The publication system of the Federal Statistical Office at a glance

What does the List of Publications contain?

The annual List of Publications comprises all the titles available at the beginning of January 1987. They may be consulted at the Federal Statistical Office or in the larger libraries. For a detailed list of sources for major statistical results going further back please see the bibliography of sources of the Statistical Yearbook.

Titles which are expected to appear shortly after the publication of the catalogue are referred to as "in preparation"; publications for which no date of issue can be given as yet, are marked "planned".

All new publications are announced weekly in the "Bundesanzeiger" (Federal Advertiser) and in "Statistischer Wochendienst" (Information on Statistics, Weekly), and monthly in "Wirtschaft und Statistik" (Economics and Statistics).

For the "Summary publications" in the first part of the List, a brief description of their content is given in addition to periodicity, latest issue, volume, format and price.

All other publications are listed in tabular form. The periodicity is shown by an abbreviation (explanations see page 6). The figures in brackets always indicate the latest edition.

The German edition of the List of Publications contains indications regarding the spatial breakdown of the published material indicating the smallest regional unit shown (e.g. Regierungsbezirk, Kreis). The data provided in the publications of the Land statistical offices (addresses see page 59) have a more detailed regional breakdown.

How is the publication system classified?

The publications of the Federal Statistical Office may be analysed into the three major groups:

- Summary publications,
- Subject-matter series,
- Classifications.

There are further issued maps, publications dealing with statistics on foreign countries and foreign-language publications. An outline of the entire publication system is provided in the schedule on page 2.

The **summary publications** contain the results from several or all fields of activity of the Federal Statistical Office. Besides the "general cross-section publications" offering a comprehensive though condensed selection of figures, there are "subject-matter related cross-section publications" which are imparting information for specific spheres (e.g. education, construction, energy) or allocating it to specific groups of persons (e.g. women, young people, foreigners).

There are further "publications on organizational and methodological questions". Reference should be made in this connection especially to the series of publications entitled "Forum der Bundesstatistik" (Forum of Federal Statistics) which the Federal Statistical Office has created as a platform for the discussion of major problems of official statistics. In addition to experts from official statistics, the authors to be featured here will also include experts from science and research.

Summary brochures provide in easily comprehensible form an outline of important spheres of life. For hurried readers, the Federal Statistical Office further provides folders. (For details see page 12).

The results of individual statistics are issued within the scope of **subject-matter series** subdivided into large subject fields. Each subject-matter series comprises publication series containing results of continuous statistics supplemented, whenever necessary, by special contributions. The results of censuses/major surveys performed only at larger intervals are issued within the respective subject-matter series as non-recurrent publications.

The **classifications** constitute subsidiary material for the uniform allocation of data in the statistics and for a breakdown of the results in conformity with the purpose of data collection and presentation.

Data from censuses are to some extent also shown in the form of subject-matter related **maps**.

The category **Statistics of Foreign Countries** comprises cross-section publications with selected figures for a great number of countries (quarterly reports on foreign statistics) or data with detailed comments on population and economy of individual countries (reports on foreign countries).

The publications of the Federal Statistical Office as a rule are issued in the German language. In exceptional cases, there are however also **foreign-language editions** (see page 49). The List of Publications is also available in German and French.

A popular presentation of the work and the results of official statistics is offered by the "**Datenreport**" (Data Report) the second edition of which was issued in autumn 1985 as part of a series published by the Bundeszentrale für politische Bildung (Federal Centre for Political Education). In Part I the Federal Statistical Office comments on an abundance of facts and figures relating to state, society and economy of the Federal Republic of Germany. Part II, which has been prepared by the special research department 3 of the universities of Frankfurt and Mannheim, analyses the objective living conditions and the subjective well-being of the citizens.

The "**Datenreport**" may be obtained free of charge by contacting the Bundeszentrale für politische Bildung, Berliner Freiheit 5-7, D-5300 Bonn, Tel. 0228/5151, or the Federal Statistical Office. A special edition for the booksellers' trade has been published by Verlag Bonn Aktuell GmbH, Pforzheimer Str. 377, D-7000 Stuttgart 31, Tel. 0711/881149 (Price for the 1985 edition: 29.80 DM).

References for tracing statistical figures are provided by the "Wegweiser zu den Veröffentlichungen" (Guide to the Publications) published at several years' intervals (latest edition 1984: out of print).

