## Notes for Users

The present list comprises all publications issued by the Federal Statistical Office which may be obtained from the publishers as of early January 1978. Older publications which are already out of print, and for the most part also outdated as to their content, are in general not included. These may be consulted either at the Federal Statistical Office or in libraries and archives. Titles which are expected to appear shortly are referred to as "planned".

The publications are generally issued only in German. Translations into foreign languages are available only for some selected publications (See Section 6).

### Explanations

#### Rearrangement of the system of publications as from 1977

Numerous supplementations to and revisions of the work programme of federal statistics, involving far-reaching consequences for the publications offered, necessitated a rearrangement of the publication system of the Federal Statistical Office as from 1 January 1977. There have been incorporated in the publication system the results of new statistics, such as statistics on persons engaged, the reports on agriculture, statistics on the film industry and the press, or environmental statistics. Likewise, the standardization and reorganization of the statistics of production industries had to be taken into account in the system of publications. All publications on foreign statistics now are part of the group "Statistics of Foreign Countries". In order to achieve a more balanced structure of the system, several regroupings with regard to certain groups of subjects also seemed indicated.

The individual changes made have already been explained in the List of Publications for 1977. In order to facilitate the transition from the old to the new system, the references to former reports have also been retained in the present list. At the same time, the changeover of code numbers from six to seven digits, which had already been made in the case of all publications issued since the beginning of 1977, has also been extended to all previous publications.

#### Categories of publications

The summary publications contain results from several or all fields of activity of the Federal Statistical Office. Among the best-known publications offering a cross section of official statistics are "Statistisches Jahrbuch" (Statistical Yearbook), the monthly review "Wirtschaft und Statistik" (Economics and Statistics) and "Statistischer Wochendienst" (In-

formation on Statistics, Weekly). Moreover, this group comprises larger cross-section publications containing time series and regionally classified data, subject-matter related presentations, studies of organizational and methodological questions as well as summary brochures.

The publications containing results from the individual fields of statistics are issued within the scope of subject-matter series. Each subject-matter series is subdivided into a certain number of publication series which contain results of specific statistics becoming available periodically, as well as special contributions to these statistics issued at irregular intervals. In general, the titles of these series indicate the specific field covered by the statistics. A series may further be subdivided into individual titles or sub-titles. The results of censuses or other major surveys conducted only once or at irregular intervals are issued within the scope of the respective subject-matter series as one-time publications.

The classifications constitute subsidiary material for the compilation of individual statistics, and only in exceptional cases contain numerical data.

Regionally classified data, above all from major censuses, are also published in the form of maps.

The group "Statistics of Foreign Countries" comprises both publications which present a cross-section view of foreign statistics (Monthly International Figures, Reports on Foreign Countries and Summary Reports on Foreign Countries) as well as the subject-matter series "Foreign Statistics" comprising five publication series.

For some of the publications there are also foreign-language editions.

All new publications are announced weekly in the "Bundesanzeiger" (Federal Advertiser) and in "Statistischer Wochendienst" (Information on Statistics, Weekly), and monthly in "Wirtschaft und Statistik" (Economics and Statistics).

#### Periodicity

Abbreviations have been used with respect to periodicity (see p. 3). Moreover, the bracketed figures always refer to the latest edition of publications issued annually, at irregular intervals or on a one-time basis (Position: Early in January 1978). The same applies to the prices quoted.

## Presentation of regional data

In the German edition of the list of publications, indications regarding the spatial breakdown of the published material are provided in the column "Regional Breakdown". Only the respective smallest regional unit presented is shown, since the next higher units too appear almost throughout as subtotals or final amounts. In general, administrative units only are taken into consideration (Land, Regierungsbezirk, Kreis, Community). The reference to the regional breakdown does not mean that all tables are subdivided correspondingly. Many publications offer only selected benchmarks in a regional breakdown. Users interested in a more detailed regional breakdown of the results are referred to the publications of the Land statistical offices (see addresses on page 4).
