Statistikbereinigungsgesetzes vom 14. 3.1980 (BGBl. I S. 294),
- die Verordnung zur Durchführung des Gesetzes über die Statistik des grenzüberschreitenden Warenverkehrs (Außenhandelsstatistik – Durchführungsverordnung – AHStatDV) in der Fassung der Bekanntmachung vom 29. 7.1994 (BGBl. I S. 1993),

- die Verordnung (EWG) Nr. 854/93 des Rates vom 5. 4.1993 über die Durchfuhrstatistik und die Statistik des Lagerverkehrs im Warenverkehr zwischen Mitgliedstaaten (ABI EG 1993 Nr. L 90 S. 1).

2 Gegenstand

Gegenstand der Außenhandelsstatistik der Bundesrepublik Deutschland ist der grenzüberschreitende Warenverkehr des Erhebungsgebietes mit dem Ausland. Ausland im Sinne der Außenhandelsstatistik ist das Gebiet außerhalb des Erhebungsgebietes.

Aufgrund unterschiedlicher Erhebungskonzepte unterscheidet man seit 1993 zwischen Warenverkehren mit Mitgliedstaaten der Europäischen Union (Intrahandel) und Warenverkehren mit den übrigen Staaten (Extrahandel).

3 Erhebungsgebiet

Das Erhebungsgebiet der Außenhandelsstatistik umfaßt die Bundesrepublik Deutschland (ohne den Zollausschluß Büsingen).

4 Anmeldung

Den Ergebnissen der Extrahandelstatistik liegen im allgemeinen die Angaben der Einführer und Ausführer zugrunde. Die Anmeldung zur Extrahandelstatistik erfolgt in der Regel mit den Vordrucken „Einfuhranmeldung“ und „Ausfuhranmeldung“.

Den Ergebnissen der Intrahandelstatistik liegen die statistischen Anmeldungen der innergemeinschaftlichen Erwerbe und Lieferungen im Sinne des Umsatzsteuergesetzes zugrunde.

5 Darstellungsformen

Der grenzüberschreitende Warenverkehr wird in der Außenhandelsstatistik als Generalhandel (siehe die Vorbemerkung, Reihe 1, Abschnitt Generalhandel), und als Spezialhandel nachgewiesen. Der Spezialhandel enthält im wesentlichen die Waren, die zum Gebrauch, zum Verbrauch, zur Bearbeitung oder Verarbeitung in das Erhebungsgebiet eingegangen sind bzw. aus der Erzeugung, der Bearbeitung oder Verarbeitung des Erhebungsgebietes stammen und ausgeführt worden sind.

6 Spezialhandel

Die Angaben der vorliegenden Veröffentlichung beziehen sich auf den Spezialhandel. Dieser umfaßt

6.1 in der Einfuhr

- 6.1.1 die unmittelbare Einfuhr von Waren in den freien Verkehr, zur zollamtlich bewilligten aktiven Veredelung (Eigen- und Lohnveredelung), nach zollamtlich bewilligter passiver Veredelung, auch Ausbesserung,
- 6.1.2 die Einfuhr von ausländischen Waren aus Lager in die unter Abschnitt 6.1.1 genannten Einfuhrarten; als Lager im Sinne der Außenhandelsstatistik gelten Freizonen und Zolllager sowie einige Sonderfälle,

6.2 in der Ausfuhr

die Ausfuhr von Waren aus dem freien Verkehr, nach zollamtlich bewilligter aktiver Veredelung (Eigen- und Lohnveredelung), zur zollamtlich bewilligten passiven Veredelung, auch Ausbesserung.

