1 General explanations

1.1 Legal foundations

The legal foundations of foreign trade statistics are:

- Law on Statistics for Federal Purposes (Statistical Law) of 14 March 1980 (Bundesgesetzblatt I p. 289),
- Law on Statistics on Frontier Crossing Goods Traffic (Foreign Trade Statistics - Law on Foreign Trade Statistics) of 1 May 1957 (Bundesgesetzblatt I p. 413) as amended by Art. 9 of the 1st Law on the Adjustment of Statistics of 14 March 1980 (Bundesgesetzblatt I p. 294),
- Ordinance for the Implementation of the Law on Statistics on Frontier Crossing Goods Traffic (Foreign Trade Statistics - Executory Ordinance for Foreign Trade Statistics) in the version of 14 July 1977 (Bundesgesetzblatt I p. 1281) as amended by Art. 24 of the 1st Law on the Adjustment of Statistics of 14 March 1980 (Bundesgesetzblatt I p. 294).

1.2 Subject-matter

The subject-matter of foreign trade statistics of the Federal Republic of Germany is the frontier crossing goods traffic of the statistical territory with foreign countries.

For purposes of foreign trade statistics, foreign countries include all territories outside the statistical territory and outside the German Democratic Republic and Berlin (East).

The goods traffic between the statistical territory and the German Democratic Republic and Berlin (East) is presented in separate statistics and is not included in foreign trade statistics.

1.3 Statistical territory

The statistical territory of foreign trade statistics comprises the Federal Republic of Germany (excl. the customs exclave of Büsingen) incl. Berlin (West) and the Austrian communities of Jungholz and Mittelberg (as customs enclaves).

1.4 Declaration

The results of foreign trade statistics are generally based on the data provided by importers and exporters. The declaration for purposes of foreign trade statistics is as a rule effected using the forms "Einfuhranmeldung" (Import declaration) and "Ausfuhrerklärung zugleich Ausfuhranmeldung" (Notification of exports and export declaration).

1.5 Trade system

The frontier crossing goods traffic is shown in foreign trade statistics as general trade (see Section 3), as special trade and as transit (only transhipment and transit entering and leaving by sea; see Series 6). Special trade essentially comprises those commodities which entered the statistical territory for use, consumption, working or manufacturing, or which, respectively, originated from production, working or manufacturing in the statistical territory and have been exported.

2 Special trade

2.1 The data of the present publication relate to special trade which comprises

2.1.1 in imports

- the direct importation of goods into free circulation, for inward processing under customs control ("Eigenveredelung" - processing of goods by Germans for German account - and "Lohnveredelung" - processing of goods by Germans for foreign account), after outward processing under customs control, and also repair trade,
- the importation of foreign goods leaving customs warehouses into the above mentioned types of imports; as warehouses in the meaning of foreign trade statistics are considered free port stores and customs storage warehouses (incl. open customs storage warehouses), as well as some special cases.

2.1.2 in exports

the exportation of goods from free circulation, after customs-approved inward processing ("Eigenveredelung" - processing of goods by Germans for German account - and "Lohnveredelung" - processing of goods by Germans for foreign account), for customs-approved outward processing, and also repair trade.

2.2 Ships' and aircraft stores

As ships' and aircraft stores are shown in special trade the delivery of foreign goods leaving customs warehouses for the needs of outward-bound German sea-going vessels and aircraft (as imports), as well as the delivery of goods from free circulation and inward processing for the needs of outward-bound foreign ships and aircraft (as exports). Included among ships' and aircraft stores as imports is also the delivery of foreign goods leaving customs warehouses for the supply of German sea-going ships and aircraft in foreign ports/airports. The relevant data are included in the types of importation and/or exportation mentioned in Section 2.1.1 and 2.1.2, respectively.

2.3 Exemptions and simplifications

The results of foreign trade statistics do not comprise goods and transport operations which according to Art. 31 of the Ordinance for the Implementation of the Law on Statistics on Frontier Crossing Goods Traffic (AHStatDV) are exempted from declaration, such as since spring 1980 shipments of industrial goods of a value of up to DM 500 inclusive (previously since 1974 = DM 300) and of food and agricultural goods of a value of up to DM 100 inclusive (previously since 1974 = DM 50), provided the weight of the shipment is not exceeding 1,000 kg; presents of a value of DM 500 inclusive per shipment; silver and gold for international payments; diplomatic and consular goods.

Not included either are goods imported or exported by the foreign armed forces stationed in the Federal Republic of Germany.

2.4 Reference month

As far as the presentation of foreign trade as special trade is concerned, direct imports and exports are generally shown in the month they crossed the border, while importations of goods entering customs warehouses, on the other hand, are shown only at the time of their importation from customs warehouses. Due to unavoidable delays in the submission of the declaration, and also because of the necessity to clear up doubtful items, it is possible to some, though a rather small extent that imports and exports are shown in a later reporting period. On the other hand, the export figures may also comprise shipments which, with the combined shipping procedure, with the simplified combined shipping procedure by railway or with the TIR procedure, have not yet left the statistical territory.

