M = männlich

W = weiblich

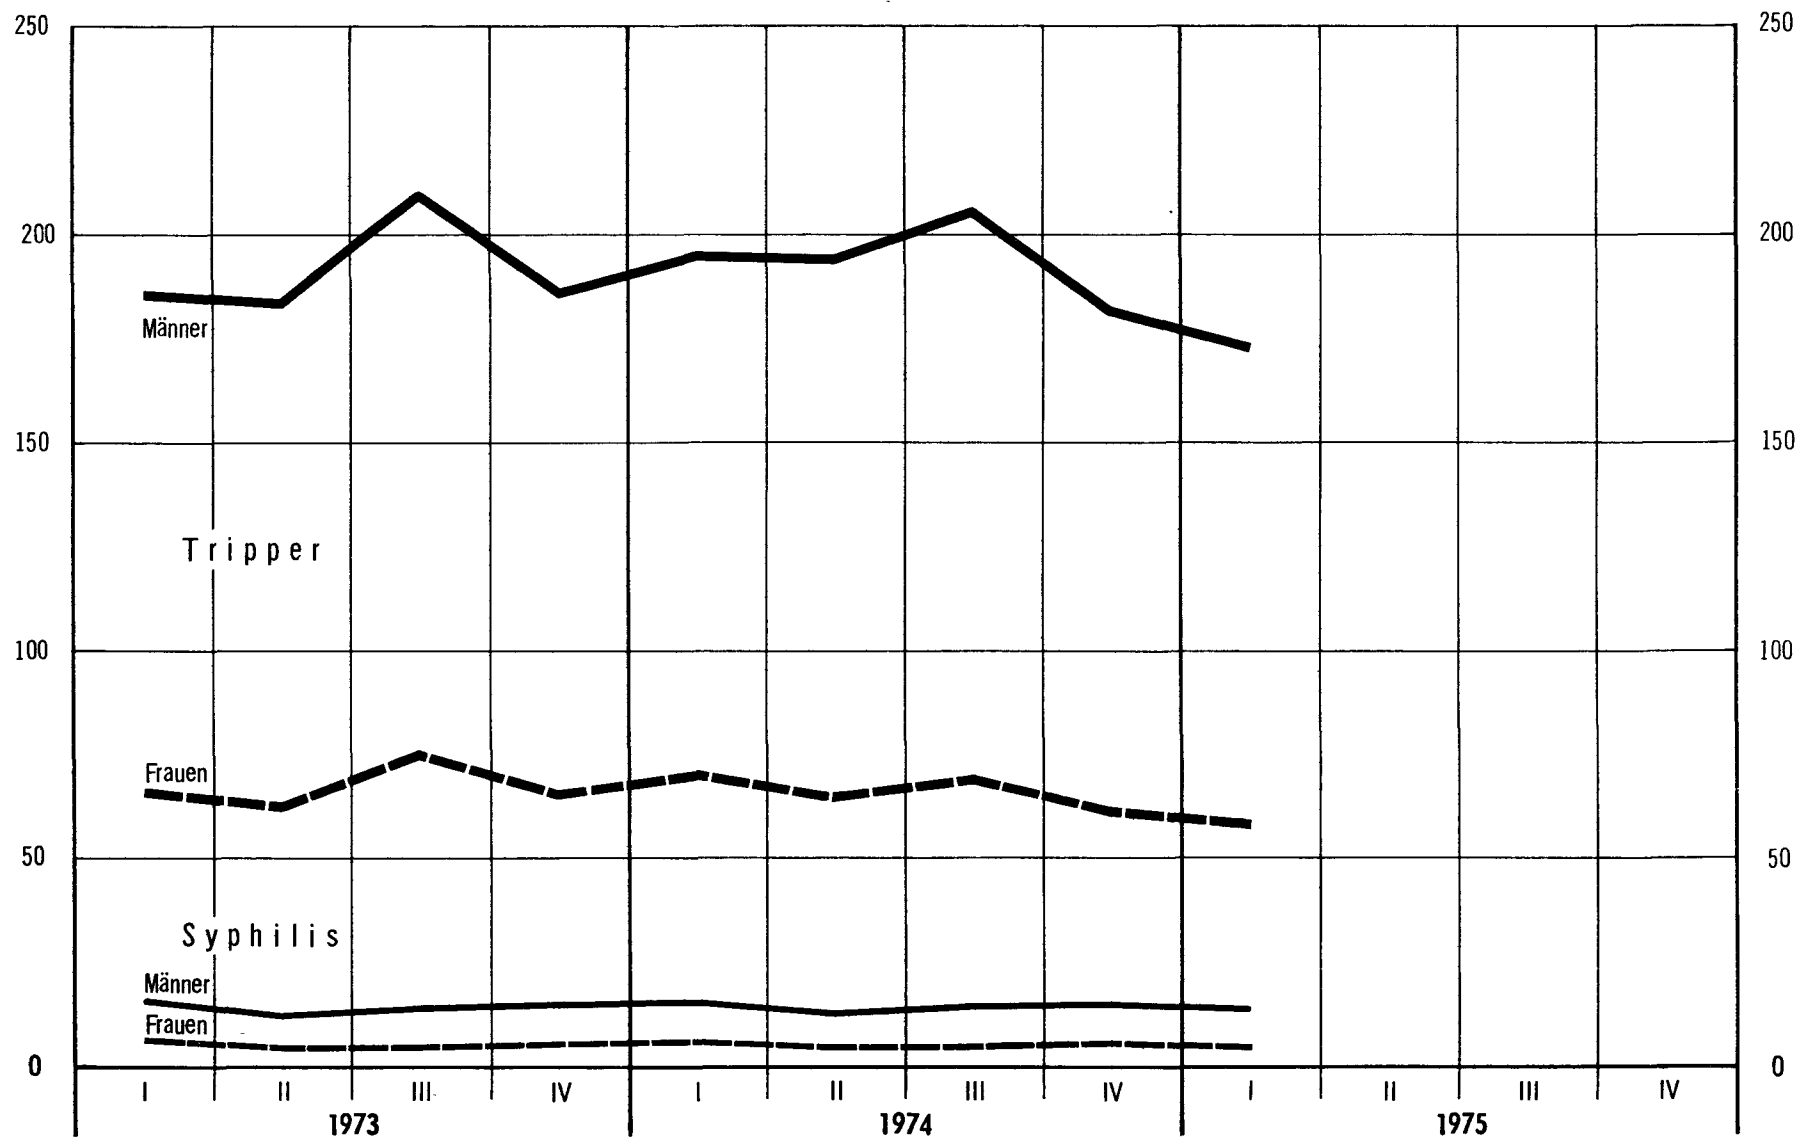

Vorbemerkung

Das Gesetz zur Änderung des Gesetzes zur Bekämpfung der Geschlechtskrankheiten vom 25. August 1969 (BGBl. I S. 1351) hat durch Einfügen des § 11 a in das Gesetz zur Bekämpfung der Geschlechtskrankheiten vom 23. Juli 1953 (BGBl. I S. 700) die Durchführung einer Bundesstatistik über die ansteckungsfähigen Erkrankungen an Geschlechtskrankheiten angeordnet. Danach ist jeder Fall einer Erkrankung an einer Geschlechtskrankheit von dem behandelnden oder sonst hinzugezogenen Arzt unverzüglich ohne Nennung des Namens und der Anschrift des Erkrankten dem Gesundheitsamt zu melden, in dessen Bezirk der Arzt seine ärztliche Tätigkeit ausübt. Dabei sind u.a. Geburtsdatum, Geschlecht, Familienstand und Art der Erkrankung wie Syphilis (Lues), Tripper (Gonorrhoe), weicher Schanker (Ulcus molle) und venerische Lymphknotenentzündung (Lymphopathia venerea syn. Lymphogranuloma inguinale) anzugeben, desgleichen die Zahl und Art früherer Erkrankungen. Der Meldeweg geht vom Arzt über das Gesundheitsamt bzw. vom Truppenarzt über den Standortarzt und das Sanitätsamt der Bundeswehr zum Statistischen Landesamt und von dort an das Statistische Bundesamt, wo die zentrale maschinelle Aufbereitung für alle Länder außer Nordrhein-Westfalen und Bayern erfolgt und auch die Koordinierung und Zusammenstellung der Ergebnisse vorgenommen wird. Die Ergebnisse werden vierteljährlich und jährlich veröffentlicht.

Die vierteljährlichen Ergebnisse sind gegliedert nach Alter, Geschlecht, Familienstand, Art der Erkrankung und Mehrfachinfektion (bei gleichzeitigem Vorliegen und mehr als einer Geschlechtskrankheit); die jährlichen enthalten darüber hinaus u.a. statistische Angaben über frühere Erkrankungen an Geschlechtskrankheiten.

GEMELDETE ERKRANKTE AN AUSGEWÄHLTEN GESCHLECHTSKRANKHEITEN

Auf 100 000 Einwohner und 1 Jahr

1 Gemeldete Erkrankte an ausgewählten Geschlechtskrankheiten