Bei den unter 6.1 und 6.2 genannten Einfuhr- bzw. Ausfuhrarten ist:

„aktive Veredelung“ die zollamtlich bewilligte Veredelung von ausländischen Waren im Zollgebiet sowie die besonders zugelassene, über die übliche Lagerbehandlung hinausgehende Bearbeitung oder Verarbeitung von ausländischen Waren in den Zollfreiheiten (ausgenommen im Schiffbau), soweit die Waren einem Zoll, einer Abschöpfung oder einer anderen Verbrauchssteuer als der Einfuhrumsatzsteuer unterliegen. Dabei ist „Eigenveredelung“ die Veredelung von ausländischen Waren im Erhebungsgebiet für Rechnung des im Erhebungsgebiet ansässigen Eigentümers. Eigenveredelung ist jedoch auch die Veredelung von ausländischen Waren für Rechnung einer anderen in den Europäischen Gemeinschaften ansässigen Person, sofern für den Auftraggeber eine Eigenveredelung vorliegt. „Lohnveredelung“ ist die Veredelung von ausländischen Waren im Erhebungsgebiet für Rechnung einer außerhalb der Mitgliedstaaten der Europäischen Gemeinschaften ansässigen Person. Lohnveredelung ist jedoch auch die Veredelung von ausländischen Waren für Rechnung einer anderen in den Europäischen Gemeinschaften ansässigen Person, sofern für den Auftraggeber eine Lohnveredelung vorliegt.

„Passive Veredelung“ die zollamtlich bewilligte Veredelung (Bearbeiten, Verarbeiten und Ausbessern) von Waren des freien Verkehrs im Ausland.

Veredelungsgeschäfte, die nicht im Rahmen einer zollamtlich bewilligten aktiven oder passiven Veredelung abgewickelt werden (sogenannte wirtschaftliche Veredelung), sind als unmittelbare Einfuhr in den freien Verkehr bzw. als Ausfuhr aus dem freien Verkehr nachgewiesen.

7 Schiffs- und Luftfahrzeugbedarf

Als Schiffs- und Luftfahrzeugbedarf wird im Spezialhandel die Lieferung ausländischer Waren aus Lager für den Bedarf ausgehender deutscher Seeschiffe und Luftfahrzeuge (in der Einfuhr) sowie die Lieferung von Waren aus dem freien Verkehr und aus der aktiven Veredelung für den Bedarf ausgehender fremder Seeschiffe und Luftfahrzeuge (in der Ausfuhr) nachgewiesen. Unter Schiffs- und Luftfahrzeugbedarf ist ferner in der Einfuhr die Lieferung ausländischer Waren aus Lager für den Bedarf von in ausländischen Häfen liegenden deutschen Seeschiffen und Luftfahrzeugen zu verstehen. Die betreffenden Angaben sind in den unter Abschnitt 6.1.2 bzw. 6.2 genannten Einfuhr- bzw. Ausfuhrarten enthalten.

Die als Schiffs- und Luftfahrzeugbedarf angemeldeten Waren werden zusammengefaßt unter den Nummern 99302400, 99302700 und 99309900 nachgewiesen. Ausgenommen von dieser Regelung sind Heiz- und Treibstoffe als Schiffs- und Luftfahrzeugbedarf, die den hierfür vorgesehenen Warennummern zugeordnet werden. Eine ländermäßige Aufgliederung der als Schiffs- und Luftfahrzeugbedarf angemeldeten Angaben erfolgt nicht (siehe Länderposition „Schiffs- und Luftfahrzeugbedarf“).

8 Befreiungen und Vereinfachungen

In den Ergebnissen der Extrahandelstatistik sind nicht enthalten Waren und Verkehrsvorgänge, die gemäß § 31 AHStatDV von der Anmeldung befreit sind, wie z.B. ab Juli 1994 Sendungen bis zu einem Wert von einschließlich 1600 DM, wenn das Gewicht der Sendung nicht mehr als 1000 kg beträgt.

Im Rahmen der Intrahandelstatistik sind grundsätzlich alle Privatpersonen von der Auskunftsspflicht befreit. Die Befreiung gilt auch für Auskunftsspflichtige, deren im Intrahandel getätigten jährlichen Versendungen in andere EU - Mitgliedstaaten oder Eingänge aus anderen EU - Mitgliedstaaten den Statistischen Wert von 200 000 DM im Vorjahr oder im laufenden Jahr nicht überschritten haben. Daneben sind bestimmte Warenbewegungen entsprechend den Regeln für den Extrahandel ebenfalls befreit, wobei es keine sendungsbezogenen Befreiungsgrenzen gibt.

