“DIE kleine BRANDENBURG-STATISTIK 2007” (The small Brandenburg Statistics 2007) offers information on the development in the Land Brandenburg based on the most important statistical results.

Divided into thematic chapters, figures on the demographic, economical, social, cultural, and political structures of Brandenburg are presented (Chapters 1 – 27). As far as possible, developments are highlighted by showing the figures for the years 1998, 2002 and 2006. The brochure also contains information on the administrative districts (Chapter 28), data on Brandenburg’s development since 1990 (Chapter 29), and an accumulation of figures for the region of Berlin / Brandenburg.

At the end of 2006 Brandenburg had a population of 2.548 million. This has been a net loss of 11,700 residents (– 0.5 percent). The trend of population decrease continues since 2001. However, the loss in 2006 was the highest recorded in Brandenburg since 1992. The decrease was mainly caused by a birthrate deficit: 17,883 children were born in 2006 but 26,348 inhabitants died. Brandenburg also suffered a migration loss of 3,300 residents.

The tourism in Brandenburg achieved a record high in the number of visitors. Last year 3.22 million people visited Brandenburg. The visitors booked 8.8 million overnight stays. It is remarkable that the average duration of the stay increases from year to year.

The gross domestic product (adjusted for prices) increased 1.9 percent in 2006. The hotel, restaurant and production industry performed better in 2006. It seems that the decline in the construction industry has stopped: The gross value added (adjusted for prices) increased 3.1 percent from 2005 to 2006.

“DIE kleine BRANDENBURG-STATISTIK 2007” gives an initial overview of the data offered by the official statistics. For the »Land« Berlin an analogical brochure is published, named “DIE kleine BERLIN-STATISTIK 2007” (The small Berlin Statistics 2007). Those interested also can find a similarly structured selection of figures for the Federal Republic of Germany as well as benchmark figures for all German “Länder” in “Key Data on Germany”, published on a yearly basis by the Federal Statistical Office.

02.1 Population

Data on the total population as well as the demographic and regional distribution of the population are provided by censuses which are carried out at intervals of several years.

Their findings serve as the basis for updating the official total population figure which is shown here.

02.5 Population

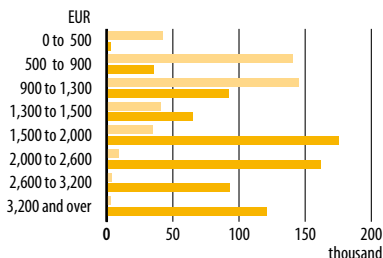

Data on the nationality of foreigners are available from the Foreigner Central Register. The total number of the foreigners may deviate from current population updating (chapter 02.1) because of the different sources of data.

	Unit	1998	2002	2006
Foreigners, as of 31 December				
Europe	1000	36.5	31.9	30.4
of which Poland	1000	7.3	7.8	6.5

Asia	1000	10.9	12.5	11.4
of which Vietnam	1000	6.0	5.4	4.7
Australia and Oceania	1000	•	•	0.1

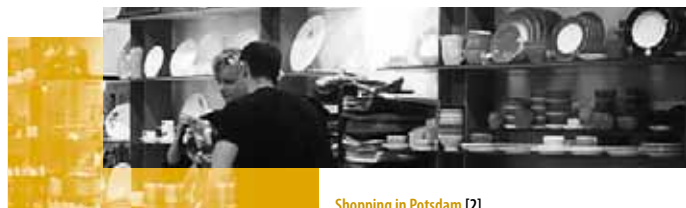

Information on the economic and social situation of the population is provided by the micro-census. This involves an official, annually performed household survey which covers one percent of all households. These households are selected by means of a random mathematical procedure. Interviewers provide information about the survey which is performed on location.

