## **Vorbemerkung**

Seit dem Berichtsjahr 1990 werden die Jahreskorrekturen der Indizes in einem gesonderten Jahresheft der Fachserie 4, Reihe 2.2 veröffentlicht.

Die vorliegende Publikation enthält die endgültigen Ergebnisse der Auftragseingangs- und Umsatzindizes für das Verarbeitende Gewerbe für das Jahr 2001 auf der Basis 1995 = 100 nach der neuen "Klassifikation der Wirtschaftszweige, Ausgabe 1993 (WZ 93)".

## Einführung

Auftragseingangsindizes für das Verarbeitende Gewerbe sind **Frühindikatoren** zur Analyse der Konjunkturentwicklung in den Bereichen des Produzierenden Gewerbes. Mit Berichtsmonat Mai 1998 sind die Indizes auf das Basisjahr 1995 = 100 umgestellt worden.

Rechtsgrundlagen für die Datenerhebung sind:

- Gesetz über die Statistik im Produzierenden Gewerbe (ProdGewG) in der Fassung der Bekanntmachung vom 30. Mai 1980 (BGBl. I S. 641), zuletzt geändert durch Artikel 1 des Gesetzes vom 6. August 1998 (BGBl. I S. 2036).
- Artikel 2 § 3 der Verordnung zur Änderung statistischer Rechtsvorschriften (Statistikbereinigungsverordnung) vom 14. September 1984 (BGBl. I S. 1247),
- Gesetz über die Statistik für Bundeszwecke (Bundesstatistikgesetz – BStatG) vom 22. Januar 1987 (BGBl. I S. 462, 565), zuletzt geändert durch Artikel 2 des Gesetzes vom 16. Juni 1998 (BGBl. I S. 1300).

Die Erhebung der Daten erfolgt durch die Statistischen Landesämter, die Indexberechnungen werden vom Statistischen Bundesamt durchgeführt.

Die Darstellung der Methoden der Indexberechnung ist in der Zeitschrift "Wirtschaft und Statistik", Heft 5/1998, S. 386 ff erschienen. Rückgerechnete Ergebnisse für den Berichtszeitraum 1991 bis 1996 sind in einem Sonderheft der Fachserie 4, Reihe S. 16, veröffentlicht.

Indizes des Auftragseingangs und des Umsatzes für das Verarbeitende Gewerbe

Auftragseingang und Umsatz im Verarbeitenden Gewerbe werden im Rahmen des Monatsberichts für Betriebe im Verarbeitenden Gewerbe (einschl. Bergbau und Gewinnung von Steinen und Erden) erhoben. Der **B e r i c h t s - k r e i s** umfasst Betriebe des Verarbeitenden Gewerbes (einschl. Bergbau und Gewinnung von Steinen und Erden) von Unternehmen des Produzierenden Gewerbes mit im allgemeinen 20 oder mehr Beschäftigten sowie Betriebe des Verarbeitenden Gewerbes (einschl. Bergbau und Gewinnung von Steinen und Erden) mit im allgemeinen 20 oder mehr Beschäftigten von Unternehmen außerhalb des Produzierenden Gewerbes. Auftragseingang und Umsatz werden in der Gliederung der "Klassifikation der Wirtschaftszweige, Ausgabe 1993 (WZ 93)" nach fachlichen Betriebsteilen erfasst und ausgewertet. Dabei ist zu beachten, daß in der Auftragseingangsstatistik nicht alle Bereiche des Verarbeitenden Gewerbes erfaßt werden, sondern daß das Ernährungsgewerbe und die Tabakverarbeitung ausgeklammert werden. Zur besseren Vergleichbarkeit wird der Umsatzindex in der gleichen Abgrenzung wie der Auftragseingangindex berechnet.

Neben den Angaben für die Wirtschaftsgliederungen der „Klassifikation der Wirtschaftszweige, Ausgabe 1993 (WZ 93)“ werden auch Ergebnisse für die Hauptgruppen „Vorleistungsgüterproduzenten, Investitionsgüterproduzenten, Gebrauchsgüterproduzenten und Verbrauchsgüterproduzenten“ veröffentlicht. Für die Abgrenzung dieser Hauptgruppen und deren Lieferung an Eurostat fehlte jedoch bisher eine verbindliche Rechtsgrundlage.

