C/Landwirtschaftszählung 1971

Gemeindestatistik 1970

Ergebnisse der Großzählungen 1968 bis 1971

Heft 4a

Landwirtschaftliche Betriebsverhältnisse 1971

**Größenstruktur, Bodennutzung und Viehhaltung
nach der Grunderhebung zur Landwirtschaftszählung
vom Mai 1971**

**HERAUSGEGEBEN VOM STATISTISCHEN LANDESAMT BADEN - WÜRTTEMBERG
STUTTGART 1972**

Vorwort

Bei dem starken Strukturwandel, der sich im letzten Jahrzehnt in fast allen wirtschaftlichen, sozialen und kulturellen Bereichen vollzogen hat, besteht verständlicherweise ein ausgeprägtes Bedürfnis nach neueren, tiefgegliederten Gemeindezahlen. Die großen Zählungen der Jahre 1968 bis 1972 ermöglichen nun erstmals wieder seit den sechziger Jahren einen umfassenden Überblick über die Gesamtstruktur in der gewünschten tiefen regionalen Gliederung, so daß mit der Veröffentlichung der Gemeindestatistik 1970 eine echte Lücke geschlossen werden kann. Im Hinblick auf das umfangreiche Zahlenmaterial und den zeitlich unterschiedlichen Anfall der Ergebnisse erschien es zweckmäßig, diese Gemeindestatistik in mehreren Teilen wie folgt zu veröffentlichen:

Teil 1: Gebäude und Wohnungen 1968

Teil 2: Bevölkerung und Erwerbstätigkeit 1970

Teil 3: Nichtlandwirtschaftliche Arbeitsstätten 1970

Teil 4: Landwirtschaftliche Betriebsverhältnisse 1971

Teil 5: Weitere Strukturdaten

Im vorliegenden Heft 4 a sind die wichtigsten Grunddaten der 1. Phase der Landwirtschaftszählung vom Mai 1971 (Grunderhebung) dargestellt: die Größenstruktur, das Kultur- und Nutzflächenverhältnis sowie der Umfang und die Zusammensetzung der Viehhaltung der land- und forstwirtschaftlichen Betriebe werden in ihrer starken regionalen Differenzierung transparent. Einige Vergleichszahlen aus früheren Erhebungen ermöglichen darüber hinaus einen Einblick in die regional unterschiedliche Betriebsentwicklung. Die weiteren Strukturmerkmale der land- und forstwirtschaftlichen Betriebe über Besitzverhältnisse, Arbeitskräfteverhältnisse, Maschinenverwendung und dergleichen, die im Rahmen der Vollerhebung zur Landwirtschaftszählung Anfang 1972 ermittelt worden sind, werden in einem besonderen Tabellenband (Heft 4 b) baldmöglichst folgen.

Der vorliegende Band entstand in der von Regierungsdirektor Dr. Vestner geleiteten Abteilung Ernährungs-, Land- und Forstwirtschaftsstatistik und wurde von dem für die Erhebung zuständigen Leiter des Referats „Betriebsverhältnisse, Landwirtschaftszählungen“, Oberregierungsrat Dr. Stadler, eingerichtet und besorgt.

Vorbemerkung und Begriffsbestimmungen

Im Teil 4 der Gemeindestatistik 1970/72 werden die wichtigsten Strukturdaten der land- und forstwirtschaftlichen Betriebe nach dem Ergebnis der Landwirtschaftszählung (LZ) 1971 gemeindeweise dargestellt. Die Landwirtschaftszählung 1971 wurde nicht wie die von 1960 als integrierte Erhebung durchgeführt, sondern auf Grund des Gesetzes über eine Zählung in der Land- und Forstwirtschaft (Landwirtschaftszählungsgesetz 1971) vom 23. Dezember 1970 (BGBl. 1970 I, S. 1852) in zwei zeitlich getrennten Phasen abgewickelt:

im Mai 1971 fand die sogenannte *Grunderhebung* zur Landwirtschaftszählung 1971 statt (1. Phase), die sich im wesentlichen auf die Erfassung der Bodennutzung, Viehhaltung und Rechtsformen der Betriebe beschränkte;