Nicht einbezogen sind ferner Waren, die von ausländischen Streitkräften, die in der Bundesrepublik Deutschland stationiert sind, selbst eingeführt und ausgeführt werden.

Hinsichtlich der Änderungen bei der Anmeldung und der Aufbereitung der Intrahandelstatistik ab Januar 1993 wird auf die Aufsätze „Ein Jahr Intrahandelstatistik“ in „Wirtschaft und Statistik“, Heft 2/1994, Seite 109 ff., und „Die deutsche Außenhandelsstatistik im EG - Binnenmarkt“ in „Wirtschaft und Statistik“ Heft 1/1993, Seite 25 ff., hingewiesen.

9 Berichtsmonat

In der Darstellung des Außenhandels als Spezialhandel werden die unmittelbaren Einfuhren und die Ausfuhren im allgemeinen im Monat des Grenzüberganges, die auf Lager eingeführten Waren dagegen erst im Zeitpunkt ihrer Einfuhr aus Lager nachgewiesen. Durch unvermeidbare Aufenthalte bei der Anmeldung, aber auch durch Rückfragen, können in geringem Umfange Einfuhren und Ausfuhren in einer späteren Berichtszeit nachgewiesen sein. Andererseits können in den Ergebnissen der Ausfuhr auch Sendungen enthalten sein, die das Erhebungsgebiet noch nicht verlassen haben.

10 Darstellung der Hauptübersicht

In der Hauptübersicht wird der Spezialhandel (siehe Abschnitt 6) im allgemeinen nach einzelnen Nummern des Warenverzeichnisses für die Außenhandelsstatistik dargestellt. Die Warenbenennung ist bei vielen Positionen stark gekürzt, ihr vollständiger Wortlaut ist aus dem genannten Warenverzeichnis zu ersehen. Es folgen, mit Stern (*) bezeichnet, die Angaben für die Gesamteinfuhr bzw. -ausfuhr, sodann die Nachweise für die Eigen- und Lohnveredelung (EV, LV) sowie für die passive Veredelung (PV) – siehe Abschnitt 6 – und außerdem die Ergebnisse der Einfuhr aus Lager (AUS LG) – siehe Abschnitt 6.1.2 –. Anschließend werden die Mengen und Werte für die Ursprungs- bzw. Bestimmungsländer (siehe Abschnitt 11) veröffentlicht, für die im jeweiligen Berichtsmonat eine Einfuhr bzw. Ausfuhr im Werte von mindestens 50 000 DM – von Ausnahmen abgesehen – erreicht wurde. Demnach ergibt die Addition der Länderangaben in vielen Fällen nicht die Summenzahlen für die Gesamteinfuhr bzw. -ausfuhr der betreffenden Warenpositionen. Ferner können bei Positionen mit besonderen Maßeinheiten (z. B. 1000 Stück, Hektoliter usw.) geringfügige Abweichungen in den Summen durch Runden der Zahlen entstehen.

Alle durch Erreichen der jeweiligen monatlichen Wertgrenze einmal aufgenommenen Länderangaben werden in den darauffolgenden Monatsberichten bis zum Novemberbericht weiterhin dargestellt.

In den Angaben über die Gesamteinfuhr bzw. -ausfuhr je Warenposition sind die Mengen und Werte für die Veredelung, für die Einfuhr aus Lager sowie für die nichtveröffentlichten Länder enthalten. Die Angaben für die Ursprungs- bzw. Bestimmungsländer schließen ebenfalls die Mengen und Werte für die Veredelung und für die Einfuhr aus Lager ein.

