Introduction

Notes for Users

What does the List of Publications contain?

The annual List of Publications comprises all the titles available at the beginning of January 1989. They may be consulted at the Federal Statistical Office or in the larger libraries. For a detailed list of sources for major statistical results going further back please see the bibliography of sources of the Statistical Yearbook.

Titles which are expected to appear shortly after the publication of this List are referred to as "in preparation"; publications for which no date of issue can be given as yet are marked "planned".

All new publications are announced weekly in the "Bundesanzeiger" (Federal Advertiser), in "statistischer Wochendienst" (Information on Statistics, Weekly), and monthly in "Wirtschaft und Statistik" (Economy and Statistics).

For the "Summary publications" in the first part of the List, a brief description of their content is given in addition to periodicity, latest issue, volume, format and price.

All other publications are listed in tabular form. The periodicity is shown by an abbreviation (explanations see page 10). The figures in brackets always indicate the latest edition.

The German edition of the List of Publications contains indications regarding the spatial breakdown of the published material indicating the smallest regional unit shown (e.g. Regierungsbezirk, Kreis). The data provided in the publications of the Land statistical offices (addresses see page 79) have a more detailed regional breakdown.

How is the publication system classified?

The publications of the Federal Statistical Office may be analysed into the three major groups:

- Summary publications,
- Subject-matter series,
- Classifications.

There are further issued maps, publications dealing with statistics of foreign countries and foreign-language publications. An outline of the entire publication system is provided in the schedule on page 2.

The **summary publications** contain the results from several or all fields of activity of the Federal Statistical Office. Besides the general cross-section publications offering a comprehensive though condensed selection of figures, there are subject-matter related cross-section publications which are imparting information on specific spheres (e.g. education, construction, energy) or allocating it to specific groups of persons (e.g. women, young people, foreigners).

There are further publications on organizational and methodological questions. Reference should be made in this connection especially to the series of publications entitled "Forum der Bundesstatistik" (Forum of Federal Statistics) which the Federal Statistical Office has created as a platform for the discussion of major problems of official statistics. In addition to experts from official statistics, the authors to be featured here will also include experts from science and research.

Summary brochures provide in easily comprehensible form an outline of important spheres of life.

The results of individual statistics are issued within the scope of **subject-matter series** subdivided into large subject fields. Each subject-matter series comprises publication series containing results of continuous statistics supplemented, whenever necessary, by special contributions. The results of censuses/major surveys performed only at larger intervals are issued within the respective subject-matter series as non-recurrent publications.

The **classifications** constitute subsidiary material for the uniform allocation of data in the statistics and for a breakdown of the results in conformity with the purpose of data collection and presentation.

Data from censuses are to some extent also shown in the form of subject-matter related **maps**.

The category **Statistics of Foreign Countries** comprises cross-section publications with selected figures for a great number of countries (quarterly reports on foreign statistics) or data with detailed comments on population and economy of individual countries (reports on foreign countries).

The publications of the Federal Statistical Office as a rule are issued in the German language. In exceptional cases, there are however also **foreign-language editions**. The List of Publications is also available in German and French.

In addition to the publishers' programme (page 12 f.), the Federal Statistical Office issues a number of **brochures, information services, working papers and folders** which are provided to interested readers either free of charge or against a small nominal fee. (For an overview see the list on page 8).

A brief outline of the tasks and the working methods of the Federal Statistical Office as well as of the services citizens may expect of the Office is provided by the brochure *Bundesstatistik – für wen und wofür?* This brochure was also published in the English language under the title "Federal Statistics – Users and Purposes".

For users without any previous special knowledge, the four numbers of *Informationen über die Bundesstatistik* (Information on Federal Statistics) show in concise form what information is covered for federal statistics in what way and on the basis of which legal foundations, what purpose the surveys serve and where the results are being published.

Special informational brochures are also being published for selected subjects. They describe the legal and methodological foundations of the statistics, provide an outline of the survey and processing procedures and extensively present the current offer of publications.

Methodological problems are discussed in the publication series *Ausgewählte Arbeitsunterlagen zur Bundesstatistik* (Selected Working Papers on Federal Statistics). This series exclusively comprises working papers compiled by staff members of the Office on conceptual, methodological and technical-organizational problems.