im Januar bis März 1972 wurde die sogenannte *Vollerhebung* und gleichzeitig eine ergänzende *Repräsentativerhebung* zur Landwirtschaftszählung 1971 durchgeführt (2. Phase), die der Feststellung der übrigen Strukturmerkmale diente, wie beispielsweise der Erwerbs- und Unterhaltsquellen der Betriebsinhaber, der auf dem Betrieb lebenden Familienangehörigen und ihrer Beschäftigung, der Ausstattung der Betriebe mit Maschinen, baulichen und technischen Einrichtungen, der überbetrieblichen Zusammenarbeit, der vertraglichen Bindungen bei Erzeugung und Absatz und dergleichen.

Im vorliegenden Heft 4 a der Gemeindestatistik werden zunächst nur die wichtigsten Regionalergebnisse der Grunderhebung (1. Phase) mitgeteilt; die Gemeindergebnisse der Vollerhebung sollen baldmöglichst in einem gesonderten Heft 4 b folgen. Die Gemeinden sind nach dem Gebietsstand vom 30. Dezember 1970 in der Reihenfolge des amtlichen Gemeindeverzeichnisses nach Regierungsbezirken, Kreisen und innerhalb der Kreise in alphabetischer Reihenfolge geordnet, wobei die Stadtkreise in den Regierungsbezirken den Landkreisen jeweils vorangestellt wurden. Der Gebietsstand Ende 1970 entspricht zugleich fast vollständig dem der Volks- und Berufszählung vom 6. Juni 1970, so daß die Ergebnisse dieser großen Zählwerke der siebziger Jahre einen einheitlichen Regionalstand repräsentieren, der durch die Kommunal- und Kreisreform noch nahezu unberührt ist. Zur leichteren Orientierung sind neben den Gemeindennamen jeweils die Gemeindeschlüsselnummern als statistische Kennziffern aufgeführt; bei den kreisfreien Städten und Landkreisen ist außerdem als erste Ziffer die Kennziffer des jeweiligen Regierungsbezirks mit angegeben. Die Gemeindennamen mußten aus druck- und maschinentechnischen Gründen teilweise gegenüber der amtlichen Schreibweise etwas verändert werden.

Dem Tabellenwerk liegt ein Mindestveröffentlichungsprogramm aller Bundesländer zugrunde, das jedoch in einigen wichtigen Punkten überschritten wurde, um dem wachsenden Bedürfnis nach regional tiefgegliederten Strukturdaten in unserem Land zu entsprechen. So wurde es für notwendig erachtet, die Flächennachweisungen der Hauptnutzungs- und Kulturarten einer-

seits und der Fruchtarten auf dem Ackerland andererseits durch den Nachweis der jeweils zugehörigen Zahl von Betrieben zu ergänzen. Damit ist es erstmals möglich, die betriebliche Verteilung der Bodenbewirtschaftung gemeindeweise aufzuzeigen. Bei der starken Betonung von Grünlandwirtschaft und Viehhaltung in Baden-Württemberg war es darüber hinaus angezeigt, die Nutzungsformen des Dauergrünlandes (Wiese, Mähweide, Weide) sowie einige Strukturmerkmale der Viehhaltung (Betriebe mit Zuchtsauen, Hühnern und dgl.) besonders darzustellen. Schließlich erschien es notwendig, um den enormen Strukturwandel der Landwirtschaft in den letzten 20 Jahren sichtbar zu machen, die Gesamtzahl der land- und forstwirtschaftlichen Betriebe ab 0,5 ha Betriebsfläche für die Jahre 1949, 1960 und 1971 in vergleichbarer Form nebeneinanderzustellen. Dies um so mehr, als die Vergleichbarkeit der Ergebnisse der Landwirtschaftszählung 1971 mit früheren landwirtschaftlichen Betriebszählungen teilweise stark beeinträchtigt ist.