Special informational brochures are also being published for selected spheres of statistics. They describe the legal and methodological foundations of the statistics, provide an outline of the survey and processing procedures and extensively present the current offer of publications. At the present time, such brochures are available on foreign trade statistics, transport statistics, statistics on wages and salaries as well as on price statistics. They are offered by the Federal Statistical Office free of charge.

The brochure "Methoden ... Verfahren ... Entwicklungen" (Methods ... Procedures ... Developments) which was first published in two editions in 1986 and discusses questions concerning methods and procedures of statistical surveys is particularly addressed to economic and social scientists who are working empirically and are interested in methodological questions.

The Federal Statistical Office is issuing annually about 450 **press releases** on current results of its work. Additional information facilitating the interpretation of statistical figures and relationships is also provided by the monthly press service "Zahlen ... Fakten ... Trends" (Figures ... Facts ... Trends). Upon request, this material is supplied free of charge to editorial offices.

The latest figures of the consumer price indices are supplied by an automatic **telephone answering service** (Tel. 06 121/75 28 88). Interested users may inquire about the most recent position of the index of share prices by **telex** (Telex 4186511 stb d) against reimbursement of costs.

Via "**Bildschirmtext**" (interactive videotex) — **Btx** —, a comprehensive information programme of more than 1,000 Btx pages can be called up under the head page *48484#. The essential part is the directory of figures which in easily intelligible tables and graphs provides summary statistical data. Included are data from all spheres of official statistics, from the demographic development to the latest results of the national product computations. The programme also offers topical headlines relating to current events and a quiz of figures. It is further possible to order publications and to make brief inquiries by contacting the information service of the Federal Statistical Office.

More than 600 economic indicators may be called up with the flash service for the economy (*484846#). The approx. 60 Btx pages are being updated immediately upon the availability of the most recent statistical figures. To call up one table page costs 0.10 DM.

The common programme official statistics (*48481#) is a guide to the information programmes of the statistical offices of the Federation and the Laender. It permits, among other things, to have direct access to Btx pages of the directory of figures and identical Btx pages of the Land statistical offices, so that it is possible to call up comparable results for the Federal Republic as a whole and the federal Laender. The programme is still being developed. Information material may be requested from the Federal Statistical Office.

As part of the service facilities, the computer-supported **Statistical Information System of the Federation (STATIS-BUND)** is available for users

wishing to carry out statistical evaluations or mathematical-statistical analyses. In addition to the compilation of tables in the desired form, the system also makes possible special processings as well as the application of a great number of procedures of mathematical-statistical analysis. The stock of data, comprising at present more than 400,000 time series, is continuously being updated and extended. Users have the possibility to use the information system either via a direct connection or by placing an order with the Federal Statistical Office. The data can be supplied in form of a print-out or on magnetic tape.

Online access to a selected part of the time series is also possible via the data processing installations and networks of commercial information providers. Detailed information on access procedures as well as costs may be obtained direct from the firms concerned.

Please direct any inquiries to the Federal Statistical Office in Wiesbaden (Tel. 06121/752426) or the advisory service "Statistical Information System" in Bonn (Tel. 0228/332730). Information material may be obtained free of charge. Against a nominal charge of DM 45.—, it is also possible to obtain from the Federal Statistical Office a catalogue containing about 1,600 definitions of statistical terms used in the Statistical Information System of the Federation (STATIS-BUND).

Apart from national and international statistical publications the **Library** of the Office offers in particular standard works on demography, economic and social sciences and environmental protection as well as 1,700 current periodicals.

There is the possibility of interlending via the lending network of scientific libraries. For online investigations concerning the available literature and for consulting the material on the spot, the reading-rooms are open Monday through Friday from 8 a.m. to 3 p.m.

The labour costs, which comprise all expenditures of the employers for their employees (remuneration for work performed and incidental wage expenses), are playing an important role in overall economic discussions as well as in negotiations between the parties to a collective wage agreement, between management and works council. The above publications inform (in future quadrennially) on the amount and structure of these costs.

While Number 1 is presenting data for more than 90 branches of economic activity in production industries, Number 2 refers to selected service sectors. Besides the total labour costs, there are shown the costs per full-time employee and per hour worked. There is further a comparison with the figures for 1981 (the year of the last survey).

categories in which the desired information can be found. As far as the index word does not appear in the title of the publication, the 7-digit code number of the publication is shown in addition in order to ensure a clear allocation. Synonyms were included in exceptional cases only.
