Introduction

»DIE kleine BRANDENBURG-STATISTIK 2011«(statistics for the Land of Brandenburg, 2011, key facts and figures) offers information on the development in the Land of Brandenburg based on the most important statistical results.

This document is divided into chapters on different topics. Chapters 1 – 27 present figures on Brandenburg's demographic, economical, social, cultural and political structures. As far as possible, developments have been highlighted by including the figures for the years 2002, 2006 and 2010.

The document also contains information on the administrative districts (Chapter 28), data on Brandenburg's development since 1990 (Chapter 29) and accumulated figures for the region of Berlin/ Brandenburg (Chapter 30).

To 31 December 2010 covered the surface of Land Brandenburg 29,483 km². The portion of the agriculture, forest and water surface was with nearly 90 percent.

With 18,954 live births 417 children came to the world more than in 2009. This is the highest number of live births since 1991. In 2010 27,894 Brandenburg have passed away, 585 more than in 2009. Thus, there was a birth deficit of 8,940 people. Due to the surplus dying and the migration surplus of 624 people, the federal state of Brandenburg in the course of 2010 has lost 8,252 people or nearly 0.3 percent of its population. At the end of the year 2010 the population was 2,503,273 persons, and had the lowest level, which has determined the official population statistics for the federal state of Brandenburg since the reunification of Germany. The observed decrease in population since 2001 continued.

At the end of 2010 there were 1.28 million dwellings in Brandenburg, 3,534 more than in 2009. Most dwellings were added in the state capital of Potsdam (907) and in the district of Potsdam-Mittelmark (771). 92.9 percent of dwellings in Brandenburg are located in buildings with three or more dwellings.

With 10.7 million overnight spent in accommodation establishments of the federal state of Brandenburg in 2010 was the previous year's result again, even if only slightly exceeded. With 3.88 million arrivals for guest numbers was also a slight increase noted. The average length of stay was 2.8 days.

Adjusted for price changes, the gross domestic product in 2010 in Brandenburg increased by 2.2 percent. The medium-term analysis of price-adjusted economic development shows that the federal state of Brandenburg since 1991, steadily, if sometimes only slightly developed upstream.

In 2009 there were three large elections in the federal state of Brandenburg. Beside the members to the European parliament and the German Parliament (Deutscher Bundestag) also the members were selected to the Parliament of Brandenburg. The SPD with 33.0 percent of the secondary votes in Brandenburg strongest party followed of the party DIE LINKE with 27.2 percent and the CDU likewise with 19.8 percent. FDP and GRÜNE/B90 drew again into the parliament.

»DIE kleine BRANDENBURG-STATISTIK 2011« gives an initial overview of the data provided by official statistics. A brochure along the same lines has been published for the Land of Berlin (»DIE kleine BERLIN-STATISTIK 2011«). Those interested also can find a similarly structured selection of figures and data for the Federal Republic of Germany as well as benchmark figures for all German federal states in »Pocketbook: Germany«, published by the Federal Statistical Office.

03 Livelihood

Information on the economic and social situation of the population is provided by the microcensus. This involves an official, annually performed household survey which covers one per cent of all households. These households are selected by means of a random mathematical procedure. Interviewers provide information about the survey which is performed on location.

- 3** Since 2009 only parental benefit

04 Households and Families

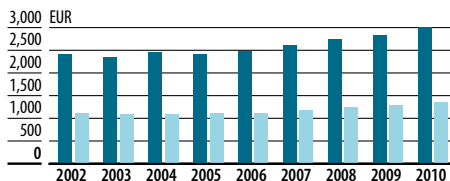

Every community of persons living together and forming an economical unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household).

A household may include relatives and persons who do not belong to the family as such (e.g. partners in life). Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

Privat households by size of household	Unit	2002	2006	2010
Private households	1000	1,184.4	1,238.5	1,249.8
Single-person households	1000	369.4	438.5	456.3

14 National Accounts

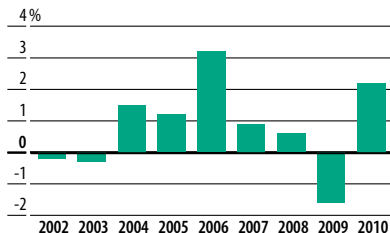

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in

Brandenburg. They are based on the European System of national accounts (ESA 1995) and the Classification of Industries (WZ 2003).

