**STATIS-BUND**

Im Statistischen Informationssystem des Bundes (STATIS-BUND) sind rund 1,5 Mill. ausgewählte statistische Zeitreihen gespeichert. Alle Zeitreihen können via Mailbox, auf Diskette oder Magnetband bezogen werden.  
Fachliche Beratung: 06 11 / 75 - 27 16 und 22 56.

Mailbox: 06 11 / 75 29 20 · Technische Rückfragen: 06 11 / 75 32 84.

**T-ONLINE / BILDSCHIRMTEXT**

Ausgewählte Tabellen und Grafiken bietet das Statistische Bundesamt über T-ONLINE / BILDSCHIRMTEXT an. Die Informationsseiten sind in T-ONLINE mit \* 48484# abrufbar, ebenso wie die Bestellung von Veröffentlichungen und die Übermittlung von Anfragen. Es bietet die Möglichkeit eigene Auswertungen, Berechnungen und mathematisch-statistische Analysen durchzuführen.

## Vorbemerkung

Das Statistische Bundesamt veröffentlicht jährlich in der vorliegenden Fachserie 12 Reihe 2 die Ergebnisse der Tuberkulosestatistik, der Statistik der Geschlechtskrankheiten und der Statistik der sonstigen meldepflichtigen Krankheiten.

## Erläuterung zu den Statistiken

### Tuberkulosestatistik

#### Rechtsgrundlage

§ 5a des Gesetzes zur Verhütung und Bekämpfung übertragbarer Krankheiten beim Menschen (Bundeseuchengesetz) in der Fassung der Bekanntmachung vom 18. Dezember 1979 (BGBl. I S. 2262), geändert durch Artikel 10 des 2. Statistikbereinigungsgesetzes vom 19. Dezember 1986 (BGBl. I S. 2555), zuletzt geändert durch Artikel 7 § 1 des Gesetzes vom 24. Juni 1994 (BGBl. I S. 1416).

#### Periodizität

Jährliche Berichterstattung und Zusammenstellung der Ergebnisse.

#### Erhebungstatbestände

Zugänge von Erkrankungen an aktiver Tuberkulose der Atmungsorgane und anderer Organe nach Geschlecht, Alter, Ausländereigenschaft und Diagnosegruppen. Es werden nur die Zugänge (Erst- und Wiedererkrankte), nicht die Bestände, pro Berichtsperiode erfaßt.

#### Meldeweg/Aufbereitung

Die Statistik basiert auf den Mitteilungen meldepflichtiger Personen (in der Regel Ärzte) an die Gesundheitsämter (Tuberkulose-Fürsorgestellen).

Die Meldungen der Gesundheitsämter gehen — zum Teil über die obersten Gesundheitsbehörden der Bundesländer — an die Statistischen Landesämter.

Das Statistische Bundesamt erhält von diesen zusammengefaßte Ergebnisse in Tabellenform, aus denen es Bundesergebnisse konzentriert.

#### Veröffentlichung

Die Ergebnisse werden jährlich in der vorliegenden Fachserie veröffentlicht.

### Statistik der Geschlechtskrankheiten

#### Rechtsgrundlage

Artikel 1 des Gesetzes zur Änderung des Gesetzes zur Bekämpfung der Geschlechtskrankheiten vom 25. August 1969 (BGBl. I S. 1351), geändert durch Artikel 11 des 2. Statistikbereinigungsgesetzes vom 19. Dezember 1986 (BGBl. I S. 2555), zuletzt geändert durch Artikel 7 § 3 des Gesetzes vom 24. Juni 1994 (BGBl. I S. 1416).

#### Periodizität

Vierteljährliche und jährliche Berichterstattung; jährliche Aufbereitung und Zusammenstellung der Ergebnisse.

#### Erhebungstatbestände

Erkrankte nach Geschlecht, Alter und Art der Erkrankung. Mehrfachinfektionen einer Person werden als ein Erkrankungsfall gezählt

#### Meldeweg/Aufbereitung

Die Statistik basiert auf den Mitteilungen meldepflichtiger Ärzte an die Gesundheitsämter

Die Meldungen der Gesundheitsämter bzw. der Sanitätsämter der Bundeswehr gehen an die Statistischen Landesämter. Einige Statistische Landesämter bereiten selbst Landesergebnisse auf, die sie dem Statistischen Bundesamt maschinenlesbar übermitteln. Für die übrigen Bundesländer erfolgt die maschinelle Aufbereitung zentral im Statistischen Bundesamt. Die Ergebnisse dieser Aufbereitung werden mit den übermittelten Daten koordiniert und zu Bundesergebnissen konzentriert.

#### Veröffentlichung

Die Ergebnisse werden jährlich in der vorliegenden Fachserie veröffentlicht.

#### Sonstige Hinweise

Die Ergebnisse sind hinsichtlich ihrer Größenordnung und Entwicklung mit Vorbehalt zu betrachten, weil verschiedene Indizien darauf hindeuten, daß nicht alle Ärzte ihrer Meldepflicht nachkommen; ferner muß mit einer gewissen Zahl von Mehrfachzählungen gerechnet werden, weil ein Erkrankter mehrere Ärzte in Anspruch genommen haben kann.

