x	=	Tabular group blocked, information not meaningful
n.e.s.	=	Not elsewhere stated

Introduction

1 General explanations

1.1 Legal bases

Foreign trade statistics are based especially on the following legislation:

- Law on Statistics for Federal Purposes (Federal Statistics Law - BStatG) of 22 January 1987 (Federal Law Gazette, Part I, pp. 462, 565) last amended by Article 6, para. 36 of the Law of 27 December 1993 (Federal Law Gazette, Part I, p. 2378)
- Law on Statistics on Cross-Border Trade in Goods (Foreign Trade Statistics Law - AHStatGes) adjusted as published in Federal Law Gazette, Part III, item 7402-1 of 1 May 1957, last amended by Article 3 of the Law of 19 December 1997 (Federal Law Gazette, Part I, p. 3158).
- Ordinance for the Implementation of the Law on Statistics on Crossing-Border Trade in Goods (Foreign Trade Statistics - Implementing Ordinance) as published on 29 July 1994 (Federal Law Gazette, Part I, p. 1993), last amended by Article 4 of the Law of 19 December 1997 (Federal Law Gazette, Part I, p. 3158).
- Council Regulation (EC) No 1172/95 of 22 May 1995 on statistics relating to the Trading of goods of the Community and its Member States with Third Countries (OJ no L 118, 1995, p. 10)
- Council Regulation (EEC) No 3330/91 of 7 November 1991 on the statistics relating to the trading of goods between Member States (OJ no L 316, 1991, p. 1)
- Commission Regulation (EEC) No 3046/92 of 22 October 1992 laying down provisions implementing and amending Council Regulation (EEC) No 3330/91 (OJ no L 307, 1992, p. 27)
- Regulation (EC) No 840/96 of 7 May 1996 for the Implementation of Council Regulation (EC) No 1172/95 concerning external trade statistics (OJ no L 114, 1996, p. 7)

1.2 Subject

The subject of the foreign trade statistics of the Federal Republic of Germany is the cross-border trading of goods of the statistical territory with other countries. Other countries in the sense of foreign trade statistics are territories other than the statistical territory.

In line with the different forms of data collection, the German foreign trade statistics have been

broken down into statistics of intra-Community trade (trade with EU Member States) and extra-Community (trade with nonmember countries) since 1993.

1.3 Statistical territory

For the purpose of foreign trade statistics, the statistical territory covers the Federal Republic of Germany (without the Büsingen customs area).

1.4 Declaration

The results of foreign trade statistics are generally based on the data provided by importers and exporters. The declaration for purposes of foreign trade statistics is a rule effected using the forms „Einfuhranmeldung“ (Import declaration) and „Ausfuhrerklärung zugleich Ausfuhranmeldung“ (Notification of exports and export declaration).

1.5 Trade system

The frontier crossing goods traffic is shown in foreign trade statistics as general trade and as special trade. Special trade essentially comprises those commodities which entered the statistical territory for use, entirely, originated from production, working or manufacturing in the statistical territory and have been exported.

2 Special trade

2.1 The data of the present publication relate to special trade which comprises

2.1.1 in imports

- the direct importation of goods into free circulation, for inward processing under customs control („Eigenveredelung“ - processing of goods Germans for German account - and „Lohnveredelung“ - processing of goods by Germans for foreign account), after outward processing under customs control, and also repair trade,
- the importation of foreign leaving customs warehouses into the above mentioned types of imports; as warehouses in the meaning of foreign trade statistics are considered free port storage warehouses, as well as some special cases.

2.1.2 in exports

- the exportation of goods from free circulation, after customs-approved inward processing („Eigenveredelung“ - processing of goods by Germans for German account - and „Lohnveredelung“ - processing of goods by Germans for foreign account), for customs-approved

outward processing, and also repair trade.

2.2 Ships` and aircraft stores

As ships` and aircraft stores are shown in special trade the delivery of foreign goods leaving customs warehouses for the needs of outward-bound German seagoing vessels aircraft (as imports), as well as the delivery of goods from free circulation and inward processing for the needs of outward-bound foreign ships and aircraft stores as imports is also the delivery of foreign goods leaving customs warehouses for the supply German seagoing ships and aircraft in foreign ports/airports. The relevant data are included in the types of importation and/or exportation mentioned in Section 2.1.1 and 2.1.2 respectively.