Mit der „Verordnung (EG) Nr. 586/2001 der Kommission vom 26. März 2001 zur Durchführung der Verordnung (EG) Nr. 1165/98 des Rates über Konjunkturstatistiken: Definition der

industriellen Hauptgruppen (MIGS)“ werden diese Hauptgruppen neu abgegrenzt. Ferner wird eine fünfte Hauptgruppe „Energie“ neu eingeführt. Damit ist jetzt eine EU-weite konsistente Regelung rechtsverbindlich vorgegeben.

Nach Artikel 3 dieser Verordnung ist vorgesehen, dass die Mitgliedstaaten spätestens drei Monate nach deren Inkrafttreten entsprechende Daten übermitteln.

Das Statistische Bundesamt hat die Verordnung für die Auftragseingangs- und Umsatzindizes mit Berichtsmonat Juli 2001 umgesetzt. Gleichzeitig sind die Daten bis 1991 zurück verfügbar, auf Wunsch können diese über den Zeitreihenservice oder direkt bei der Gruppe IV A per E-Mail angefordert werden (Gruppe-IV A@statistik-bund.de).

Diese neugefassten Hauptgruppen werden durch die vollständige Zuordnung der Gruppen der WZ 93 (Dreisteller) gebildet (siehe Tabelle).

Die bisherige Hauptgruppengliederung wurde durch die direkte Zuordnung der vierstelligen Wirtschaftszweige (Klassen der WZ 93) gebildet. Daher waren in manchen Fällen die Viersteller innerhalb eines Dreisteller-Bereichs in verschiedenen Hauptgruppen enthalten. Um die Hauptgruppen vollständig aus den Dreistellern bilden zu können, mussten daher einige Viersteller innerhalb eines dreistelligen Bereichs anders zugeordnet werden. Dies ist aus der angefügten Tabelle ebenfalls ersichtlich.

Wesentliche Auswirkungen ergeben sich durch die Zuordnung des Wirtschaftszweigs „34.10 Herstellung von Kraftwagen und Kraftwagenmotoren“, der nun vollständig der Hauptgruppe „Investitionsgüterproduzenten“ zugerechnet wird (bisher wurde ein Teil der PKW-Produktion schätzungsweise der Hauptgruppe „Gebrauchsgüterproduzenten“ zugewiesen). Ebenfalls von Bedeutung ist der Zweig „34.30 Herstellung von Teilen und Zubehör für Kraftwagen und Kraftwagenmotoren“, der vom Vorleistungsbereich in den Investitionsgütersektor wechselt. Wichtig ist auch die Umsetzung der Gruppen „22.2 Druckgewerbe“ und „22.3 Vervielfältigung von bespielten Ton- Bild- und Datenträgern“ von den Vorleistungs- zu den Verbrauchsgüterproduzenten. Für die neue Hauptgruppe „Energie“ wird kein Auftragseingangs- und Umsatzindex zur Verfügung gestellt, da die Bereiche, welche die Hauptgruppe Energie bilden, nicht in der Auftragseingangsstatistik erfasst werden.

**Auftragseingang** ist definiert als der Wert (ohne Umsatzsteuer) aller im Berichtsmonat vom Betrieb fest akzeptierten Aufträge auf Lieferung selbst hergestellter oder in Lohnarbeit gefertigter Erzeugnisse.

**Umsatz** ist der Wert (ohne Umsatzsteuer) aller im Berichtsmonat abgerechneten Lieferungen und Leistungen an Dritte.

Die Indizes werden in jeweiligen Preisen als **Wertindizes** und preisbereinigt als **Volumenindizes** berechnet. Zur Ermittlung der Volumenindizes aus den Wertindizes werden Erzeugerpreisindizes für gewerbliche Produkte (Inlands-Auftragseingang und -Umsatz) sowie Preisindizes für die Ausfuhr (Auslands-Auftragseingang und Umsatz) auf der Ebene der Viersteller verwendet. Die Volumenindizes auf höherer Aggregationsstufe sind gewogene Durchschnitte der preisbereinigten Indizes für die Viersteller.