## **Statistik der sonstigen meldepflichtigen Krankheiten**

### **Rechtsgrundlage**

§ 5a des Gesetzes zur Verhütung und Bekämpfung übertragbarer Krankheiten beim Menschen (Bundesseuchengesetz) in der Fassung der Bekanntmachung vom 18. Dezember 1979 (BGBl. I S. 2262), geändert durch Artikel 10 des 2. Statistikbereinigungsgesetzes vom 19. Dezember 1986 (BGBl. I S. 2555), zuletzt geändert durch Artikel 7 § 3 des Gesetzes vom 24. Juni 1994 (BGBl. I S. 1416).

### **Periodizität**

Vierteljährliche und jährliche Berichterstattung und jährliche Zusammenstellung der Ergebnisse.

### **Erhebungstatbestände**

Erkrankungs- und Sterbefälle an den in § 3 Abs. 1 und 2 bzw. Abs. 3 (nur Sterbefälle) des Bundesseuchengesetzes aufgeführten Krankheiten, Ausscheider von Erregern gemäß § 3 Abs. 4, Nr. 2 Buchstaben a und b, Ausbrüche von Krankheiten in Anstalten gemäß § 8 Bundesseuchengesetz.

### **Meldeweg/Aufbereitung**

Die Statistik basiert auf den Mitteilungen meldepflichtiger Personen (in der Regel Ärzte) an die Gesundheitsämter.

Die Meldungen der Gesundheitsämter gehen über die obersten Gesundheitsbehörden der Bundesländer an die Statistischen Landesämter.

Das Statistische Bundesamt erhält von diesen zusammengefaßte Ergebnisse in Tabellenform, aus denen es Bundesergebnisse konzentriert.

### **Veröffentlichung**

Die Ergebnisse werden jährlich in der vorliegenden Fachserie veröffentlicht.

### **Sonstige Hinweise**

Für das aktuelle Berichtsjahr werden die Angaben nach regionaler Gliederung bzw. nach Alter von den Ländern zu unterschiedlichen Zeitpunkten bereitgestellt. Dadurch können sich Abweichungen zwischen den Erkrankungsfällen ergeben. Bei der Beurteilung des Aussagewertes der Ergebnisse ist zu beachten, daß wegen Schwierigkeiten bei der Diagnosenstellung und der Erfassung nicht alle meldepflichtigen Erkrankungen berücksichtigt sind; die absoluten Werte der Neuerkrankungen sind daher ebenso wie die auf 100 000 Einwohner bezogenen Morbiditätsziffern mit Vorbehalten zu betrachten. Aussagen über die zeitliche Entwicklung sind jedoch möglich.

Ziffern, denen weniger als 50 Fälle zugrunde liegen, besitzen infolge zu großer Zufallsschwankungen keinen sicheren statistischen Aussagewert.

Die Angaben über die Sterbefälle an sonstigen meldepflichtigen Krankheiten für das Berichtsjahr 1993 wurden aus der Todesursachenstatistik übernommen.

### **Morbiditätsziffern je 100 000 Einwohner**

Die Morbiditätsziffern werden aus dem jeweils letzten verfügbaren Stand der Bevölkerungsstatistik (Bevölkerungsfortschreibung bzw. Ausländerzentralregister) berechnet.

Es ist deshalb möglich, daß — bedingt durch unterschiedliche Veröffentlichungstermine — die in dieser Fachserie ausgewiesenen Morbiditätsziffern geringfügig von denen abweichen, die in der Fachserie 12, Reihe 1 "Ausgewählte Zahlen für das Gesundheitswesen" bzw. in anderen Querschnittsveröffentlichungen dargestellt sind.

**Inzidenz von ausgewählten meldepflichtigen Krankheiten  
je 100 000 Einwohner**

# Fachserie 12: Gesundheitswesen

## Reihe 1: Ausgewählte Zahlen für das Gesundheitswesen

Die *unregelmäßig erscheinende* Querschnittsveröffentlichung bietet einen Überblick über den gesamten Bereich des Gesundheitswesens. Außer den wichtigsten Daten über Kranke, Schwangerschaftsabbrüche, Todesursachen, Ärzte und sonstige Berufe des Gesundheitswesens sowie Krankenhäuser werden auch Ergebnisse aus fachüber-greifenden Statistiken (Gesetzliche Kranken-, Renten- und Unfallversicherung, Ärzte und Zahnärzte nach der Beteiligung an der kassenärztlichen Versorgung, Verunglückte bei Straßenverkehrsunfällen sowie Schulen und Schüler des Gesundheitswesens) veröffentlicht. Für besonders wichtige Eckdaten werden längere Zeitreihen gebracht.

## Reihe 2: Meldepflichtige Krankheiten

In dem *Jahresbericht* werden Zahlen über Tuberkuloseerkrankungen, Geschlechtskrankheiten und sonstige nach dem Bundesseuchengesetz zu meldende Krankheiten veröffentlicht.

