Working Paper on Sector Accounts: Quarterly Results for Main Aggregates

This working paper presents main quarterly aggregates for institutional sectors from 1999 onwards. In addition complete sector accounts are also shown for the topical year. The calculation is in line with the European System of Accounts (ESA 2010) which is based on the international System of National Accounts (SNA 2008). ESA 2010 provides compulsory concepts and definitions for the member states of the European Union.

According to ESA 2010 the following institutional sectors are shown:

- Total economy (S.1)
- Non financial corporations (S.11)
- Financial corporations (S.12)
- General government (S.13)
- Private households including non-profit organisations serving private households (S.14/15)
- Sector rest of the world (S.2)

Institutional sector accounts give an overview of the interactions among households, non-financial and financial corporations, general government and the rest of the world. Because of missing data non profit organisations (S.15) are shown together with private households (S.14). All transactions between institutional sectors have been grouped into economically meaningful categories, such as compensation of employees, property income, taxes on income and consumption expenditure. The accounts include for instance the value of goods and services produced by each institutional sector, how income was earned and whether the income was spent or saved. Main aggregates are gross and net value added, operating surplus, disposable income and saving.

Topical quarterly sector accounts are sensitive for revisions particular in case of balancing items like net lending / net borrowing. This should be kept in mind for analysis. In addition detail information is available at www.destatis.de – English version/National Accounts/Publications. The central bank (Deutsche Bundesbank) releases quarterly financial accounts. For more information refer to www.bundesbank.de.

The Statistical Office of the European Union (Eurostat) publishes regularly quarterly sector accounts data since June 2007. For further information refer to <http://epp.eurostat.ec.europa.eu>.