Um trotz dieser Programmweiterungen den Vergleich mit den Gemeindeveröffentlichungen der übrigen Statistischen Landesämter zu ermöglichen, wurden der Numerierung der Spalten die mit dem Mindestveröffentlichungsprogramm der Länder übereinstimmenden Spaltennummern in Klammern () beigelegt. Soweit Sachverhalte stärker untergliedert wurden, als das Mindestveröffentlichungsprogramm es vorsah, sind die betreffenden Spalten durch Buchstaben (a, b, c . . .) neben der Spaltennumerierung gekennzeichnet.

Vergleichbarkeit der Ergebnisse

Soweit bei Benutzung des vorliegenden Tabellenwerks nicht nur regionale sondern auch zeitliche Vergleiche, etwa mit den Ergebnissen der Gemeindestatistik 1960, beabsichtigt sind, muß beachtet werden, daß gegenüber der letzten Landwirtschaftszählung einige wichtige methodische Unterschiede bestehen, die die Vergleichbarkeit sehr einschränken:

Bei der Landwirtschaftszählung 1960 hatte man alle Wirtschaftseinheiten mit einer Bodenfläche von mindestens 0,5 ha erfaßt, die ganz oder teilweise als Acker, Wiese, Weide, Wald, Fischgewässer, Gartenland, Obst- oder Rebfläche genutzt wurde. Demgegenüber wurden in die Grunderhebung zur Landwirtschaftszählung 1971 nur Betriebe mit 1 ha und mehr land-, forst- oder fischwirtschaftlich genutzter Fläche sowie Betriebe unter 1 ha oder ohne landwirtschaftlich genutzte Fläche einbezogen, die über natürliche Erzeugungseinheiten im Wert einer Marktproduktion von mindestens 4000 DM verfügen (vgl. hierzu die folgenden Begriffserläuterungen). Durch die neu definierte untere Erfassungsgrenze wurden somit einerseits zahlreiche Wirtschaftseinheiten ausgeschlossen, die 1960 noch berücksichtigt worden sind, und andererseits zusätzliche Betriebe einbezogen, die damals nicht Erhebungsgegenstand waren. Ein Vergleich der Ergebnisse ist daher bei der unteren Größenklasse und bei den

Gesamtnachweisungen der beiden Erhebungen nicht möglich.

Es kommt hinzu, daß das Gliederungsmerkmal der Grunderhebung vom Mai 1971 „landwirtschaftlich genutzte Fläche“ (LF) nicht mit dem bei der Landwirtschaftszählung 1960 verwendeten Begriff der „landwirtschaftlichen Nutzfläche“ (LN) deckungsgleich ist. Vielmehr sind in der LF die jetzt brachliegenden ehemaligen landwirtschaftlichen Flächen (nicht mehr genutztes Acker- und Dauergrünland, Obst- und Rebland) sowie die Ziergärten, privaten Parkanlagen und Rasenflächen, die mit zur LN gehören, nicht enthalten. Aus diesem Grunde ist auch ein Vergleich der Ergebnisse in den einzelnen Größenklassen mit der Gemeindestatistik von 1960 nur bedingt möglich.

Eine weitere Beeinträchtigung der Vergleichbarkeit resultiert daraus, daß die Definitionsmerkmale zur Unterscheidung zwischen Betrieben mit der Hauptproduktionsrichtung (HPR) Landwirtschaft und der HPR Forstwirtschaft neu festgesetzt worden sind. Bisher galten diejenigen Betriebe als Forstbetriebe, deren Inhaber bei der Landwirtschaftszählung 1960 auf Grund einer Selbsteinschätzung die Forstwirtschaft als Produktionsschwerpunkt angaben oder bei denen im Zweifelsfalle die Waldfläche mehr als das Fünffache der landwirtschaftlichen Nutzfläche ausmachte. Bei der Grunderhebung zur LZ 1971 wurden dagegen bundeseinheitlich alle Betriebe als Forstbetriebe abgegrenzt, die eine Flächenrelation zwischen Wald und LF von mindestens 10 : 1 aufweisen.

