971 of Part 9.

Current notes and coin (other than gold) (981 = X10) are regarded as payment media and as such not included in foreign trade statistics.

4. In the January to November volumes, only those countries where imports or exports amounted to at least 10 000 \$ are included in the various groups in Table F, while the corresponding limit in the December Volume is 5 000 \$. In Table G, which is only given in the December Volume, only those groups of the CST are listed under the various countries where imports or exports in the year concerned amounted to at least 5 000 \$.
5. The data on countries relate to the countries of production and the countries of consumption. The countries themselves have been listed in an abbreviated form. A list of these countries with information of the territory covered by each of them is to be found on the inside of the cover of this volume.
6. Particulars on the method used for calculating the volume and the indices of foreign trade can be seen from the essay "Neuberechnung von Außenhandelsindices für die Bundesrepublik Deutschland auf der Basis 1954" (New Computation of Foreign Trade Indices for the Federal Republic of Germany with 1954 as the Base), published in "Wirtschaft und Statistik", 10th Year, No. 2, p. 82, and in the series "Statistische Berichte", No. V/33/5. Both these publications have been issued by the Federal Statistical Office.
7. Data are to be regarded as final.
8. Alterations of figures already released at an earlier date are due to subsequent corrections.

**Ship's stores** (imports for German and exports and transit for foreign vessels and aircraft)

# Der Aussenhandel der Bundesrepublik Deutschland

(Foreign Trade of the Federal Republic of Germany)

In this publication series all data on foreign trade statistics are reproduced in several independent parts showing a clear arrangement and a detailed classification. The individual monthly volumes contain, at the same time, the results of the previous part of year (for instance the June volume simultaneously those of the first half-year).

## Part 1: Summary Tables

This publication — being the first to appear each month — includes import and export figures of the special trade classified by groups of commodities, tables classified by countries and groups of countries (OEEC, EEC, EFTA, the Eastern Bloc) as well as tables on volume and indices of foreign trade. An enclosed supplement presents monthly tables on import and export in general trade classified by groups of commodities and on the proportion of the Federal Laender and Berlin (West) to the total export.

40 pages — Monthly subscription rate: DM 2.50.

There appears a special annual volume of Part 1 containing a comprehensive table programme (special trade, general trade, customs storage trade, transformation under customs control).

## Part 2: Commodities by Countries of Production and Countries of Consumption

In this publication — being available about 6 weeks after the report month — imports and exports are shown by items or by groups of items in accordance with the Commodity Code of Foreign Trade Statistics and classified by major countries of production or of consumption respectively. The December volume is at the same time the annual volume.

About 300 pages — Monthly subscription rate: DM 9.50. — December and annual volume: DM 12.—.

From 1958 a supplement to Part 2 has additionally been issued each year with data on important types of transactions of import and export (for instance customs storage trade and on tariff agreements).

## Part 3: Areas of Purchase and Areas of Sale by Groups and Sub-Groups of Commodities

The main table contained in this volume — from 1958 being issued in quarterly intervals — shows figures on imports and exports to and from the individual countries of production and consumption classified by groups of commodities. The 4<sup>th</sup> quarterly volume simultaneously contains the annual figures.

About 300 pages — Subscription rate: Quarterly volume 1—3: DM 10.—; 4. Quarterly and annual volume: DM 11.—.

In addition, two supplements to Part 3 are issued each year with data on the channels in foreign trade transactions of the Federal Republic of Germany.

Supplement I (Imports): about 100 pages — Subscription rate: DM 5.—; Supplement II (exports): about 180 pages — Subscription rate: DM 7.—.

## Part 4: Data on Special Trade according to Commodities (without Reference to the Countries)

*This publication appeared the last time for the report month December 1954.*

## Part 5: Special Trade according to the Classification for Statistics and Tariffs (CST)

This volume is issued in English (approximately 8 weeks after the report month) and contains figures on foreign trade classified in accordance with the Classification for Statistics and Tariffs (CST) with special reference to the countries of production and of consumption.

About 130 pages — Monthly subscription rate: DM 5.—.

## Part 6: Transit through the Federal Republic of Germany

In this volume, the quantities of commodities transported through the Federal Republic of Germany are shown according to groups of commodities and according to countries of consignment as well as according to the main customs districts where commodities enter and leave (from 1958 including data on commodities loaded and unloaded in sea and air traffic). 34 pages — Monthly subscription rate: DM 1.50.

## Supplementary Series: "Der Aussenhandel des Auslandes" (Foreign Trade Abroad)

In this series reports are issued at irregular intervals on the development of foreign trade in individual countries. The data are derived from foreign trade statistics abroad and are supplemented by figures provided by foreign trade statistics of the Federal Republic of Germany. Individual reports have so far been issued for more than 80 countries.

## Special Papers

These pamphlets contain detailed figures on recent significant events in the field of foreign trade statistics and textual descriptions of methodical problems. Among the data published on an annual basis are those on foreign trade transactions of the Federal Republic of Germany with the EEC and the EFTA countries.

### "Warenverzeichnis für die Aussenhandelsstatistik" Issued 1961

(Commodity Code of Foreign Trade Statistics)

— Subscription rate: DM 9.80 (binden in boards).

### "Alphabetisches Länderverzeichnis für die Aussenhandelsstatistik"

(Alphabetical List of Countries for Use with Foreign Trade Statistics)

— Subscription rate: DM 2.50.