2.3 Exemptions and simplifications

As regards intra-Community trade statistics (trade in goods with the Member States of the European Union), all private individuals are as a rule exempted from the obligation to provide information. This exemption also applies to respondents whose annual dispatches to or arrivals from other EU Member States (intra-Community trade) did not exceed the statistical value of DM 200.000 in the preceding or in the current year. With respect to extra-Community trade statistics (trade in goods with countries outside the European Union), consignment of goods to a value of less than DM 1.600 are - with few exceptions - exempted from declaration.

From reference month January 1995, the aforementioned exemptions have been included in the form of estimates in foreign trade results. However, foreign trade results for the years before 1995 do not include estimates for exemptions.

Besides, goods that are imported or exported by foreign armed forces deployed in the Federal Republic of Germany are not included either.

2.4 Reference month

As far as the presentation of foreign trade as special trade is concerned, direct imports and exports are generally shown in the month they crossed the border, while importations of goods entering customs warehouses, on the other hand, are shown only at the time of their importation from customs warehouses. Due to unavoidable delays in the submission of the declaration, and also because of the necessity to clear up doubtful items, it possible to some, though a rather small extent that imports and exports are shown in a later reporting period. On the other hand, the export figures may also comprise shipments which, with the combined shipping procedure, with the simplified combined shipping procedure by railway or with the TIR procedure, have not yet left the statistical territory.

2.5 Commodity classification

The grouping of commodities is shown according to the Standard International Trade Classification, Revision 3 (abbreviated title: SITC-Rev. 3; Statistical Papers. Series M, No. 34/Rev. 3).

According to a decision of the Council of the European Communities taken on 9 December 1985 (75/767 EEC), this revised version of the SITC will be used in the member countries as of January 1978. It replaces the first revised 1961 version of the Standard International Trade Classification (SITC, Revised).

As against the first revised version, the SITC-Rev. 3 contains numerous changes and, in part, considerable extension and has also been reconciled with the Nomenclature of the Customs Cooperation - CCCN - (formerly „Brussels Tariff Nomenclature“) in such a manner that the smallest components (5 - digit SITC - positions) are corresponding to the tariff numbers of the nomenclature, of parts of such tariff numbers.

Details concerning the allocation of commodities can be seen from a correlation of the positions of the SITC-Rev. 3 with the Commodity Classification for Foreign Trade Statistics which can be obtained as a special print direct from the Federal Statistical Office, Postfach 55 28, D-65180 Wiesbaden. This correlation is further published as Annex 1 in the annual issue of Series 1 of Subject - Matter Series 7.

In the present report, the figures shown are for all reporting periods presented according to the new version of the SITC-Rev. II.

For many items the commodity description have been abbreviated. The complete wording can be seen from the original version of the SITC, Rev. II, of the United Nations.

Deviating therefrom, postal packages (911) are classified in German foreign trade statistics according to their contents. Gold coins are covered by group 972; other coins (961) used as legal tender are not contained in the figures of foreign trade statistics.

Foreign Trade of electric energy comprises the financial settlements (incl. some special cases) and is shown throughout in Mwh.

Seen also the article „Neue Warennomenklaturen für die Außenhandelsstatistik ab 1988“ (New nomenclatures of goods for foreign trade statistics in „Wirtschaft und Statistik“) No. 5/1987, p. 396 ff. -

2.6 Presentation

In Table 6 only those Countries for which the reported value of imports or exports was at least \$ 30.000 are presented under the individual groups. Table 7 presents under the various countries merely those groups of the SITC, for which the reported value for imports or exports was at least \$ 30.000 in the year concerned.

Where the country of origin is not known, it will be replaced by the country of consignment. The country of consignment is the country from which the goods were shipped into the statistical territory without being subjected to consecutive stays or legal operations in the countries of transit other than those in connection with their shipment.