2.5 Commodity classifications

The grouping of commodities is shown according to the Standard International Trade Classification, Revision 2 (abbreviated title: SITC-Rev. II; Statistical Papers, Series M, No. 34/Rev. 2).

According to a decision of the Council of the European Communities taken on 9 December 1975 (75/767 EEC), this revised version of the SITC will be used in the member countries as of January 1978. It replaces the first revised 1961 version of the Standard International Trade Classification (SITC, Revised).

As against the first revised version, the SITC-Rev. II contains numerous changes and, in part, considerable extensions and has also been reconciled with the Nomenclature of the Customs Cooperation Council - CCCN - (formerly "Brussels Tariff Nomenclature") in such a manner that the smallest components (5 - digit SITC - positions) are corresponding to the tariff numbers of this nomenclature, or parts of such tariff numbers.

Details concerning the allocation of commodities can be seen from a correlation of the positions of the SITC-Rev. II with the Commodity Classification for Foreign Trade Statistics which can be obtained as a special print direct from the Federal Statistical Office, Postfach 55 28, D-6200 Wiesbaden 1. This correlation is further published as Annex 1 in the annual issue of Series 1 of Subject - Matter Series 7.

In the present report, the figures shown are for all reporting periods presented according to the new version of the SITC-Rev. II.

For many items the commodity descriptions have been abbreviated. The complete wording can be seen from the original version of the SITC, Rev. II, of the United Nations.

Deviating therefrom, postal packages (911) are classified in German foreign trade statistics according to their contents. Gold coins are covered by group 972; other coins (961) used as legal tender are not contained in the figures of foreign trade statistics.

Foreign Trade of electric energy comprises the financial settlements (incl. some special cases) and is shown throughout in Mwh.

2.6 Presentation

In Table 6 only those countries for which the reported value of imports or exports was at least $ 30,000 are presented under the individual groups.

Table 7 presents under the various countries merely those groups of the SITC, for which the reported value for imports or exports was at least $ 30,000 in the year concerned.

2.7 Partner countries

The "Alphabetic Index of Countries for Foreign Trade Statistics" as of January 1982 includes altogether 194 countries or areas, respectively. A detailed list of all countries is included in this publication.

With regard to imports, that country is shown as the country of production where goods were produced (country of origin), where the goods either were entirely extracted or manufactured, or where they underwent their last essential and economically justified working or stage of manufacture. There apply the conceptual definitions of Articles 4 to 7, Par. 1, of the Ordinance (EEC) No. 802/68 of the Council of 27 June 1968 (OJEurCom., No. L 148, p. 1). As far as exports are concerned, that country is shown as the country of consumption (country of destination), in which the goods are to be used or consumed, worked or transformed.

2.8 Quantities

The quantity data (deciton - dt = 100 kg) refer to the net weight of the goods, or the net weight incl. retail packaging, respectively.

2.9 Values

The values are presented in DM 1,000 and in $ 1,000. As a general principle, they relate to the value free at border which, independently of the currency shown on the invoice, must always be declared and recorded in DM. This is the value free at border of the statistical territory, and, as far as imports are concerned, the duties on entry are excluded. In the case of exportation or importation after processing, always the full value of the goods including processing and distribution costs is shown.

The values published in $ 1,000 have been subsequently computed for imports and exports from the DM values. For this purpose, the following conversion rates were applied:

Deviations from the specific conversion ratio may be due to rounding of the partial figures of which the figures shown here are composed.

2.10 Volume

In contrast to the current values, the volume represents a value which is computed subsequently. It is ascertained by valuing, for each commodity number and group of countries, the quantity declared for the reference month with the 1976 unit value for each commodity number and group of countries (value per quantity unit). The volume therefore is the value which would have emerged if the unit values (prices) of 1976 would have remained unchanged in the reporting periods shown. Reference in this connection is made to the article entitled "Neuberechnung des Außenhandelsvolumens und der Außenhandelsindizes auf Basis 1976" (New computation of the foreign trade volume and the foreign trade indices, base 1976) in "Wirtschaft und Statistik", No. 1/1979, p. 36 ff.

2.11 Publications and information service

Rather detailed figures of foreign trade statistics are being published in Series 2 to 8 and S of Subject-Matter Series 7, entitled "Außenhandel" (Foreign trade).

Moreover, figures of still greater detail may be obtained against reimbursement of costs in the form of table extracts from the Federal Statistical Office, P.O.B. 5528, D-6200 Wiesbaden 1. Out of the great number of possible tabulations, the following should be mentioned:

- Imports and exports by commodity numbers, countries of production and of consumption, types of imports and of exports,
- Imports by code numbers, countries of production and types of imports,
- Imports/exports by countries of purchase/sale and by countries of production/consumption, as well as by commodity subgroups of food industry and the industrial economy,
- Imports entering customs warehouses, imports leaving customs warehouses and exports leaving customs warehouses by commodity numbers and countries,
- Imports according to branches of transport, border sections, countries of production and commodity subgroups of food industry and industrial economy.

A detailed description of the methodology of foreign trade statistics is contained in the publication "Außenhandel und Statistik" (Foreign Trade and Statistics) of the series "Zahl und Leben" (Figures and Life), No. 7, also published by Messrs. W. Kohlhammer.
