Rechtsgrundlage

Die hier vorgelegten Daten werden aufgrund des "Gesetzes über die Statistik im Handel und Gastgewerbe" (Handelsstatistikgesetz) vom 10. November 1978 (BGBl. I S. 1733) repräsentativ erhoben in Verbindung mit dem Gesetz über die Statistik für Bundeszwecke (Bundesstatistikgesetz - BStatG) vom 22. Januar 1987 (BGBl. I S. 462, 565) erhoben.

Erhebungsbereich

Erfaßt werden die Unternehmen, deren wirtschaftlicher Schwerpunkt im Großhandel (Unterabteilung 40/41 der Systematik der Wirtschaftszweige, Ausgabe 1979) liegt.

Erhebungseinheit

Erhebungseinheit ist das rechtlich selbständige Unternehmen. Die Meldungen sind zu erstatten für das Gesamtunternehmen, d.h. einschließlich etwaiger inländischer Nebenbetriebe und großhandelsfremder Tätigkeiten. Als Unternehmen gelten auch rechtlich selbständige Glieder von Organkreisen (Mutter- und Tochtergesellschaften).

Erhebungsumfang

Befragt werden bis zu 10 000 Unternehmen, die repräsentativ, aus dem Material der Handels- und Gaststättenzählung 1985 ausgewählt worden sind. Beim Ziehen dieser Zufallsstichprobe blieben von den insgesamt 101 089 Großhandelsunternehmen, die am Stichtag 29.3.1985 ermittelt worden waren, die 47 940 Unternehmen unberücksichtigt, die 1984 weniger als 1 Million DM umgesetzt hatten. Die seit 1985 neugegründeten Unternehmen werden laufend repräsentativ in den Berichtskreis eingeschleust.

Erhebungsmethode

Die Großhandelsstatistik wird zentral durchgeführt. Die Angaben werden vom Statistischen Bundesamt erhoben. Landesergebnisse werden an die Statistischen Landesämter weitergeleitet, die teilweise eigene Großhandelsberichte herausgeben.

Erhebungs- und Darstellungsmerkmale

Die monatlichen Erhebungen erfassen den U m s a t z (ohne Umsatzsteuer) und die Anzahl der V o l l - sowie der T e i l z e i t b e s c h ä f t i g t e n . Für Berichtsunternehmen, die Niederlassungen in verschiedenen Bundesländern unterhalten, werden die Merkmale auch in der Untergliederung nach Bundesländern erfragt.

Ergebnisdarstellung

Erste vorläufige Ergebnisse der Großhandelsstatistik über die Umsatzentwicklung werden im Interesse einer aktuellen Berichterstattung zunächst in einer Pressemitteilung veröffentlicht. Bei den in der Pressemitteilung angegebenen Zahlen für den Berichtsmonat handelt es sich um Ergebnisse, die auf den bis zum Zeitpunkt der ersten Aufbereitung eingegangenen Meldungen der an der Berichterstattung beteiligten Unternehmen beruhen; nicht vorliegende Angaben werden maßstabsgemäß geschätzt. Im später erscheinenden Monatsbericht sind bei der Berechnung der Maßzahlen auch noch die Meldungen berücksichtigt, die nach Abschluß der Aufbereitung für die Pressemitteilung eingegangen sind.

Im Interesse einer möglichst genauen Darstellung der Ergebnisse in Zeitreihen werden die Daten des Monatsberichts mit Maßzahlen laufend anhand der nach Abschluß dieses Berichtes verspätet eingehenden Firmenmeldungen korrigiert. Diese Korrekturen können aber aus technischen Gründen nur in nachfolgenden Monatsberichten dargestellt werden.

Die Ergebnisse der Großhandelsstatistik werden in der Gliederung der Systematik der Wirtschaftszweige, Ausgabe 1979, dargestellt, also nach den Unterabteilungen "Rohstoffe und Halbwaren" und "Fertigwaren", die in je sieben Wirtschaftsgruppen unterteilt sind. Unterhalb der Gruppenebene werden Ergebnisse für ausgewählte Wirtschaftsklassen veröffentlicht, soweit dies stichprobentheoretisch vertretbar erscheint. Darüber hinaus werden erstmals im Rahmen der monatlichen Großhandelsstatistik Ergebnisse bereitgestellt in der Gliederung nach nationalen und internationalen Aktivitäten, also Binnenhandel, Außenhandel und Globalhandel sowie über den Produktions- und den Konsumtionsverbindungshandel beim Binnen- und Außenhandel.