Ist in den Mengen- und Wertspalten eine Zeile nicht mit Zahlen ausgefüllt, so bedeutet dies, daß eine Einfuhr bzw. Ausfuhr nicht stattgefunden hat. Stehen aber nur in der Mengenspalte keine Zahlen, so ist von der betreffenden Ware weniger als die Hälfte der an dieser Stelle nachgewiesenen Einheit eingeführt bzw. ausgeführt worden.

Rückwaren und Ersatzlieferungen werden nicht nach ihrer warenmäßigen Beschaffenheit, sondern jeweils unter einer Sammelposition (Warennummer 99909910 bzw. 99909926) erfaßt und nachgewiesen.

Abweichend von den Bestimmungen des Deutschen Gebrauchs-Zolltarifs werden „Nachprägungen“ von Gold- und Silbermünzen nicht unter den Warennummern 71141100 und 71141900, sondern unter den Warennummern 71181010 oder 71181090 erfaßt und nachgewiesen.

Als Sammlungsstücke angemeldete Münzen der Warennummern 71181010 und 71181090 werden unter der Tarifnummer 9705 nachgewiesen.

Am Ende eines jeden Kapitels werden unter einer fiktiven Warennummer (z. B. 01990000, 02990000) geschätzte Werte für Anmeldeausfälle zur Intrahandelsstatistik nachgewiesen. In den zusammenfassenden Übersichten sind diese geschätzten Werte in den Summen für Kapitel und Abschnitte enthalten.

11 Bezugs- und Absatzgebiete

Das „Länderverzeichnis für die Außenhandelsstatistik“ unterscheidet von Januar 1995 an 227 Länder bzw. Gebiete (siehe Anhang).

Die Ursprungs- und Bestimmungsländer werden in der Hauptübersicht mit einem stark gekürzten (sechsstelligen) Text dargestellt (siehe S. XIV). In der Einfuhr wird als Ursprungsland das Land nachgewiesen, in dem die Waren vollständig gewonnen oder hergestellt worden sind oder ihre letzte wesentliche und wirtschaftlich gerechtfertigte Be- oder Verarbeitung erfahren haben. Maßgebend sind die Begriffsbestimmungen von Titel II Kapitel II der Verordnung (EWG) Nr. 2913/92 des Rates vom 12.10.1992 (ABl. Eur. Gem. Nr. L 302 S 1). Ist das Ursprungsland nicht bekannt, so tritt an diese Stelle das Versendungsland. Versendungsland ist das Land, aus dem die Waren in das Erhebungsgebiet verbracht worden sind, ohne daß sie in Durchfuhrländern anderen als den mit der Beförderung zusammenhängenden Aufenthalten oder Rechtsgeschäften unterworfen wurden.

In der Ausfuhr wird als Bestimmungsland das Land nachgewiesen, in dem die Waren gebraucht oder verbraucht, bearbeitet oder verarbeitet werden sollen. Ist das Bestimmungsland nicht bekannt, so gilt das letzte bekannte Land, in das die Waren verbracht werden sollen, als Bestimmungsland.

12 Mengen

Die Mengen sind nach Gewicht (Dezitonne = dt = 100 kg) angegeben, bei einigen Waren auch nach anderen handelsüblichen Maßeinheiten (z. B. Stück, Hektoliter, Kubikmeter, Tonne usw.). Das Gewicht ist die Eigenmasse bzw. das Reingewicht der Waren.

13 Werte

Die Werte sind in 1 000 DM nachgewiesen. Sie beziehen sich grundsätzlich auf den Grenzübergangswert, der unabhängig von der fakturierten Währung stets in DM angemeldet und erfaßt wird. Der Grenzübergangswert stellt den Wert frei Grenze des Erhebungsgebietes dar, in der Einfuhr ohne Eingangsabgaben. Bei der Ausfuhr oder Einfuhr nach Veredelung ist stets der volle Warenwert einschließlich der Veredelungskosten und der Vertriebskosten eingesetzt.