Auch die Definition der „Sonderkulturen“ wurde gegenüber 1960 geändert: als Sonderkulturen sind 1971 Obstanlagen, Baumschulen, Rebland, Hopfen und Tabak zusammengefaßt. Die Heil- und Gewürzpflanzen, die 1960 noch zu den Sonderkulturen rechneten, blieben dagegen unberücksichtigt.

Bei der Beurteilung der Angaben über die Hauptnutzungs- und Kulturarten sowie über die Fruchtarten auf dem Ackerland ist unbedingt zu berücksichtigen, daß diese Flächen nur insoweit dargestellt werden können, als sie von den bei der Grunderhebung 1971 erfaßten Betrieben bewirtschaftet werden. Es handelt sich also nicht um einen Gesamtflächennachweis der Gemeinden. Ein Vergleich mit Gemeindezahlen der Bodennutzungserhebung, die sich nicht nur auf die Flächen der bei der Landwirtschaftszählung erfaßten Betriebe beschränkt, sondern auch alle übrigen Flächen ausweist, ist somit nicht möglich.

Erläuterung der Begriffe

Die Grunderhebung zur Landwirtschaftszählung 1971 wurde nach dem sogenannten Betriebsprinzip durchgeführt, das heißt, es wurden sämtliche zu einem Betrieb gehörenden Flächen ohne Rücksicht auf die Markungszugehörigkeit und die Eigentumsverhältnisse in derjenigen Gemeinde nachgewiesen, in der sich der Wirtschaftshof bzw. der Betriebs- oder Verwaltungssitz dieses Betriebes befindet. Als Betrieb im Sinne dieser Zählung ist die technisch wirtschaftliche Einheit zu verstehen, die für Rechnung eines Inhabers bewirtschaftet wird, einer einzigen Betriebsführung untersteht und land-, forst- oder fischwirtschaftliche Erzeugnisse hervorbringt.

Im einzelnen gelten für die im Tabellenwerk ausgewiesenen Merkmale die folgenden Begriffsbestimmungen:

Land- und forstwirtschaftliche Betriebe ab 0,5 ha Betriebsfläche (Spalten 1—3): als land- und forstwirtschaftlicher Betrieb wird hier jeder Betrieb nachgewiesen, dessen Inhaber oder Bewirtschafter eine Bodenfläche von mindestens 0,5 ha ganz oder teilweise als Acker, Wiese, Weide, Wald, Fischgewässer, Gartenland, Baumschule, Obst- oder Rebfläche nutzt, wobei es gleichgültig ist, ob der Inhaber den Betrieb als natürliche oder juristische Person, haupt- oder nebenberuflich, zu Erwerbszwecken oder nur zur eigenen Versorgung bewirtschaftet. Dieser Betriebsbegriff ist wesentlich umfassender als der bei der LZ 1971 zugrunde gelegte (vgl. Anmerkungen zu den Spalten 4 und 5) und entspricht im wesentlichen dem der Landwirtschaftszählung von 1949 und 1960, so daß weitgehende Vergleichbarkeit besteht. Wirtschafts- und Besitzeinheiten, deren Flächen nur gelegentlich zum Abweiden oder Abmähen vergeben werden (Tiergärten, private Parkanlagen, Rasenflächen, Brache, Hutungen, Streuwiesen und dgl.) und Wiesen, Weiden und Almen in gemeinschaftlicher bzw. genossenschaftlicher Benutzung, in der Hand von Gemeinden oder sonstigen Körperschaften des öffentlichen oder privaten Rechts, sind dabei 1960 und 1971 nicht mehr berücksichtigt.