Definitionen

Umsatz

Umsatz ist der Gesamtbetrag der abgerechneten Lieferungen und sonstigen Leistungen (ohne Umsatzsteuer) einschließlich Eigenverbrauch, Verkäufen an Betriebsangehörige sowie einschließlich gesondert in Rechnung gestellter Kosten für Fracht, Porto, Verpackung usw., ohne Rücksicht auf den Zahlungseingang und die Steuerpflicht.

Der Umsatz schließt auch Erlöse aus Kommissions- oder Strekkengeschäften, Provisionen und Kostenvergütungen aus der Vermittlung von Waren (nicht den Wert der vermittelten Waren) einschl. Delkrederprovisionen, aber ohne durchlaufende Posten (z.B. im Auftrag der Lieferanten vereinnahmte Zahlungen) sowie Zusatzserlöse ein.

Nicht dazu gehören jedoch Erlöse aus Land- und Forstwirtschaft sowie außerordentliche Erträge (z.B. aus dem Verkauf von Anlagevermögen) und betriebsfremde Erträge (z.B. Einnahmen aus Vermietung und Verpachtung von betriebsfremd genutzten Gebäuden und Gebäudeteilen, Zinserträge aus nicht betriebsnotwendigem Kapital oder Erträge aus Beteiligungen).

An Kunden gewährte Skonti und Erlösschmälerungen (z.B. Preisnachlässe, Rabatte, Jahresrückvergütungen, Boni) sind bei der Ermittlung des Umsatzes abzusetzen.

Bei umsatzsteuerlichen Organschaften sind auch die von der Muttergesellschaft oder den Tochtergesellschaften getätigten Innenumsätze mit anzugeben.

Beschäftigte

Beschäftigte sind tätige Inhaber, unbezahlt mithelfende Familienangehörige sowie sämtliche Arbeitnehmer. Dazu gehören auch vorübergehend Abwesende (z.B. Kranke, Urlauber) und Teilzeitbeschäftigte.

Teilzeitbeschäftigte

Teilzeitbeschäftigte sind Personen, deren durchschnittliche Arbeitszeit kürzer ist als die orts-, branchen- oder betriebsübliche Wochenarbeitszeit.

3 Mittelfristige Umsatzentwicklung im Großhandel*)
 Ergebnisse auf der Basis 1986 = 100

*) Die Ergebnisse werden - bedingt durch die Nachmeldungen - monatlich rückwirkend (bis 24 Monate) korrigiert.

1) Hochgerechnete Ergebnisse für Unternehmen mit einem Jahresumsatz ab 1 Mill. DM.
 2) Veränderung gegenüber Vorjahreszeitraum.

Die konjunkturelle Entwicklung der Umsätze im Großhandel

Es handelt sich um Ergebnisse der Zeitreihenanalyse nach dem "Berliner Verfahren" (Version 4). Das Verfahren zerlegt die Originalwerte (-reihe) in eine Trend-Konjunktur-Komponente, eine Saison- und Kalenderkomponente sowie in eine Restkomponente. Die Trend-Konjunktur-Komponente des Berliner Verfahrens wird häufig als Konjunkturindikator eingesetzt, da sie die mittel- bis langfristige "Grundtendenz" der Reihe anzeigt. Grundsätzlich ist zu beachten, daß die Schätzung der Zeitreihenkomponenten am aktuellen Rand (etwa für die letzten 3 Monate) mit gewissen Unsicherheiten über die Entwicklung behaftet ist.

Das "Berliner Verfahren" ist aus der Zusammenarbeit der Technischen Universität, Berlin, mit dem Deutschen Institut für Wirtschaftsforschung, Berlin, hervorgegangen. Siehe: Nullau B., Heiler S., Wäsch P., Meissner B., Filip D.: Das "Berliner Verfahren". Ein Beitrag zur Zeitreihenanalyse. In DIW-Beiträge zur Strukturforschung, Heft 7, Berlin 1969.
