Introduction

- 1 The figures shown in this publication relate to the **Special Trade** of the Federal Republic of Germany.

Therefore, the introductory remarks to Series 1 of the Subject-Matter Series 7: „Außenhandel“ (Foreign Trade) are also applicable *mutatis mutandis* to this publication.

- 2 The **grouping** of commodities is shown according to the Standard International Trade Classification, Revision 2 (abbreviated title: SITC - Rev. II; Statistical Papers, Series M, No. 34/Rev. 2).

According to a decision of the Council of the European Communities taken on 9 December 1975 (75/767 EEC), this revised version of the SITC will be used in the member countries as of January 1978. It replaces the first revised 1961 version of the Standard International Trade Classification (SITC, Revised).

As against the first revised version, the SITC - Rev. II contains numerous changes and, in part, considerable extensions and has also been reconciled with the Nomenclature of the Customs Co-operation Council - CCCN - (formerly „Brussels Tariff Nomenclature“) in such a manner that the smallest components (5-digit SITC - positions) are corresponding to the tariff numbers of this nomenclature, or parts of such tariff numbers.

Details concerning the allocation of commodities can be seen from a correlation of the positions of the SITC - Rev. II with the Commodity Classification for Foreign Trade Statistics which can be obtained as a special print direct from the Federal Statistical Office, Postfach 55 28, 6200 Wiesbaden 1. This correlation is further published as Annex 1 in the annual issue of Series 1 of Subject - Matter Series 7.

In the present report, the figures shown are for all reporting periods presented according to the new version of the SITC - Rev. II.

- 3 Deviating therefrom, postal packages (911) are classified in German foreign trade statistics according to their contents. Gold coins are covered by group 972; other coins (961) used as legal tender are not contained in the figures of foreign trade statistics.

Foreign trade of electric energy comprises the financial settlements (incl. some special cases) and is shown throughout in 1 000 kwh.

- 4 In **Table 6** only those countries for which the reported value of imports or exports was at least \$ 30 000 are presented under the individual groups.

Table 7 which is given only in the fourth quarter volume presents under the various countries merely those groups of the SITC, for which the reported value for imports or exports was at least \$ 30 000 in the year concerned.

The values published in terms of \$ 1 000 have been subsequently calculated for imports and exports from the DM values. The following conversion rates have been used for this purpose:

- 5 The **data on countries** relate to the countries of production and the countries of consumption. The designations of the countries are abbreviated. A detailed list of all countries is included in this publication.

- 6 For information concerning the method used for calculating the **volume** and the **indices** see the article entitled „Neuberechnung
