Bevölkerungsentwicklung in den Gemeinden Schleswig-Holsteins 1997

Dieser Bericht enthält für jede schleswig-holsteinische Gemeinde den Bevölkerungsstand am 31. Dezember 1996, dessen Veränderung durch Geburten, Sterbefälle, Zu- und Fortzüge im Jahr 1997 und das dadurch entstandene Fortschreibungsergebnis zum 31. Dezember 1997, jeweils nach dem Geschlecht.

Hinweis:

Bevölkerungszahlen nach dem 25. Mai 1987 werden durch Fortschreibung des festgestellten Volkszählungsergebnisses vom 25. Mai 1987 mit den Zu- und Fortzügen (Wanderungsstatistik) und den Geburten und Sterbefällen (Statistik der natürlichen Bevölkerungsbewegung) gemeindeweise ermittelt. Für die Statistik der natürlichen Bevölkerungsbewegung werden Zählblätter der Standesbeamten über beurkundete Geburten und Sterbefälle ausgewertet; Grundlage der Wanderungsstatistik sind die bei den Meldebehörden anfallenden Meldescheine und Erklärungen über die Aufgabe bzw. Änderung der Hauptwohnung. Leider wird nicht bei allen Meldevorgängen nach den Vorschriften des Meldegesetzes gehandelt, besonders nicht, wenn Personen mehrere Wohnungen haben. Diese Fehler gehen auch in die Ergebnisse der Statistik ein, wodurch die fortgeschriebenen Bevölkerungszahlen überhöht oder zu niedrig sein können.

In den ausgewiesenen Zu- und Fortzügen sind auch Fälle aufgrund von Gebiets- und Bestandsveränderungen enthalten, die im eigentlichen Sinne keine Wanderungen sind. In der Wanderungsstatistik – Statistische Berichte A III 1 und A III 2 – werden sie dagegen nicht berücksichtigt. Im Jahre 1997 waren es für Altenholz (Kreis Rendsburg-Eckernförde) 104 Zuzüge und 6 Fortzüge und für Kiel 6 Zuzüge sowie 104 Fortzüge.
