WHAT DOES THE LIST OF PUBLICATIONS CONTAIN?

The annual List of Publications comprises all the titles available at the beginning of January 1982. Publications which are out of print or outdated in point of time and as to their content are not listed. They may be consulted at the Federal Statistical Office or in the larger libraries. For a detailed list of sources for major statistical results going further back please see the bibliography of sources of the Statistical Yearbook.

Titles which are expected to appear shortly after the publication of this catalogue are referred to as "in preparation"; publications for which no date of issue can be given as yet, are marked "planned".

All new publications are announced weekly in the "Bundesanzeiger" (Federal Advertiser) and in "Statistischer Wochendienst" (Information on Statistics, Weekly), and monthly in "Wirtschaft und Statistik" (Economics and Statistics). Quarterly updated versions of this List of Publications in the German language will be supplied upon request.

The periodicity is quoted for each publication (see abbreviations page 1). The figures in brackets always indicate the latest edition.

The German edition of the List of Publications contains indications regarding the spatial breakdown of the published material indicating the smallest regional unit shown (e.g. Regierungsbezirk, Kreis; see abbreviations page 1). It should be noted that the next higher units also appear throughout as subtotals or general totals and that not all of the tables have the same degree of regional detail. The data provided in the publications of the Land statistical offices (addresses see page 69) have the most detailed regional breakdown.

HOW IS THE PUBLICATION SYSTEM CLASSIFIED?

The publications of the Federal Statistical Office may be analysed into the three major groups:

- Summary publications,
- Subject-matter series,
- Classifications.

There are further issued publications dealing with statistics on foreign countries as well as maps and foreign-language publications. An outline of the entire publication system is provided in the schedule on page 2.

The summary publications contain results from several or all fields of activity of the Federal Statistical Office. Besides the "general cross-section publications" offering a com-

prehensive though condensed selection of figures, there are "subject-matter related cross-section publications" which are compiling material for specific spheres (e.g. education, construction, energy) or allocating it to specific groups of persons (e.g. women, children, handicapped persons). There are further "publications on organizational and methodological questions".

S u m m a r y b r o c h u r e s - such as the "Statistical Compass", which is published in four languages every year - provide in popular form an outline of important spheres of life as far as they are measurable in figures. They are meant to be first of all information material of a general kind. For hurried readers, the Federal Statistical Office further provides f o l d e r s , such as "Die Bundesrepublik Deutschland in Zahlen" (The Federal Republic of Germany in Figures) and "Was die D-Mark im Ausland wert ist" (What the Deutsche Mark is Worth Abroad). Please enquire for prices charged if greater numbers of copies - also with publicity inserts - are ordered.

The results of individual statistics are issued within the scope of subject-matter series subdivided into large subject fields. Each subject-matter series comprises publication series containing results of continuous statistics supplemented, whenever necessary, by special contributions. The results of censuses/major surveys are issued within the respective subject-matter series as one-time publications.

The classifications constitute subsidiary material for the uniform allocation of data in the statistics and for a breakdown of the results in conformity with the purpose of data collection and presentation. Only in exceptional cases they contain numerical data.

Data from censuses conducted only at greater intervals are to some extent also shown in the form of subject-matter related maps.

The category Statistics of Foreign Countries comprises both cross-section publications and a subject-matter series of its own entitled "Foreign Statistics".

For some of the publications there are also foreign-language editions.

WHAT ELSE CAN THE FEDERAL STATISTICAL OFFICE DO FOR YOU?

Despite the wide range of publications issued by the Federal Statistical Office, it is not possible to publish all the data collected. As part of the service facilities, the computer-supported Statistical Information System of the Federation (STATIS-BUND) at the Federal Statistical Office is available for users wishing to carry out statistical evaluations or mathematical-statistical analyses. The stock of data, comprising at present

more than 110,000 time series and about 600 million structural data, is continuously being updated and extended. In addition to the compilation of tables in the desired form, the system enables the special processing of survey data and the application of a great number of procedures of mathematical-statistical analysis and projection. Please direct any inquiries to the Federal Statistical Office, Wiesbaden (Tel. 06121/752426). Interested parties of the Bonn region are requested to apply to the advisory service "Statistical Information System", Deutscherherrenstr. 93, D-5300 Bonn 2 (Tel. 0228/332730). Upon request, an informative summary brochure may be obtained free of charge.

Participants of the "Bildschirmtext" (interactive videotex) tests in Berlin and Düsseldorf may call up under master page 438 more than 800 pages with statistical tables and graphs, order publications and check with the Federal Statistical Office.

Alphabetic Register of Index Words

By means of the register of index words, the publication system of the Federal Statistical Office in its arrangement by subject fields is also made accessible to an alphabetical approach. The index words are followed by letters or figures, respectively (see key to symbols), which indicate the publication categories in which the desired information can be found. As far as the index word does not appear in the title, the 7-digit code number of the publication is shown in addition in order to ensure a clear allocation. Synonyms were included in exceptional cases only.