**Tuberkulose:** Die an aktiver Tuberkulose Erkrankten werden nach Diagnose- und Altersgruppen sowie nach Bundesländern nachgewiesen. Sterbefälle an Tuberkulose werden nach Bundesländern aufgegliedert.

**Geschlechtskrankheiten:** Die Daten über gemeldete Erkrankte umfassen die Merkmale Art der Erkrankung, Geschlecht und Altersgruppen.

**Sonstige meldepflichtige Krankheiten:** Die Daten werden nach der Art der Erkrankung, Altersgruppen und Regierungsbezirken nachgewiesen.

## Reihe 3: Schwangerschaftsabbrüche

In dieser *jährlich erscheinenden* Reihe werden Daten über die Begründung des Abbruchs, die Schwangerschaftsdauer, Art und Ort des Eingriffs, die beobachteten Komplikationen und die Dauer des Krankenaufenthaltes veröffentlicht. Daneben werden Angaben zur Person der Schwangeren (Alter, Familienstand, Zahl der versorgten Kinder und Zahl der vorangegangenen Schwangerschaften) gebracht.

## Reihe 4: Todesursachen in Deutschland

In dem *Jahresbericht* werden Angaben über Sterbefälle nach ausgewählten Todesursachen in detaillierter systematischer und altersmäßiger Gliederung sowie besondere Nachweisungen über Säuglings- und Müttersterblichkeit veröffentlicht.

## Reihe 5: Berufe des Gesundheitswesens

Die *jährliche* Veröffentlichung enthält Angaben über die beruftätigen Ärzte und Zahnärzte nach Berufsausübung und Gebietsbezeichnungen sowie über die sonstigen im Gesundheitswesen tätigen Personen. Neben Apotheken, Apothekern und Tierärzten wird auch das Personal der Gesundheitsämter nach Art des Berufes nachgewiesen.

## Reihe 6: Krankenhausstatistik

### 6.1: Grunddaten der Krankenhäuser und Vorsorge- oder Rehabilitationseinrichtungen

Jährlich wird innerhalb des Berichts im wesentlichen die sachliche und personelle Ausstattung der Krankenhäuser und Vorsorge- und Rehabilitationseinrichtungen sowie die Zahl der behandelten voll- und teilstationären Patienten nachgewiesen.

### 6.2: Diagnosedaten der Krankenhauspatienten

Ab dem Berichtsjahr 1993 werden in diesem Erhebungsteil jährlich die Krankenaufenthalte der vollstationären Patienten nach Hauptdiagnosen dargestellt. Die Diagnosedaten werden unter anderem nach Alter und Geschlecht, Verweildauer, Behandlungs- und Wohnort (Bundesland) sowie der Frage gegliedert, ob im Zusammenhang mit der Hauptdiagnose eine Operation durchgeführt wurde.

### 6.3 Kostennachweis der Krankenhäuser

In dem *Jahresbericht* zum Kostennachweis werden die Selbstkosten der Krankenhäuser nach Hauptkostenarten veröffentlicht. Die Personalkosten sind nach Personalgruppen, die Sachkosten nach Kostenarten gegliedert. Zusätzlich enthält diese Reihe wichtige Kennziffern zu den Krankenhauskosten.

## Reihe S: Sonderbeiträge

### S.2: Ausgaben für Gesundheit 1970 bis 1993

Für jedes der Berichtsjahre sind die Ausgaben im Gesundheitsbereich nach Leistungsarten, Ausgabeträgern und -arten aufgegliedert.

### S.3: Fragen zur Gesundheit

Die Ergebnisse des Mikrozensus vom April 1995 vermitteln einen Überblick über kranke und unfallverletzte Personen in demographischer und sozioökonomischer Gliederung, differenziert nach Dauer der Krankheit/Unglücksverletzung, Arbeitsunfähigkeit, Art und Dauer der Behandlung und Art des Unfalls. Ferner sind Angaben über die Verwendung von Jodsalz und die Rauchgewohnheiten der Bevölkerung enthalten. Hierzu werden u.a. schichtspezifische und regionale Unterschiede dargestellt.

Statistisches Bundesamt

65189 Wiesbaden

Veröffentlichungen und Prospekte sind durch den Verlag METZLER-POESCHEL, Verlagsauslieferung Hermann Leins, Postfach 11 52, 72125 Kusterdingen, erhältlich.

# Zum Wirtschaftsstandort Deutschland – Informationen aus 1. Hand

Statistisches Bundesamt

Ob in Buchform oder auf CD-ROM, das Statistische Jahrbuch ist ein kompetenter und zuverlässiger Partner für alle, die sich über das wirtschaftliche, soziale und kulturelle Leben in Deutschland informieren wollen. Daneben sind Strukturdaten über die Mitgliedstaaten der Europäischen Union und Vergleichszahlen von Japan und den Vereinigten Staaten hilfreich für die Standortbestimmung Deutschlands. Detailliertes und vergleichendes Zahlenmaterial über fast alle Länder der Erde gewährt Einblick in die jeweiligen ökonomischen, ökologischen und bevölkerungspolitischen Verhältnisse.