14 Veröffentlichungen

Ergebnisse der Außenhandelsstatistik in anderen Gliederungen sind in den Reihen 1, 3, 4, 7 und S der Fachserie 7, Außenhandel, veröffentlicht.

Im Rahmen der „Fremdsprachigen Veröffentlichungen“ erscheint jährlich in englischer Sprache „Foreign Trade according to the Standard International Trade Classification (SITC-Rev. II) – Special Trade –“ (Ab 1988: SITC-Rev. 3).

Eine ausführliche Beschreibung der Methode der Außenhandelsstatistik enthält im übrigen die Veröffentlichung „Außenhandel und Statistik“ der Reihe „Zahl und Leben“, Heft 7.

Zur Darstellung der Ergebnisse ab Januar 1988 wird auf folgende Aufsätze hingewiesen: „Methodische, systematische und anmeldetechnische Änderungen in der Außenhandelsstatistik ab 1988“ in „Wirtschaft und Statistik“, Heft 10/1986, S. 773 ff.

„Neue Warennomenklaturen für die Außenhandelsstatistik ab 1988“ in „Wirtschaft und Statistik“, Heft 5/1987, S. 396 ff.

15 Vorläufige und endgültige Ergebnisse

Die Angaben für die Monate Januar bis November des laufenden Jahres sind grundsätzlich nur vorläufige Ergebnisse. Im Dezemberbericht werden jeweils die endgültigen Jahreszahlen veröffentlicht. Alle nachträglichen Berichtigungen für die Monate Januar bis November werden erst Anfang des Folgejahres, und zwar meist im Februarbericht in einem Anhang nachgewiesen.

Teilweise können sich innerhalb der Monatsberichte bei verschiedenen Einzelpositionen Abweichungen bei der Addition von Monatszahlen zu den sog. Jahresteilerggebnissen ergeben; diese beruhen auf den zwischenzeitlich durchgeführten Berichtigungen.

Für die Ergebnisse früherer Berichtszeiten gilt jeweils die „Vorbemerkung“ des entsprechenden Berichtes.

1) Der vollständige Umfang der einzelnen Länderpositionen ist im vorstehenden Länderverzeichnis für die Außenhandelsstatistik dargestellt.

Fachserie 7: Außenhandel

Reihe 1: Zusammenfassende Übersichten für den Außenhandel

Die etwa 6 Wochen nach dem Berichtsmonat erscheinende *Monatsveröffentlichung* enthält die wichtigsten Ein- und Ausfuhrzahlen des *Spezialhandels* nach Warengruppen, nach Ländern und Ländergruppen (EG-Länder, Entwicklungsländer, Mittel- und osteuropäische Länder) sowie Übersichten über Außenhandelsvolumen und -indizes.

Außerdem wird in der Abgrenzung des *Generalhandels* die monatliche Entwicklung der Ein- und Ausfuhr nach Warengruppen der Ernährungswirtschaft und der Gewerblichen Wirtschaft dargestellt.

Als Anhang erscheint eine Übersicht über den Außenhandel der Mitgliedsländer der OECD.

Der Jahresbericht mit erweitertem Tabellenprogramm enthält u.a. auch Angaben über den Lager- und Veredelungsverkehr.

Reihe 2: Außenhandel nach Waren und Ländern (Spezialhandel)

In dem *Monatsbericht* werden die Ergebnisse (Menge und Wert) der Ein- und Ausfuhr nach fast allen achtstelligen Warennummern des Warenverzeichnisses für die Außenhandelsstatistik in der Gliederung nach den wichtigsten Ursprungs- und Bestimmungsländern veröffentlicht. Der Dezemberbericht ist gleichzeitig *Jahresbericht*.

Jährlich werden ergänzende Angaben (Reihe 2.1) über den Lagerverkehr, den Übergang von Waren aus dem Veredelungsverkehr in den freien Verkehr, über die Zollsollerträge und über die Ausfuhr von Waren ausländischen Ursprungs gebracht.

