Note

By way of adaption to the new customs law and under the amended version of the executive order to the Statistics on Frontier Crossing Goods Traffic Act (Aussenhandelsstatistik - AHStatDV) of 2 April 1962, some changes as to method and procedure employed in collection and ascertainment of foreign trade statistics in the Federal Republic of Germany have come into effect. Reference is made in this context to the article entitled "Methodische Änderungen der Aussenhandelsstatistik ab 1962" ("Changes of Method in Foreign Trade Statistics Since 1962") which has been published in the number of December 1961, page 699, of "Wirtschaft und Statistik". These changes, as from the reporting month of January 1962, have been taken account of in the methodological preliminary notes of series G "Aussenhandel" (Foreign Trade").

Methodical Introduction

1. The figures shown in this publication relate to the Special Trade of the Federal Republic of Germany including Berlin (West) (up to 5 July 1959 excluding the Saar).

Therefore, the introductory remarks to Series 1 of the Subject- Matter Series: "Aussenhandel" (Foreign Trade) are also applicable mutatis mutandis to this publication.

2. Since January 1961, the grouping of the commodities has been made according to the "Classification for Statistics and Tariffs (CST)" of the Statistical Office of the European Communities. The CST corresponds to the Revised Standard International Trade Classification (SITC revised), which by a recommendation of the Statistical Commission of the United Nations has replaced the former SITC since January 1961. When comparing the results compiled according to the former SITC with those of the new CST, attention must be paid to conversions and alterations which were made by the revision. The figures for the year 1960 are presented, for purposes of comparison, in Tables A and B as well by SITC-Sections as also by CST-Sections. Particulars on the allocation of commodities can be drawn from a comparison of the numbers of the CST with those of the "Warenverzeichnis für die Außenhandelsstatistik" (Commodity Classification for Foreign Trade Statistics). This can be obtained as a special print directly from the Federal Statistical Office in Wiesbaden; but it will also be published as Appendix 1 in the annual volume of Series 1 of this subject-matter series.

The designations of commodities have been abridged for many items. The unabridged wording can be seen from the original version of the CST, issued in several languages by the Statistical Office of the European Communities in Brussels.

3. The present publication deviates in some points from the original version of the CST.

The following products which are not particularly ascertained by German foreign trade statistics are classified under other CST-items:

Zoo animals, dogs, cats, etc. (941.0) under 001.9,
Blanks for tubes and pipes (672.9) under 678.2.

Electric energy (351.0) is not shown in German foreign trade statistics.

Iron for re-utilization (Nutzeisen) is covered by group 282 "Waste and scrap of iron or steel".

Postal packages (911.0) are classified according to their contents.

Gold (X00) is covered by group 971 in Part 9.

Coins in circulation (981 = X10) are legal tender and as such not included in foreign trade statistics.

4. In the January to November volumes, only those countries for which the reported value of imports or exports was at least \$ 10,000 are presented under the individual groups in Table E. In the December volume this limit is \$ 5,000.

Table G which is given only in the December volume presents under the various countries merely those groups of the CST, for which the reported value for imports or exports was at least \$ 5,000 in the year concerned.

5. The data on countries relate to the countries of production and the countries of consumption. The designations of the countries are abbreviated. A list of the countries with information on the territory covered by them is given in the appendix of this publication.
6. Particulars on the method applied for calculating the volume and the indices are provided by the article "Neuberechnung von Aussenhandelsindices für die Bundesrepublik Deutschland auf der Basis 1954" (New Computation of Foreign Trade Indices for the Federal Republic of Germany on the Basis of 1954) in "Wirtschaft und Statistik", 10th Year, No.2, page 82, issued by the Federal Statistical Office, as well as by the publication "Statistische Berichte V/33/5".
7. The figures for 1962 are provisional.
8. Changes in the figures published at an earlier date are due to subsequent corrections.