Landwirtschaftliche Betriebe und Forstbetriebe der LZ 1971 (Spalten 4 und 5): der Erhebungsbereich der Grunderhebung zur Landwirtschaftszählung 1971 umfaßt alle Betriebe mit einer landwirtschaftlich, forstwirtschaftlich oder fischwirtschaftlich genutzten Fläche von jeweils mindestens 1 ha sowie Betriebe mit einer landwirtschaftlich genutzten Fläche unter 1 ha (einschließlich der Betriebe ohne landwirtschaftlich genutzte Flächen), sofern sie bestimmte Mindesterzeugungseinheiten aufweisen, deren Wert einer jährlichen landwirtschaftlichen Markterzeugung von 4000 DM entspricht. Die Mindesterzeugungseinheiten wurden bundeseinheitlich wie folgt festgelegt und brauchten nur in einem der aufgeführten Produktionszweige erreicht oder überschritten sein:

| a) Mindestviehbestände | Anzahl |
|--|--------|
| Kühe zur Milchgewinnung und Färsen | |
| 2 Jahre und älter | 3 |
| Kälber, unter 3 Monate | 5 |
| Übriges Rindvieh (3 Monate und älter) | 5 |
| Schweine 8 Wochen und älter (ohne Zuchtsauen oder Jungsauen über ½ Jahr) | 8 |
| Zuchtsauen einschließlich Jungsauen von ½ Jahr und älter | 5 |
| Schafe jeden Alters | 50 |
| Legehennen (½ Jahr und älter) | 120 |
| Schlacht- oder Masthähnchen und -Hühnchen (einschließlich zur Mast bestimmter Küken) | 400 |
| Gänse, Enten, Truthühner (einschließlich Küken dieser Geflügelarten) | 200 |
| Zur Aufzucht als Legehennen bestimmte Küken und Junghennen unter ½ Jahr | 250 |

| | |
|---|-------------|
| b) Mindestanbauflächen | Fläche |
| Bestocktes Rebland | 30 Ar |
| Tabak | 30 Ar |
| Hopfen | 30 Ar |
| Gemüseanbau im Freiland | 30 Ar |
| Blumen und Zierpflanzen im Freiland | 10 Ar |
| Unterglasanbau für Erwerbszwecke | jeder Anbau |
| Obstanlagen im Ertrag und nicht im Ertrag | 50 Ar |
| Baumschulen | 20 Ar |
| Heil- und Gewürzpflanzen | jeder Anbau |

Bei der Darstellung der landwirtschaftlichen Betriebe und Forstbetriebe in Spalte 4 der Gemeindestatistik wurden die Betriebe mit fischwirtschaftlich genutzter Fläche, aber weniger als 1 ha land- oder forstwirtschaftlich genutzter Fläche nicht berücksichtigt, sofern sie nicht eine der oben genannten Mindestzeugungseinheiten aufwiesen.

Betriebsfläche (Spalte 5): als Betriebsfläche wird die selbstbewirtschaftete Gesamtfläche eines Betriebes bezeichnet. Sie umfaßt die von einem Betrieb aus bewirtschaftete oder verwaltete Bodenfläche, unabhängig davon, ob es sich um eigene, gepachtete oder zur Bewirtschaftung unentgeltlich überlassene Flächen handelt. Zur Betriebsfläche zählen neben der landwirtschaftlich genutzten Fläche (LF) auch die nicht mehr landwirtschaftlich genutzten Flächen, Waldflächen, Gewässer, unkultivierte Moorflächen, Öd- und Unland, Gebäude und Hofflächen, Wegeland, Park- und Grünanlagen sowie Ziergärten.

Landwirtschaftliche Betriebe (Spalten 6 bis 73): in den Spalten 6 bis 73 erfolgen die Nachweisungen nicht für alle bei der Grunderhebung zur LZ 1971 erfaßten land- und forstwirtschaftlichen Betriebe, sondern nur für die landwirtschaftlichen Betriebe, das sind die Betriebe mit der Hauptproduktionsrichtung (HPR) Landwirtschaft. Die Forstbetriebe, das sind die Betriebe mit der HPR (dem Produktionsschwerpunkt) Forstwirtschaft, bleiben dagegen hier unberücksichtigt. Die Zahl der Forstbetriebe ergibt sich als Differenz zwischen Spalte 4 und Spalte 6.