\*) MIGS = Main Industry Groupings.

## Einzelveröffentlichungen

### Zensus im Produzierenden Gewerbe 1979 (7 Hefte)

#### Handwerkszählung vom 31. März 1995

Die Handwerkszählung 1995 war die erste Totalerhebung in diesem Bereich seit 18 Jahren. Gleichzeitig war sie die erste Zählung des Handwerks, die im wiedervereinigten Deutschland durchgeführt wurde. Nach der Auswertung dieser Erhebung liegen nunmehr wieder aktuelle und zuverlässige Strukturdaten über diesen wichtigen Bereich des deutschen Mittelstandes vor. Damit konnte eine bedeutende Datenlücke geschlossen werden. So zeigte die Zählung u. a., dass das Handwerk einen wesentlich größeren Stellenwert besitzt, als die bisherigen Daten vermuten ließen. In der öffentlichen Diskussion ist dies bereits auf eine breite Resonanz gestoßen.

Die Ergebnisse der Handwerkszählung 1995 werden auf Diskette und in drei Sonderheften innerhalb der Fachserie 4 veröffentlicht:

### Heft 1: Ergebnisse für Unternehmen und Nebenbetriebe nach Gewerbebezweigen

Enthält u. a. Angaben über Beschäftigte, Umsatz, Umsatzarten und Absatzrichtung nach Beschäftigten- und Umsatzgrößenklassen, Daten über Beschäftigte und Umsatz nach Ländern sowie Ergebnisse der Handwerkszählungen 1977 und 1995 im Zeitvergleich.

### Heft 2: Ergebnisse für Unternehmen und Nebenbetriebe nach Gewerbebezweigen

– Beschäftigte nach ihrer Stellung im Unternehmen, Löhne, Gehälter und gesetzliche Sozialkosten

Enthält u. a. Angaben über Beschäftigte nach ihrer Stellung im Unternehmen, Umsatz, Löhne, Gehälter und gesetzliche Sozialkosten nach Beschäftigten- und Umsatzgrößenklassen.

### Heft 3: Ergebnisse für Unternehmen und Nebenbetriebe nach ausgewählten Wirtschaftszweigen der Klassifikation der Wirtschaftszweige, Ausgabe 1993

Enthält u. a. Angaben über Beschäftigte nach ihrer Stellung im Unternehmen, Umsatz, Umsatzarten, Absatzrichtung, Löhne, Gehälter und gesetzliche Sozialkosten nach Beschäftigten- und Umsatzgrößenklassen.

### Zählung im handwerksähnlichen Gewerbe vom 31. März 1996

Die Zählung im handwerksähnlichen Gewerbe 1996 war die erste Totalerhebung in diesem Bereich. Nach der Auswertung der Erhebung liegen nunmehr erstmals aktuelle und zuverlässige Informationen über diesen überwiegend kleingewerblich strukturierten Bereich vor. Die Bundesergebnisse aus dieser Zählung werden in einem Sonderheft innerhalb der Fachserie 4 sowie auf Diskette zur Verfügung gestellt.

### „Ausgewählte Zahlen für die Bauwirtschaft“

*Monatliche Querschnittsveröffentlichung* mit den Hauptteilen Baugewerbe und Bautätigkeit sowie mit ausgewählten Daten aus zahlreichen anderen Sachgebieten.

### „Ausgewählte Zahlen zur Energiewirtschaft“

*Monatliche und jährliche Querschnittsveröffentlichungen* über Aufkommen und Verwendung von festen, flüssigen und gasförmigen Brennstoffen sowie Elektrizität. Preisindizes und Preise für ausgewählte Energiearten. Beschäftigung der Betriebe in der Energie- und Wasserversorgung, Mineralölsteuern, Klimadaten.
