»DIE kleine BRANDENBURG-STATISTIK 2013« (statistics for the federal state of Brandenburg 2013, key facts and figures) offers information on the development in the federal state Brandenburg based on the most important statistical results.

This brochure is divided into chapters on different topics. Chapters 1 – 27 present figures on Brandenburg's demographic, economical, social, agricultural and political structures. The results are compared to previous years.

The brochure also contains information on the administrative districts (Chapter 28), data on Brandenburg's development since 1990 (Chapter 29) and accumulated figures for the region of Berlin/Brandenburg (Chapter 30).

On 31 December 2012 the area of the federal state Brandenburg covered 29,486 km<sup>2</sup>. The proportion of the agricultural area was 49 percent. The forest area comprised 36 percent.

In 2012, approximately 18,500 children were born alive in the state of Brandenburg. The number of deaths was 28,400 persons. The resulting

mortality excess of 9,900 people could not be offset by the registered migration gain of around 6,200 people, so that a population loss of 3,700 people was reported. In the calculation of population development only results which were registered after 9 May 2011 (census date) are considered. The present motion cases may therefore differ from the results of the births, deaths and migration statistics. At the end of 2012, the population was based on the 2011 census at 2,449,511 people and had the lowest level, the official population statistics has determined for the State of Brandenburg since the unification of Germany. The since 2001 observed population decline continued to hold on.

2012 were 1.26 million households in Brandenburg. Nearly 37 percent of them were single-person households.

With 11.5 million overnight stays in accommodation establishments in the federal state of Brandenburg in 2012, the numbers of previous year were again exceeded. With 4.2 million arrivals, the guest numbers also slightly increased. This represented an increase in overnight stays by 4.0 percent. For the guests, the increase was 3.1 percent. The average length of stay increased slightly to 2.8 days (2011: 2.7 days).

In 2012 7,283 dwellings were completed in Brandenburg, 14.1 percent more than last year. 6,741 new dwellings were built. Due to construction work on existing buildings 542 dwellings were created. Most of the dwellings created in the districts Potsdam-Mittelmark and Oberhavel. A total of 7,690 construction projects were completed in 2012 in Brandenburg. This was 14.9 percent more than last year.

In 2012 18,260 business registrations in Brandenburg were recorded, 11 percent less than last year. Almost 18,900 businesses were de-registered during the year, which is -2.5 percent. Most of the movements were in the economic sector »Wholesale and retail trade; Repair of motor vehicles and motorcycles« with 4,200 registrations and 4,800 deregistrations, followed by the sector »Administrative and support service activities« with 2,500 registrations and 2,700 deregistrations and »Construction« with 2,300 registrations and 2,600 deregistrations.

The state of Brandenburg recorded economic growth of 0.5 percent. The year before the economic output rose by 2.0 percent. The growth in 2012 is mainly due to the development in the service sector, which contributed in Brandenburg to 70 percent of gross value added.

In 2013, the elections to the German Parliament (Deutscher Bundestag) took place. The CDU with 34.8 percent of the secondary votes is the strongest party, followed by the SPD with 23.1 percent and the party DIE LINKE with 22.4 percent.

»DIE kleine BRANDENBURG-STATISTIK 2013« gives an initial overview of the data provided by official statistics. A similar brochure has been published for the state of Berlin (»DIE kleine BERLIN-STATISTIK 2013«). Those interested can also find a similarly structured selection of figures and data for the Federal Republic of Germany as well as benchmark figures for all German federal states in »Pocketbook: Germany«, published by the Federal Statistical Office and under [www.statistik-portal.de](http://www.statistik-portal.de).

## 04 Households and Families

Every community of persons living together and forming an economical unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household). A household may include relatives and persons who do not belong to the family as such (e.g. partners in life).

Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

## 14 National Accounts

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in Brandenburg. They are based on the European System of national accounts (ESA 1995) and the Classification of Industries (WZ 2008). At the centre of national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Brandenburg.

## 16.1 Employment and Compensation of Employees

The number of employed persons along with their wages and salaries are determined within the scope of national account based on the Klassifikation der Wirtschaftszweige WZ2003 (Classification of Industries). The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Brandenburg are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Brandenburg from work or other employment relationships.

The parties received parliamentary seats in accordance with their share of the valid second votes. A party which won more direct parliamentary seats than it was entitled to in accordance with its

share of the second votes in the entire polling area was authorised to retain such seats won in addition to the number gained through proportional representation. The other parties received as

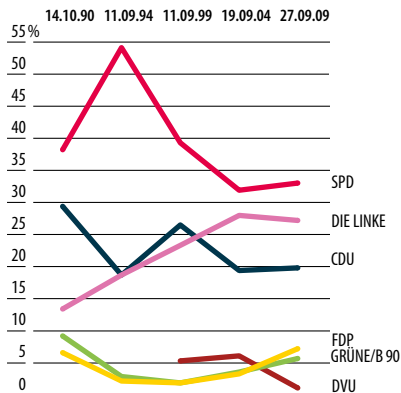

many compensatory seats as were required for allocation of the parliamentary seats in accordance with the proportion of the second votes.
