## Die Entwicklung der saarländischen Bevölkerung 1992 bis 2030

Ergebnisse der 7. koordinierten  
Bevölkerungsvorausberechnung

### Altersaufbau der saarländischen Bevölkerung

## Vorbemerkungen

Der vorliegende Statistische Bericht enthält die Ergebnisse der 7. koordinierten Bevölkerungsvorausberechnung, die für das Saarland im Januar 1992 abgeschlossen wurde. Im Gegensatz zu früheren Prognosen wurde auf die Rechnung verschiedener Varianten verzichtet, ebenso auf eine getrennte Berechnung für Deutsche und Ausländer.

Es wurden folgende Grundannahmen getroffen.

### 1. Bevölkerungsstruktur

Gemäß einer Vereinbarung der Statistischen Ämter des Bundes und der Länder ist die Basis der Berechnung die auf der Grundlage der Volkszählung 1987 fortgeschriebene Bevölkerung nach Alter und Geschlecht zum 31.12.1989.

### 2. Geburten

Aus den Jahresergebnissen 1987 bis 1989 wurden durchschnittliche Fruchtbarkeitsziffern ermittelt. Diese bleiben für den gesamten Prognosezeitraum konstant.

### 3. Sterbefälle

Die aus den Jahresergebnissen 1987 bis 1989 ermittelten durchschnittlichen Sterbewahrscheinlichkeiten werden mit einem vom Statistischen Bundesamt aufgrund langfristiger Untersuchungen aufgestellten Kennzahlensystem bis zum Jahre 2000 fortgeschrieben. Die für das Jahr 2000 berechneten Sterbewahrscheinlichkeiten

bleiben in den Folgejahren bis zum Ende des Prognosezeitraumes konstant.

## 4. Wanderungen

Der Gesamtwanderungssaldo bis zum Jahre 2030 setzt sich zusammen aus:

### a) Binnenwanderungen

Hierbei handelt es sich um Wanderungsbewegungen zwischen dem Saarland und den alten Bundesländern.

### b) Außenwanderungen von Deutschen

Hierbei handelt es sich um Wanderungsbewegungen von Deutschen über die Grenzen des alten Bundesgebietes. Vornehmlich sind Aussiedler und Zuzüge aus den neuen Bundesländern berücksichtigt. Die zuletzt genannte Gruppe, die eigentlich zu den Binnenwanderungen zu zählen wäre, erscheint deswegen unter dieser Position, weil die 7. koordinierte Bevölkerungsvorausberechnung nur von den alten Bundesländern durchgeführt wurde.

### c) Außenwanderungen von Ausländern

Hierbei handelt es sich um Wanderungsbewegungen von Ausländern über die Grenzen des alten Bundesgebietes. Zu den betreffenden Personengruppen zählen u.a. die Asylbewerber.

Die folgende Tabelle sowie die dazugehörige Graphik fassen die Annahmen über die zukünftige Entwicklung der Wanderungen zusammen.

**Annahmen über die künftige Entwicklung der Wanderungen  
(Salden)**

Jahr	Wanderungen insgesamt	Binnen- wanderungen	Außenwanderungen von Deutschen	Außenwanderungen von Ausländern
1992	+ 3 130	- 3 320	+ 3 620	+ 2 830

## Wanderungssalden (Prognose) 1992 - 2030

Statistisches Landesamt SAARLAND

SL86

- Der angenommene Verlauf der Wanderung zwischen dem Saarland und den alten Bundesländern wurde als Fortschreibung des Trends der letzten eineinhalb Jahrzehnte bestimmt. Hiernach nehmen die Wanderungsverluste im Prognosezeitraum kontinuierlich bis auf Null ab dem Jahre 2005 ab.
- Der Saldo der Wanderungen von Deutschen zwischen dem Saarland und den neuen Bundesländern und von Deutschen zwischen dem Saarland und dem Ausland (vor allem Aussiedler) sinkt von einem derzeit hohen Niveau bis zum Jahre 2001 gegen Null und verbleibt auf diesem Niveau (Dies entspricht den Annahmen auf Bundesebene).
- Der positive Saldo der Wanderungen von Ausländern zwischen dem Saarland und dem Ausland verringert

sich zwar. Der Saldo bleibt jedoch bis zum Jahre 2030 positiv (Dies entspricht den Annahmen auf Bundesebene).