For empirically working economic and social scientists who are interested in methodological questions, there is also available the information service *Methoden . . . Verfahren . . . Entwicklungen* which deals with questions concerning the methods and procedures of statistical surveys. An English edition with the title "Methods . . . Approaches . . . Developments" is being prepared.

A popular presentation of the work and the results of official statistics is offered by the *Daten-report* (Data Report) which is published as part of a series issued by the Bundeszentrale für politische Bildung (Federal Centre for Political Education). In Part I the Federal Statistical Office comments on an abundance of facts and figures relating to state, society and economy of the Federal Republic of Germany. Part II, which has been prepared by the special research department 3 of the universities of Frankfurt and Mannheim, analyses the objective living conditions and the subjective well-being of the citizens.

For hurried readers, the Federal Statistical Office further provides folders by which major basic statistical data are available to users at a glance.

The Federal Statistical Office is issuing annually about 450 **press releases** on current results of its work. Data of general interest are furthermore published as the **Zahl der Woche** (Figure of the Week). Additional information facilitating the interpretation of statistical figures and relationships is also provided by the monthly press service **Zahlen . . . Fakten . . . Trends** (Figures . . . Facts . . . Trends).

Via "**Bildschirmtext**" (interactive videotex) – **Btx** –, a comprehensive information programme of more than 1,000 Btx pages is presented starting main page * 48484 #. The central part is the compendium of figures which in easily intelligible tables and graphs provides summary statistical data. Included are data from all spheres of official statistics, from the demographic development to the latest results of the national product computations.

More than 600 economic indicators may be called up from the monthly business indicators (* 484846 #). The approx. 60 Btx pages are being updated immediately upon the availability of the most recent statistical figures. To call up one table page costs DM 0.10.

Selected basic and structural data on more than 130 countries are offered on about 600 Btx pages under the headline world in figures (* 4848480 #).

It is further possible to order publications and to make brief inquiries by contacting the information service of the Federal Statistical Office. As a special Btx service, the press information service (* 4848420 #) permits to order the current press releases.

The joint programme official statistics (* 48481 #) is a guide to the information programmes of the statistical offices of the Federation and the Laender. It enables, among other things, to have direct access to Btx pages of the compendium of figures and corresponding Btx pages of the Land statistical offices, so that it is possible to call up comparable statistical results for the Federal Republic as a whole and the federal Laender. The programme is still being developed. Information material may be requested from the Federal Statistical Office.

The **Statistical Information System of the Federation (STATIS-BUND)** is available for the electronic processing of statistical results. Users may obtain data on data media or carry out statistical evaluations and mathematical-statistical analyses. In addition to the compilation of tables in the desired form, the system also makes possible special processings as well as the application of a great number of procedures of mathematical-statistical analysis. Users have the possibility of utilizing the information system either online or by placing an order with the Federal Statistical Office.

The fully documented stock of data which comprises at present about 470,000 time series is continuously being updated and extended. The data are available **online**, on **magnetic tape**, on **floppy disks** or as printouts. When ordering large quantities of data, preference should be given to magnetic tapes, while for smaller quantities or a specific selection of time series it will be advisable to use our new floppy disk service. The information may be obtained either on a one-time basis or monthly, quarterly and semi-annually as part of an annual subscription.

A monthly business-line service of the Statistical Information System is available as a printed edition and – with a greater range of data and in a more detailed analysis by economic sectors – on floppy disks. The business-line service provides up-to-date figures on production, persons employed, turnover, prices and foreign trade. The editions of the business-line service can be ordered individually.

Online access to a selected part of the time series is also possible via the data processing installations and networks of commercial information providers. Detailed information on access procedures as well as costs may be obtained direct from the firms concerned.

Please direct any inquiries to the Federal Statistical Office in Wiesbaden (tel. 0 61 21/75 24 26) or the advisory service "Statistical Information System" in Bonn (tel. 02 28/33 27 30). Information material may be obtained free of charge. Against a nominal charge of DM 45.–, it is also possible to obtain from the Federal Statistical Office a catalogue containing about 1,600 definitions of statistical terms used in the Statistical Information System of the Federation (STATIS-BUND).

Apart from national and international statistical publications, the **Library** of the Office offers in particular standard works on demography, economic and social sciences and environmental protection as well as 1,700 current professional magazines.

All the publications are listed in alphabetical order and have been classified under systematic and regional aspects. There is the possibility of interlending via the lending network of scientific libraries.