With regard to exports, that country is shown as the country of destination in which the goods shall be used or consumed, worked or manufactured. Were the country of destination is not known, it will be the last known country into which the goods are to be shipped that will be considered as the country of destination.

2.7 Partner countries

Since January 1997, the „Alphabetic Index of Countries for Foreign Trade Statistics“ has included 221 countries and areas (see annex).

With regard the imports the country of origin is represented, i.e. the country in which the goods were entirely obtained or produced or underwent their final, essential economically justified treatment or processing. There apply the definitions of Title II, Chapter 2 of Council Regulation (EEC) No. 2913/92 of 12 October 1992 (OJ no L 302 p. 1). If the country of origin is unknown, the country of dispatch is used instead. The country of dispatch is the country from which the goods were routed to the statistical territory without any halt or legal transaction not connected with their transport having occurred in a country of transit.

With regard to exports the country of destination is represented, i.e. the country in which the goods are to be used/consumed or treated/processed. If the country of destination is unknown, it is considered to be the last country to which it is known that the goods are to be routed.

2.8 Quantities

The quantity data (deciton - dt = 100 kg) refer to the net weight incl. retail packaging, respectively.

2.9 Values

The Values are presented in DM 1.000 and in \$ 1.000. As a general principle, they relate to the

value free at border which, independently of the currency shown on the invoice, must always be declared and recorded in DM. This is the value free at border of the statistical territory, and, as imports are concerned, the duties on entry are excluded. In the case of exportation or importation after processing, always the full value of the goods including processing and distribution costs in shown.

The values published in \$ 1.000 have been subsequently computed for imports and exports from the DM values. For this purpose, the following conversion rates were applied:

As from year month	DM for 1 US-\$	As from year month	DM for 1 US-\$
1992		1993	
January	1,58	January	1,62
February	1,62	February	1,64
March	1,67	March	1,65
April	1,65	April	1,60
May	1,62	May	1,61
June	1,58	June	1,65
July	1,49	July	1,71
August	1,45	August	1,70
September	1,44	September	1,62
October	1,48	October	1,64
November	1,59	November	1,70
December	1,58	December	1,71
1994		1995	
January	1,74	January	1,53
February	1,74	February	1,50
March	1,69	March	1,41
April	1,70	April	1,38
May	1,66	May	1,41
June	1,63	June	1,40
July	1,57	July	1,39
August	1,56	August	1,45
September	1,56	September	1,46
October	1,52	October	1,41
November	1,54	November	1,42
December	1,57	December	1,44
1996		1997	
January	1,46	January	1,60
February	1,47	February	1,67
March	1,53	March	1,70
April	1,51	April	1,71
May	1,53	May	1,70
June	1,53	June	1,73
July	1,51	July	1,79
August	1,48	August	1,84
September	1,51	September	1,79
October	1,53	October	1,76
November	1,51	November	1,73
December	1,55	December	1,78

Deviation from the specific conversion ratio may be due to rounding of the partial figures of which the figures shown here are composed.

2.10 Volume, indices, terms of trade

The volume is determined by multiplying the quantity of the reference month (per commodity number and group of countries) which the unit value of the base year (per commodity number and group of countries). The required base with values are calculated by dividing the actual values of the base year (commodity number and group of countries) by the relevant quantities. The volume indicates what the imports/exports would have been the reference period if the unit values of the base year had remained constant.

The current value index shows the development of the nominal values as related to the base period. The volume index (according to Laspeyres) represents the development of foreign trade, adjusted for changes of the unit value. The unit value index (according to Paasche) informs about the movement of import and export unit values on the basis of the frontier crossing values. The terms of trade indicate how the purchasing power of an export unit, as measured in import units, has changed against the base year.

Index formulae:

Index der tatsächlichen Werte:

$$V_{o,n} = \frac{\sum p_n \cdot q_n}{\sum p_o \cdot q_o} \cdot 100$$

Index des Volumens:

(nach Laspeyres)

$$Q_{o,n} = \frac{\sum p_o \cdot q_n}{\sum p_o \cdot q_o} \cdot 100$$

Index der Durchschnittswerte:

(nach Paasche)

$$P_{o,n} = \frac{\sum p_n \cdot q_n}{\sum p_o \cdot q_n} \cdot 100$$

Terms of Trade:

(reales Austauschverhältnis)

$$ToT = \frac{P_{o,n}^{(x)}}{P_{o,n}^{(m)}} \cdot 100$$

See in this connection the article: „Neuberechnung von Außenhandelsvolumen und -indizes auf Basis 1991“ in „Wirtschaft und Statistik“, No. 6/1998 p. 465 ff.

