Introduction

1 Allgemeine Erläuterungen

1.1 Legal bases

Foreign trade statistics are based especially on the following legislation:

- Law on Statistics for Federal Purposes (Federal Statistic Law) of 22 January 1987 (Federal Law Gazette, part I, pp. 462, 565)
- Regulation (EC) No. 471/2009 of the Parliament and of the Council of 6 May 2009 on Community statistics relating to external trade with non-member countries and repealing Council Regulation (EC) No 1172/95 (OJ no. L 152, p. 23)
- Commission Regulation (EC) No 92/2010 of 2 February 2010 implementing Regulation (EC) No 471/2009 of the European Parliament and of the Council on Community statistics relating to external trade with non-member countries as regards data exchange between customs authorities and national statistical authorities, compilation of statistics and quality assessment (OJ no L 31, p. 4)
- Commission Regulation (EC) No 1982/2004 of 18 November 2004 implementing Regulation (EC) No 638/2004 of the European Parliament and of the Council on Community statistics relating to the trading of goods between Member States and repealing Commission Regulations (EC) No 1901/2000 and (EEC) No 3590/92 (OJ L 343, 19.11.2004, p. 3–19)
- Law on Statistics on Cross-Border Trade in goods (Foreign Trade Statistics Law), adjusted as published in Federal Law Gazette, Part III, No 7402-1
- Ordinance for the Implementation of the Law on Statistics on Cross-Border Trade in goods (Foreign Trade Statistics-Implementing Ordinance) as published on 29 July 1994 (Federal Law Gazette, Part I, p. 1993)

1.2 Subject

The subject of foreign trade statistics is Germany's cross-border trading of goods with other countries. Other countries in sense of foreign trade statistics are territories outside the statistical territory.

A distinction is made between intra-Community trade (trade with EU Member States) and extra-Community trade (trade with non-member states) in foreign trade statistics since 1993.

1.3 Statistical territory

The statistical territory covers the Federal Republic of Germany (excluding the Büsingen customs enclave).

1.4 Trade system

Foreign trade statistics is presented on the systems of general trade and special trade. General trade covers all goods moved into and moved out of Germany, except transit operations and goods of intermediate foreign traffic (these are not subject to foreign trade statistics). Special trade only covers goods that are moved into Germany for use, consumption, treatment or processing, and goods leaving Germany that were produced, treated or processed in the country.

2 Special trade

The data of the present publication relate to the system of special trade.

2.1 Imports

The system of special trade includes the following types of imports:

- imports for free movement
- imports for inward processing under contract or on processors own account
- imports after outward processing

Special trade includes imports from storage into free movement or for inward processing.

2.2 Exports

The system of special trade includes the following types of exports:

- exports from free movement
- exports after inward processing under contract or on processor's own account
- exports for outward processing.

2.3 Exemptions

As regards intra-Community trade statistics all private persons are exempted from the obligation to provide information. Businesses are exempted from the obligation to submit a declaration for the purposes of intra-Community trade statistics if, in the current and the previous year, their scope of dispatches to other Member States and their scope of arrivals from those countries each have not exceeded the currently specified threshold or 400 000 Euro.

As regards the extra-Community trade statistics consignments of goods up to a value of 1000 Euro are exempted from declaration, provided the total weight of the consignment does not exceed 1000 kilograms.

2.4 Commodity classification

The commodities are shown according to the Standard International Trade Classification, Revision 4 (SITC-Rev.4).

2.5 Partner countries

As partner countries the country of origin (imports) and the country of destination (exports) are shown. The country of destination is the country where the goods from Germany are to be used or consumed, treated or processed. The country of origin is the country where a commodity was completely obtained or produced or the country of its final substantial and economically justified treatment or processing.

2.6 Quantities

The quantity of goods, i.e. their net mass, is presented in tons (1t = 1000 kg). A commodity's net mass is defined as its mass excluding all packaging.

2.7 Values

Conforming to international standards, the value of goods is based on their value free at border (statistical value). Usually, this value is derived from the amount invoiced for a commodity bought (imports) or sold (exports), a cost delimitation free German border being required. Duties, taxes or other levies imposed on importation or exportation are not included in the statistical value. In processing trade, the statistical value is composed of the invoice price – processing cost (wages, material, accessories) – plus the value of the previously exported or imported unprocessed goods and insurance and freight charges up to the German border.

The statistical value is presented in Euro und US-\$. The values published in US-\$ have been subsequently computed from the Euro values. For this purpose the conversion rates from the European Central Bank were applied.

3 Notes

The figures for 2009 and 2010 are final results.