	Unit	1998	2002	2006

Private households by monthly net income

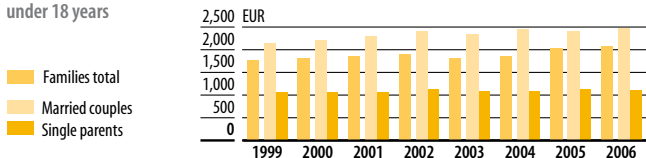

Shopping in Potsdam [2]

04 Households and Families

Every community of persons living together and forming an economical unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household). A household may include relatives and persons who do not belong to the family as such (e.g. companions or partners in life). Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

Privat households by size of household	Unit	1998	2002	2006
Private households total	1000	1,123.9	1,184.4	1,238.5

The consumer price index shows the monthly development of consumer prices. Thus it is considered to be a general measure of the change in the purchasing power of money. The basis for calculating the index is a commodity basket with approximately 750 goods and services (price representatives). In accordance with their share in the overall expenditures of private households in the respective price base year (here: 2000), they are incorporated into the index calculation with different values (weights).

Consumer price index for Brandenburg	Unit	2000	2003	2006
Total cost of living	index	100.0	104.4	111.1
Food and non-alcoholic beverages	index	100.0	106.7	110.8

The construction price indices show the quarterly development of the prices realised by Brandenburg building companies for certain types of construction work and certain types of structures as well as for various types of maintenance work on buildings, independently of the site of performance. The selected construction work and building types are also included in a uniform federal weighting scheme of specified shares (weights) when it comes to calculating the price index. The base year for the building cost indices at present is 2000.

18 Building Activity, Dwellings

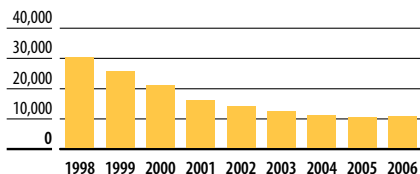

The building statistics include all aspects of building, from planning to the finished building product. The relevant information is provided not only by the monthly and annual construction industry statistics, but also building activity statistics in particular. The building and housing stock is updated with the building activity statistics in between the building and housing census. The basis for updating is provided by the census of 1995.

19.1 Industry

The industry includes the supply of water and energy, the mining/quarrying industry and the manufacturing and the construction industry.

Unless otherwise indicated, the data are based on the monthly data of the plants of enterprises with in general 20 or more employees in accordance with the Klassifikation der Wirtschaftszweige – WZ 2003 (Classification of economic activities), which has been valid since 2003 and replaced at that time the WZ 93. Craft industries are also included.

21 Foreign Trade

The foreign trade statistics provide figures with regard to the movement of goods across the frontiers (import and export) between Brandenburg and foreign countries. The basis for the results is provided by the customs documents of importers and exporters in the trading industry with countries outside of the European Union (extra trade) as well as the statistical registrations of acquisitions and deliveries within the community within the meaning of the Value-Added Tax Law (intra trade).

	Unit	1998	2002	2006

National account (VGR) are a statistical system for presenting a comprehensive, overall picture of the economic activities of all business entities in Brandenburg. It is based on the European System Accounts (ESA 1995) and the Klassifikation der Wirtschaftszweige (WZ 2003) (Classification of Industries). At the centre of national account is the origin of the gross domestic product (GDP) as a measure of performance in Brandenburg.

	Unit	1998	2002	2006 ¹

23.1 Employment and Compensation of Employees

The number of employed persons along with their wages and salaries are determined within the scope of national account. The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Brandenburg are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Berlin from work or other employment relationships.

	Unit	1998	2002	2006 ¹
Employed persons, total	1000	1,066.7	1,025.1	1,014.7

24 Earnings

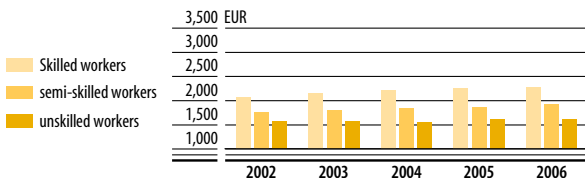

The surveys on earnings, from which the average values are taken, are carried out in the form of sampling. The coverage included in the production sector is made up of fully employed workers and staff, while only staff are included in the trading industries (men and women respectively). The trade, credit and insurance industries are grouped under the term trade.
