| 1 Gemeldete Erkrankte an Geschlechtskrankheiten 1979 nach Art der Erkrankung, Familienstand, Altersgruppen und Ländern | 4 |
| | |
| 2 Gemeldete Erkrankte an Geschlechtskrankheiten 1979 nach Art der jetzigen und Zahl der früheren Erkran- kungen sowie nach Altersgruppen und Ländern | 14 |

Die Angaben beziehen sich auf das Bundesgebiet;
sie schließen Berlin (West) ein.

Erschienen im Juni 1980

Nachdruck - auch auszugsweise - nur mit Quellenangabe gestattet

Preis: DM 3,60

Erläuterungen zur Statistik

Rechtsgrundlage

Gesetz zur Änderung des Gesetzes zur Bekämpfung der Geschlechtskrankheiten vom 25.8.1969 (BGBl. I S. 1351).

Periodizität

Monatliche Berichterstattung; jährliche Zusammenstellung

Erhebungstatbestände

Geburtsdatum, Geschlecht, Familienstand des Erkrankten; Art der Erkrankung, Beratung und Behandlung der jetzigen Erkrankung durch einen anderen Arzt, Zahl und Art früherer Erkrankungen an einer Geschlechtskrankheit.

Erhebung/Meldeweg

Die Erhebung basiert auf den Mitteilungen meldepflichtiger Ärzte an die Gesundheitsämter. Jeder Fall einer Erkrankung an einer Geschlechtskrankheit ist von dem behandelnden oder sonst hinzugezogenen Arzt unverzüglich ohne Nennung des Namens und der Anschrift des Erkrankten dem Gesundheitsamt zu melden, in dessen Bezirk der Arzt seine ärztliche Tätigkeit ausübt. Der Meldeweg geht vom Arzt über das Gesundheitsamt bzw. vom Truppenarzt über den Standortarzt und das Sanitätsamt der Bundeswehr zum Statistischen Landesamt und von dort an das Statistische Bundesamt.

Aufbereitung

Die Aufbereitung erfolgt für die meisten Länder zentral im Statistischen Bundesamt mit Hilfe eines maschinellen Programms. Die Länder Nordrhein-Westfalen, Bayern und Berlin (West) bereiten selbst auf; sie senden Magnetbänder an das Statistische Bundesamt, wo die Koordinierung und Zusammenstellung der Ergebnisse vorgenommen wird.

Die jährlichen Ergebnisse sind gegliedert nach Alter, (Altersgruppen), Geschlecht, Familienstand, Art der Erkrankung und Mehrfachinfektion (bei gleichzeitigem Vorliegen von mehr als einer Geschlechtskrankheit); sie enthalten darüber hinaus auch statistische Angaben über frühere Erkrankungen an Geschlechtskrankheiten. Außer der (veröffentlichten) regionalen Gliederung nach Bundesländern erfolgt jährlich eine Aufbereitung nach Gesundheitsämtern sowie vierteljährlich nach Regierungsbezirken und fünf ausgewählten Großstädten (nicht veröffentlicht).

Veröffentlichung

Die Ergebnisse werden jährlich im Rahmen dieser Fachserie veröffentlicht.

Sonstige Hinweise

Generell ist bei Geschlechtskrankenstatistiken aus den verschiedensten Gründen mit einer Dunkelziffer zu rechnen. Der epidemiologische Wert wird dadurch jedoch nicht wesentlich beeinträchtigt.

Regionale Verzerrungen der Häufigkeitsziffern - insbesondere in Großstädten - können daraus resultieren, daß Praxisort des Arztes und Wohnort des Patienten nicht in jedem Fall übereinstimmen.

Doppelzählungen eines Erkrankten können auftreten aufgrund der Inanspruchnahme eines anderen Arztes bei der gleichen Erkrankung sowie dadurch, daß während des Berichtsjahres mehrere Infektionen bei der gleichen Person gemeldet werden. Während erstere erkannt und eliminiert werden können, besteht für letztere wegen der Anonymität der Meldungen diese Möglichkeit nicht,