Die sich aus diesen Einzelkomponenten ergebende Entwicklung des Gesamtwanderungssaldos läßt sich im Zeitablauf bis zum Jahre 2030 in drei Phasen aufteilen.

1. Bis 1993 ergeben sich positive, jedoch abnehmende Wanderungsgewinne.
2. Von 1994 bis zum Jahre 2003 sind Wanderungsverluste bis zu 900 Personen pro Jahr zu erwarten.
3. Ab dem Jahre 2004 ergeben sich wiederum Wanderungsgewinne, die sich auf dem Niveau von 1 800 Personen pro Jahr stabilisieren.

# Veröffentlichungen

## I. Zusammenfassende Schriften

### **Statistisches Handbuch für das Saarland**

Erscheint zweijährlich im Wechsel mit "Statistisches Taschenbuch für das Saarland".

Das Statistische Handbuch vermittelt aus dem Bereich der amtlichen Statistik die jeweils aktuellen Ergebnisse. Dem Benutzer steht reiches Zahlenmaterial aus sämtlichen Bereichen des wirtschaftlichen, kulturellen und sozialen Lebens zur Verfügung. Durch Zeit- und regionale Vergleiche lassen sich Entwicklungen in der Bevölkerungs-, der Wirtschafts- und Sozialstruktur erkennen.

### **Statistisches Taschenbuch für das Saarland**

Erscheint zweijährlich im Wechsel mit "Statistisches Handbuch für das Saarland".

Das Statistische Taschenbuch will die zweijährliche Erscheinungsphase des "Handbuchs" durch Publizierung der jeweils neuesten, wichtigsten Daten der amtlichen Statistik ausfüllen. In seiner Gliederung ist es nicht so differenziert angelegt wie das bedeutend umfangreichere "Handbuch". In einem Anhang werden zusätzlich die wichtigsten Daten der amtlichen Statistik für das Bundesgebiet aufgeführt.

### **Saarland heute - Statistische Kurzinformationen (erscheint jährlich)**

## II. Fachstatistische Schriften

### **Handbuch Öffentliche Finanzen**

Erscheinungsweise jährlich.

Das Handbuch stellt Grunddaten über die aktuelle Finanzsituation im öffentlichen Bereich zur Verfügung. Angegeben sind sowohl einfache Bestandszahlen als auch funktional gegliederte Ergebnisse für Gemeinden und Land.

### **Statistische Berichte**

Zur schnellen Unterrichtung von Verwaltung und anderen Interessenten werden hier die neuesten Ergebnisse der laufenden Statistiken wie auch die ersten Resultate von Sondererhebungen veröffentlicht. Ihre sachliche Gliederung ist sehr differenziert und bundeseinheitlich festgelegt.

### **Bildung - Kurzinformation (erscheint jährlich)**

## III. Reihen

### **Einzelschrift zur Statistik des Saarlandes**

In dieser Reihe, die bis heute etwa 70 Einzelschriften umfaßt, werden aus dem gesamten Spektrum der amtlichen Statistik schwerpunktmäßig Einzelthemen behandelt.

### **Saarland in Zahlen (Sonderhefte)**

In dieser Serie werden die Ergebnisse von periodisch wiederkehrenden Zählungen veröffentlicht.

### **Gemeinde- und Kreisstatistiken**

In dieser im 2 Jahresrhythmus abwechselnd erscheinenden Reihe werden Informationen aus den verschiedensten Bereichen der Amtlichen Statistik auf Gemeinde- bzw. Kreisebene veröffentlicht.

### **Volkswirtschaftliche Gesamtrechnungen der Länder (Gemeinschaftsveröffentlichungen der Statistischen Landesämter)**

Ergebnisse über Entstehung, Verteilung und Verwendung des Sozialprodukts nach Ländern sowie Bruttowertschöpfung der kreisfreien Städte und Landkreise, Erscheinungsweise ein- bis zweijährlich.

## IV. Verzeichnisse

wie Gemeindeverzeichnis, Schulverzeichnis, Krankenhausverzeichnis, Märkte im Saarland, Systematischer Datenbestandskatalog des saarländischen Informationssystem SAPLIS usw. werden jährlich aktualisiert herausgegeben.
