»DIE kleine BRANDENBURG-STATISTIK 2014« (statistics for the federal state of Brandenburg 2014, key facts and figures) offers information on the development in the federal state Brandenburg based on the most important statistical results.

Benchmarks to demographic, economic, social, cultural and political structures of Brandenburg are presented in Chapter 1 to 27. The results are compared to previous years. The brochure also contains information on the administrative districts (Chapter 28), data on Brandenburg's development since 1990 (Chapter 29) and figures for the region of Berlin/Brandenburg (Chapter 30).

On December 31, 2013 the area of the federal state Brandenburg covered 29,654 km². The proportion of the agricultural area was 49 percent. The forest area comprised 36 percent.

In 2013, approximately 18,400 children were born alive in the state of Brandenburg. The number of deaths was 29,700 persons. The resulting mortality excess of 11,300 people could not be offset by the registered migration gain of around 10,600 people, so that a population loss of 318 people was reported. In the calculation of population development only results which were registered after May 9, 2011 (census

date) are considered. The present motion cases may therefore differ from the results of the births, deaths and migration statistics. At the end of 2013, the population was based on the 2011 census at 2,449,193 people and had the lowest level, the official population statistics has determined for the State of Brandenburg since the unification of Germany. The since 2001 observed population decline continued to hold on.

2013 were 1.24 million households in Brandenburg. Nearly 37 percent of them were single-person households. 236,100 families with children under the age of 18 lived in Brandenburg.

In the school year 2013/14 approximately 227,000 pupils visited general education schools, including 9.5 percent independent school agencies.

In the winter semester 2013/14 there were 50,272 students in Brandenburg, including 50.7 percent women. 72 percent of students were enrolled at universities. 35.2 percent were students in the fields of law, economics and social sciences.

2013, practiced 9,017 physicians and 1,974 dentists in Brandenburg.

The 55 hospitals in Brandenburg possessed 15,191 Beds in. The average length of stay was 7.9 days.

In 2013, there were approximately 9,800 recipients of continual subsistence payment, 22,800 recipients of basic security in old age and disability and 34,000 benefits under the 5th to 9th Chapter of SGB XII.

With more than 11.5 million overnight stays in accommodation establishments in the federal state of Brandenburg in 2013, the numbers of previous year were again exceeded. With 4.2 million arrivals, the guest numbers also slightly increased. The average length of stay of tourists in Brandenburg in 2013 was 2.8 days.

7,435 dwellings were built in Brandenburg in 2013, 2 percent more than last year. 6,510 new dwellings were built. Most of the dwellings created in Potsdam and the districts Potsdam-Mittelmark and Havelland. A total of 7,233 construction projects were completed in 2013 in Brandenburg. This was 6 percent less than last year.

In 2013 18,330 business registrations in Brandenburg were recorded. This is roughly the value of the previous year. Approximately 18,000 businesses were deregistered during the year. Most of the movements were in the economic sector »Wholesale and retail trade; Repair of motor vehicles and motorcycles« with 4,140 registrations and 4,359 deregistrations, followed by the sector »Administrative and support service

activities« with 2,587 registrations and 2,479 deregistrations and »Construction« with 2,397 registrations and 2,515 deregistrations.

Brandenburg's economy grew by 0.7 percent in 2013. The year before the economic output had increased also by 0.7 percent

In 2014, three national elections took place in Brandenburg. In addition to electing Members of the European Parliament and local elections also the election to the Parliament of Brandenburg took place. The SPD with 31.9 percent of the secondary votes is the strongest party, followed by the CDU with 23.0 percent and the party DIE LINKE with 18.6 percent.

»DIE kleine BRANDENBURG-STATISTIK 2014« gives an initial overview of the data provided by official statistics. A similar brochure has been published for the federal state of Berlin (»DIE kleine BERLIN-STATISTIK 2014«). Both booklets are also published in German. Comparative figures for the federal states interested can find in the common statistics portal of the statistical offices of Germany and the federal states www.statistik-portal.de.

introduction of new achievement forms

2 Since 2008 income by family members

3 Since 2009 only parental benefit

04 Households and Families

Every community of persons living together and forming an economical unit as well as persons who live alone and, nevertheless, manage for themselves are counted as a household (private household). A household may include relatives and persons who do not belong to the family as such (e.g. partners in life).

Married couples with children as well as single parents and unmarried couples with their unmarried children living in the same household are counted as families.

Households by size of household	Unit	2005	2009	2013
Households	1000	1,216.7	1,243.9	1,237.6
Single-person households	1000	409.1	449.7	462.0
Multi-person households	1000	807.5	794.2	775.5

14 National Accounts

National accounts (VGR) are a statistical system for presenting a comprehensive, overall view of the economic activities of all business entities in Brandenburg. They are based on the European System of national accounts (ESA 1995) and the Classification of Industries (WZ 2008). At the centre of national accounts is the origin of the gross domestic product (GDP) as a measure of performance in Brandenburg.

	Unit	2005	2009	2013 ¹
Gross domestic product in current prices	EUR bn	47.5	51.8	59.1
Gross value added all sectors	EUR bn	42.8	46.2	53.0

- 1 Establishment of businesses, 2 Without relocations; incl. closure without movings.
of a branch office or dependent branch (ie including («partial task of continuing operations»)

16.1 Employment and Compensation of Employees

The number of employed persons along with their wages and salaries are determined within the scope of national account based on the Klassifikation der Wirtschaftszweige WZ2003 (Classification of Industries). The figures on the number of employed persons correspond to the workplace concept; that is, all employed persons who have their job in Brandenburg are taken into consideration. In the result for income creation the figure for employee earnings reflects all of the cash and non-cash benefits accrued to employees working in Brandenburg from work or other employment relationships.

	Unit	2005	2009	2013 ¹
Persons engaged in economic activity	1000	1,014.1	1,061.4	1,070.5

¹ The annual averages since 2005 are not fully comparable with the previous years because of the introduction of the Code of Social Law II (SGB II)

² Retroactive corrections due to conversion of the statistics of announced positions with the Federal Employment Agency

³ Unemployed persons as % of all civilian employees (employees subject to social insurance and employees at a low level, of-

ficials and unemployed persons additionally self-employed persons and family workers), as of 30 June on previous year

17 Construction, Housing

In the area of construction activity and housing construction activity statistics and the updating of the residential buildings and housing stock are located. The building and housing inventory is updated between the building and housing censuses, with the construction statistics. The actual results for 2013 are based on the final results of the building and housing census 2011.

The foreign trade statistics provide figures with regard to the movement of goods across the frontiers (export and import) between Brandenburg and foreign countries. The basis for the results is provided by the customs documents of importers and exporters in the trading industry with countries outside of the European Union (extra trade) as well as the statistical registrations of acquisitions and deliveries within the community within the meaning of the Value-Added Tax Law (intra trade).

21 Consumer Prices

The consumer price index, shows the price development of all goods and services purchased by private households for consumption purposes, relative to a base year (here: 2010). The change in the consumer price index compared to the same month last year is also known as »inflation«.

The parties received parliamentary seats in accordance with their share of the valid second votes. A party which won more direct parliamentary seats than it was entitled to in accordance with its

share of the second votes in the entire polling area was authorised to retain such seats won in addition to the number gained through proportional representation. The other parties received as

many compensatory seats as were required for allocation of the parliamentary seats in accordance with the proportion of the second votes.