2.11 Publications and information service

Rather detailed figures of foreign trade statistics are being published in Series 2 to 8 and S of Subject-Matter Serie 7, entitled „Außenhandel“ (Foreign trade).

Moreover, figures of still greater detail may be obtained against reimbursement of costs in the form of table extracts from the Federal Statistical Office, P.O.B. 5528, D-65180 Wiesbaden. Out of the great number of possible tabulations, the following should be mentioned:

Imports and exports by commodity number, countries of origin and of destination, types of imports and of exports,

Imports by code numbers, countries of origin and types of imports,

Imports/exports by sections, divisions, groups, sub-groups or items of the SITC and countries of origin/destination,

Imports/exports by trading countries and by countries of origin/destination as well as by commodity subgroups of food industry and the industrial economy,

Imports entering customs warehouses, imports leaving customs warehouses and exports leaving customs warehouses by commodity numbers and countries,

Imports according to branches of transport, border sections, countries of origin and of destination as well as commodity of food industry and the industrial economy.

A detailed description of the methodology of foreign trade statistics is contained in the publication „Außenhandel und Statistik“ (Foreign Trade and Statistics) of the series „Zahl und Leben“ (Figures and Life), No. 7 also published by Messrs. W. Kohlhammer.

See also the article „Methodische, systematische und anmeldetechnische Änderungen in der Außenhandelsstatistik ab 1988“ (Changes of methodology, classification and declaration techniques in foreign trade statistics as from 1988) in „Wirtschaft und Statistik“, No. 10/1986, p. 773 ff.

3 Notes

The figures for 1997 are definite results. For the results of earlier reference periods always applies the „Introductory Note“ (Vorbemerkung) of the relevant report. „The figures include trade with other Member-States which can be published in Breakdown by Partner Country“.

**2 Index of Current Value, Volume and Average Value of Imports and Exports
(Special Trade) by Sections of the SITC - Rev. 3**

1991 = 100

2.1 Total

Year Quarter	Imports										
	Total	Section									
		0 Food and live animals	1 Beverages and tobacco	2 Crude materials, inedible	3 Mineral fuels, lubricants etc.	4 Animal and vegetable oils and fats	5 Chemicals	6 Manu- factured goods classified chiefly by material	7 Machinery and transport equipment	8 Miscella- neous manu- factured articles	9 Commodities and trans- actions not classified acc. to kind 1)

Amtliche Statistik -

Ein konstitutives Element
des demokratischen Staates

161 Seiten, DIN A 4
Kart., DM 28,80, EUR 14,73
Bestell-Nr. 1011100 - 99900

Die Statistischen Ämter des Bundes und der Länder haben diese Veröffentlichung gemeinsam als Festschrift zum 50jährigen Bestehen der Bundesrepublik Deutschland herausgegeben. Der Band enthält die Vorträge und die Podiumsdiskussion des gleichnamigen siebten wissenschaftlichen Kolloquiums, das im November 1998 im Statistischen Bundesamt in Kooperation mit der Deutschen Statistischen Gesellschaft stattfand. Die Autoren, u.a. aus Politik und Wissenschaft, beleuchten in ihren Beiträgen die amtliche Statistik aus den verschiedensten Blickwinkeln, so daß sich ein vielschichtiges Bild von ihrer Funktion in der Gesellschaft ergibt. Die Beiträge sind nicht nur vergangenheitsbezogen sondern öffnen den Blick für zukünftige Entwicklungen und Anforderungen an die amtliche Statistik. Der Band schließt mit einem illustrierten historischen Rückblick auf 50 Jahre amtliche Statistik als wichtiger Bestandteil eines demokratischen Staates und des europäischen Integrationsprozesses.
