Notes for Users

The present catalogue lists all publications of the Federal Statistical Office available at the beginning of January 1979. Older publications which are already out of print, and for the most part also outdated as to their content, are in general not included. These may be consulted either at the Federal Statistical Office or in the larger libraries and archives. Titles which are expected to appear shortly after the publication of this catalogue are referred to as "in preparation"; publications for which no date of issue can be given as yet, are marked "planned".

Explanations

Rearrangement of the system of publications as from 1977

As of 1 January 1977, the publication system of the Federal Statistical Office has been put on a new basis. This proved necessary in particular because of changes and supplementations in the working programme of official statistics which had to be incorporated in the existing system of reports; in view of a better overall balance, some rearrangements had to be made for certain groups of subjects. For further details please see the 1977 and 1978 Lists of Publications of the Federal Statistical Office.

Categories of publications

The summary publications contain results from several or all fields of activity of the Federal Statistical Office. Among the most important publications offering a cross section of official statistics are "Statistisches Jahrbuch" (Statistical Yearbook), the monthly review "Wirtschaft und Statistik" (Economics and Statistics) and "Statistischer Wochendienst" (Information on Statistics, Weekly). Moreover, this group comprises cross-section publications containing time series and regionally classified data, subject-matter related presentations, studies of organizational and methodological questions as well as summary brochures.

The publications containing results from the individual fields of statistics are issued within the scope of subject-matter series. Each subject-matter series is subdivided into publication series which contain results of specific statistics becoming available periodically, as well as special contributions to these statistics issued at irregular intervals. In general, the titles of these series indicate the specific field covered by the statistics. A series may further be subdivided into individual titles or sub-titles. The results of censuses or other major surveys conducted only once or at

irregular intervals are issued within the scope of the respective subject-matter series as one-time publications.

The classifications constitute subsidiary material for the uniform allocation of data in the statistics and for a breakdown of the results in conformity with the purpose of data collection and presentation. Only in exceptional cases they contain numerical data.

Regionally classified data, above all from major censuses, are also published in the form of maps.

The group "Statistics of Foreign Countries" comprises both publications which present a cross-section view of foreign statistics (Monthly International Figures, Reports on Foreign Countries and Summary Reports on Foreign Countries) as well as the subject-matter series "Foreign Statistics" comprising five publication series.

For some of the publications there are also foreign-language editions.

All new publications are announced weekly in the "Bundesanzeiger" (Federal Advertiser) and in "Statistischer Wochendienst" (Information on Statistics, Weekly), and monthly in "Wirtschaft und Statistik" (Economics and Statistics).

Periodicity

Abbreviations have been used with respect to periodicity (see p. 3). Moreover, the bracketed figures always refer to the latest edition of publications issued annually, at irregular intervals or on a one-time basis (Position: Early in January 1979). The same applies to the prices quoted.

Presentation of regional data

In the German edition of the list of publications, indications regarding the spatial breakdown of the published material are provided in the column "Regional Breakdown". Only the respective smallest regional unit presented is shown, since the next higher units too appear almost throughout as subtotals or final amounts. In general, administrative units only are taken into consideration (Land, Regierungsbezirk, Kreis, Community). The reference to the regional breakdown does not mean that all tables are subdivided correspondingly. Many publications offer only selected benchmarks in a regional breakdown. Users interested in a more detailed regional breakdown of the results are referred to the publications of the Land statistical offices (see addresses on page 37).