At the centre of national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Brandenburg.

Gross domestic
product

16.1 Employment and Compensation of Employees

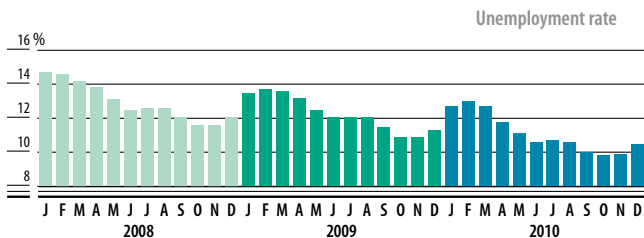

The number of employed persons along with their wages and salaries are determined within the scope of national account based on the Klassifikation der Wirtschaftszweige WZ2003 (Classification of Industries). The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Brandenburg are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Brandenburg from work or other employment relationships.

	Unit	2002	2006	2010 ¹
Persons engaged in economic activity	1000	1,025.1	1,013.8	1,069.2

The foreign trade statistics provide figures with regard to the movement of goods across the frontiers (export and import) between Brandenburg and foreign countries. The basis for the results is provided by the customs documents of importers and exporters in the trading industry with countries outside of the European Union (extra trade) as well as the statistical registrations of acquisitions and deliveries within the community within the meaning of the Value-Added Tax Law (intra trade).

21 Consumer Prices

The index of consumer prices shows the monthly development of consumer prices. Thus it is considered to be a general measure of the change in the purchasing power. The basis for calculating the index is a commodity basket with approximately 700 goods and services (price representatives). In accordance with their share in the overall expenditures of private households in the respective price base year (here: 2005), they are incorporated into the index calculation with different values (weights).

Index of consumer prices for Brandenburg	Unit	2002	2006	2010
Total cost of living	index	95.5	101.8	107.8
Food and non-alcoholic beverages	index	99.0	102.3	112.7

Decorative repairs in a dwelling...	index	104.6	100.2	107.1

The construction price indices show the quarterly development of the prices realised by Brandenburg building companies for certain types of construction work and certain types of structures as well as for various types of maintenance work on buildings, independently of the site of performance. The selected construction work and building types are also included in a uniform federal weighting scheme of specified shares (weights) when it comes to calculating the price index. The base year for the building cost indices at present is 2005.

construction of new
residential buildings
Change on previous year

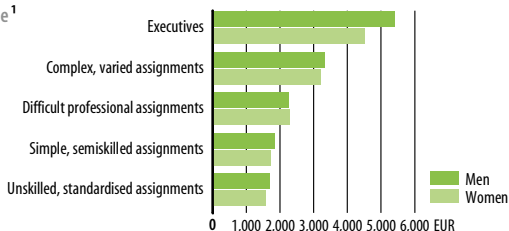

23.1 Earnings

The surveys on earnings, from which the average values were taken, are carried out in the form of sampling. As of 2007, this includes full-time employees (both men and women) working in industry and services as well as those who are part-time employed and persons in marginal employment. In accordance with the classification of economic activities (Klassifikation der Wirtschaftszweige – WZ 2008); results of the previous years are converted.

The parties received parliamentary seats in accordance with their share of the valid second votes. A party which won more direct parliamentary seats than it was entitled to in accordance with its share of the second votes in the entire polling area was authorised to retain

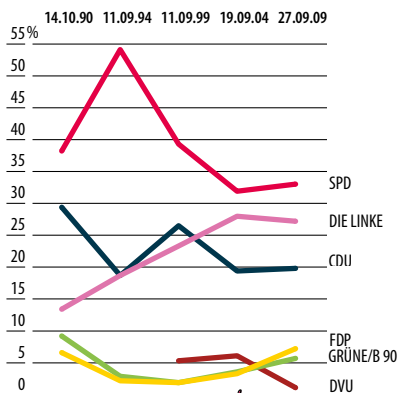

such seats won in addition to the number gained through proportional representation. The other parties received as many compensatory seats as were required for allocation of the parliamentary seats in accordance with the proportion of the second votes.