Reihe 3: Außenhandel nach Ländern und Warengruppen (Spezialhandel)

In dieser Reihe werden *halbjährlich* die Ergebnisse der Ein- und Ausfuhr nach Ursprungs- und Bestimmungsländern in der Unterteilung nach Warengruppen und -untergruppen der Ernährungswirtschaft und der Gewerblichen Wirtschaft ausgewiesen.

Der zweite Halbjahresbericht ist gleichzeitig *Jahresbericht*.

Reihe 4: Außenhandel mit ausgewählten Waren

4.1: Ein- und Ausfuhr von Mineralöl (Generalhandel)

Der etwa 8 Wochen nach dem Berichtsmonat vorliegende *Monatsbericht* enthält die Ergebnisse der Ein- und Ausfuhr von Mineralöl nach Warennummern, unterteilt nach Ursprungs- und Bestimmungsländern.

Der Dezemberbericht enthält gleichzeitig die Jahresergebnisse.

Reihe 5: Außenhandel mit ausgewählten Ländern

5.1: Außenhandel mit den Entwicklungsländern (Spezialhandel)

In diesem Bericht wird *jährlich* der Außenhandel der Bundesrepublik Deutschland mit den Entwicklungsländern als Ursprungs- und Bestimmungsländer bzw. als Einkaufs- und Käuferland dargestellt, wobei eine länderweise Unterteilung nach wichtigen Erzeugnisgruppen bzw. Warengruppen der Ernährungswirtschaft und der Gewerblichen Wirtschaft getroffen wird.

Reihe 6: Durchfuhr im Seeverkehr und Seeumschlag

Die *jährlich* herausgegebene Veröffentlichung umfaßt die im Eingang und Ausgang über die wichtigsten Seehäfen der Bundesrepublik Deutschland durch das Erhebungsgebiet durchgeführten Waren sowie den Seeumschlag. Die Nachweisungen sind nach Seehäfen, Warengruppen der Ernährungswirtschaft und der Gewerblichen Wirtschaft sowie nach Versendungs- und Bestimmungsländern untergliedert.

Reihe 7: Außenhandel nach Ländern und Gütergruppen der Produktionsstatistiken (Spezialhandel)

In dieser *jährlich* erscheinenden Reihe erfolgt die Darstellung der Ergebnisse der Ein- und Ausfuhr nach Ursprungs- und Bestimmungsländern in der Benennung und Untergliederung nach den Gütergruppen bzw.

-zweigen des Güterverzeichnisses für Produktionsstatistiken. Hierdurch ergibt sich eine warenmäßige Gliederung der Außenhandelsstatistik nach dem produktionstechnischen Zusammenhang.

Reihe 8: Außenhandel nach dem internationalen Warenverzeichnis für den Außenhandel (SITC-Rev. 3) und Ländern (Spezialhandel) - bis 1987 SITC-Rev. II -

In diesem *Jahresbericht* (seit 1978) werden die Ergebnisse der Ein- und Ausfuhr nach den fünfstelligen Positionen des Internationalen Warenverzeichnisses für den Außenhandel (SITC-Rev. 3) in der Gliederung nach den wichtigsten Ursprungs- und Bestimmungsländern veröffentlicht.

Im Anhang werden die Positionen des Internationalen Warenverzeichnisses für den Außenhandel (SITC-Rev. 3), den Nummern des Warenverzeichnisses für die Außenhandelsstatistik gegenübergestellt.

Reihe 9: Sonderbeiträge

S 3: Neuberechnung des Außenhandelsvolumens und der Außenhandelspreisindizes auf Basis 1990

Der Bericht enthält für die Berichtszeit 1952 bis 1983 die Ergebnisse der Neuberechnung des Außenhandelsvolumens und der Außenhandelsindizes nach Umstellung auf das Basisjahr 1980.

S 5: Außenhandel nach dem internationalen Warenverzeichnis für den Außenhandel (SITC-Rev. II) von 1978 bis 1987