Die Abgrenzung der Forstbetriebe gegenüber den landwirtschaftlichen Betrieben erfolgte bei der Landwirtschaftszählung 1971 allein auf Grund des Flächenverhältnisses zwischen landwirtschaftlich genutzter Fläche und Waldfläche: jeder Betrieb gilt als Forstbetrieb, bei dem die Waldfläche mehr als das Zehnfache der landwirtschaftlich genutzten Fläche ausmacht. Landwirtschaftliche Betriebe sind demnach die Betriebe, bei denen die Waldfläche das Zehnfache der landwirtschaftlich genutzten Fläche nicht übersteigt, einschließlich der Betriebe unter 1 ha landwirtschaftlich genutzter Fläche mit weniger als 1 ha Wald, die die geforderten Mindestzeugungseinheiten im Wert einer Marktproduktion von 4000 DM aufweisen.

Landwirtschaftlich genutzte Fläche (Spalten 15 bis 22): hierzu rechnen das Ackerland und das Gartenland, die Obstanlagen, Baumschulen, das Dauergrünland, Rebland, die Korbweiden- und Pappelanlagen sowie Weihnachtsbaumkulturen außerhalb des Waldes. Die jetzt brachliegenden ehemaligen landwirtschaftlichen Flächen (nicht mehr genutztes Acker- und Dauergrün-

land, Obst- und Rebland) sowie Ziergärten, private Parkanlagen und Rasenflächen zählen nicht zur landwirtschaftlich genutzten Fläche.

Ackerland (Spalten 23 und 24): zum Ackerland rechnen alle Flächen, die in die Fruchtfolge einbezogen sind und regelmäßig oder in gewissen Abständen beackert und bestellt werden.

Im einzelnen zählen hierzu die Flächen der als Hauptfrucht angebauten Getreidearten und Hülsenfrüchte zur Körnergewinnung, der Hackfrüchte, Handelsgewächse, Futterpflanzen, zum Unterpflügen bestimmten Hauptfrüchte und die Schwarzbrache; auch sind im Ackerland die Flächen des Erwerbsgartenbaus (einschließlich Unterglasflächen) mit einbezogen. In Spalte 23 wird die Zahl der Betriebe nachgewiesen, die überhaupt Ackerland bewirtschaften.

Sonderkulturen (Spalte 25): als Sonderkulturen sind hier folgende Hauptnutzungs- und Kulturarten ausgewiesen: Hopfen, Tabak, Obstanlagen (ohne Erdbeeren), Baumschulen (ohne forstliche Pflanzgärten für den Eigenbedarf), Rebland (im Ertrag stehendes Rebland einschließlich der nicht im Ertrag stehenden Rebfläche sowie Rebbrache zur Wiederbestockung).

Dauergrünland (Spalten 26 bis 30): zum Dauergrünland rechnen Wiesen, Mähweiden, Weiden einschließlich Almen sowie Hutungen und Streuwiesen, auch Wiesen und Weiden unter Obstbäumen, soweit nicht die obstbauliche Nutzung überwiegt. Nicht zum Dauergrünland zählt dagegen das sogenannte „Ackergrünland“ (Ackerwiesen und Ackerweiden), das in die Fruchtfolge einbezogen ist. In Spalte 26 wird die Zahl der Betriebe nachgewiesen, die überhaupt Dauergrünland bewirtschaften.

Die Flächen von Wiesen, Mähweiden und Weiden sind in den Spalten 28 bis 30 im einzelnen aufgeschlüsselt. Dabei werden unter Wiesen diejenigen Dauergrünlandflächen verstanden, die nur durch Abmähen genutzt werden; Weiden werden in der Regel nur durch Beweidung genutzt, während bei Mähweiden die Mäh- und Weidenutzung mehrmals während des Jahres wechselt.

Hackfrüchte (Spalten 31 bis 33): die Hackfruchtfläche umfaßt den Anbau folgender Fruchtarten: Kartoffeln, Zuckerrüben (ohne Samenanbau), Futter-(Runkel-)rüben (ohne Samenanbau), Kohlrüben (ohne Samenanbau) sowie alle anderen Hackfrüchte (ohne Samenanbau), wie z. B. Futtermöhren, Futterkohl, Markstammkohl und Topinambur. In Spalte 31 wird die Zahl der Betriebe aufgeführt, die überhaupt Hackfrüchte angebaut haben. Die Fläche des Kartoffelanbaus ist in Spalte 33 gesondert nachgewiesen.

Futterpflanzen (Spalten 34 bis 36): der Feldfutterbau umfaßt Klee, Klee gras einschließlich Kleebrache, Luzerne, Gras auf dem Ackerland zum Abmähen (Ackerwiese), Gras auf dem Ackerland zum Abweiden (Ackerweide), Grünmais zur Grünfutter- oder Gärfuttergewinnung (Silomais), Serradella, Esparsette, Wicken und Süßlupinen sowie andere Futterpflanzen zur Grünfutter-, Gärfutter- oder Heugewinnung. In Spalte 34 wird die Zahl der Betriebe dargestellt, die überhaupt Feldfutterbau aufweisen. Die Fläche von Grün- und Silomais wird in Spalte 36 besonders ausgegliedert.

Getreide (Spalten 37 bis 46): zum Getreidebau rechnen alle Flächen, die zum Zwecke der Körnergewinnung mit Weizen einschließlich Dinkel (Spelz), Roggen, Gerste, Hafer, Menggetreide sowie Körnermais bebaut sind. Die Betriebe und Flächen dieser Hauptgetreidearten sind im einzelnen in den Spalten 39 bis 46 aufgeschlüsselt. Dabei ist unter den Getreidearten jeweils Winter- und Sommeranbau (z. B. Winterweizen und Sommerweizen, Winterroggen und Sommerroggen) gleichermaßen erfaßt.

Feldgemüse (Spalte 47): die Feldgemüsefläche umfaßt den Anbau von Gemüse (ohne Samenanbau), Spargel, Erdbeeren *im Wechsel mit landwirtschaftlichen Kulturen* (z. B. Getreide oder Kartoffeln), nicht dagegen den gärtnerischen Gemüseanbau im Freiland oder unter Glas im Wechsel mit Gartengewächsen.

Gartengewächse (Spalte 48): hierzu gehören Gemüse, Spargel, Erdbeeren im Freiland sowie unter Glas, *im Wechsel mit Gartengewächsen* einschließlich Blumen, Zierpflanzen, Stauden und Jungpflanzen sowie Gartensämereien und Vermehrungsanbau von Blumenzwiebeln und Knollen.

Landwirtschaftliche Betriebe 1971 mit Wald (Spalten 49 bis 51): hier sind nur die landwirtschaftlichen Betriebe und Flächen mit Wald nachgewiesen; die Wälder, Forsten und Holzungen der Forstbetriebe sind somit nicht berücksichtigt. Als Waldflächen gelten alle zur dauernden Holzgewinnung benutzten Flächen, d. h. die Holzbodenflächen einschließlich der Hauberge, Räumden (z. B. Waldweide, Hutland) und Blößen (z. B. Kahlschlagflächen) und der nur vorübergehend als

Acker oder Wiese genutzten Holzbodenflächen sowie flächenmäßig nicht ausgeschiedenen Wege und Schneisen. Kampanlagen und Pflanzgärten der Forstbetriebe rechnen ebenfalls zur Waldfläche, nicht jedoch die Weihnachtsbaumkulturen außerhalb des Waldes. In Spalte 49 wird die Zahl der landwirtschaftlichen Betriebe mit Wald überhaupt nachgewiesen, in Spalte 50 die der Betriebe mit Waldflächen unter 5 ha.

Landwirtschaftliche Betriebe mit Viehhaltung (Spalten 52 bis 73): im Gegensatz zu den Viehzählungen, bei denen das Vieh grundsätzlich dort nachgewiesen wird, wo es am Stichtag der Zählung steht, war bei der Grunderhebung zur LZ 1971, dem Betriebsprinzip folgend, alles zum Betrieb gehörende Vieh nachzuweisen, das sich in den Ställen und auf den Flächen des Betriebes befand einschließlich das in Pension aufgenommene Vieh.

Zeichenerklärung

RB = Regierungsbezirk

LKR = Landkreis

ST = Stadt
